THE THIRD DISTRICT CONFERENCE.

Kadur District.

The Third District Conference of the Kadur District was held in the Sri Narasimharaja Wadiyar Town Hall at Chikmagalur under the Presidency of Mr. L. Krishna Rao, Deputy Commissioner.

All the District Officers and about 300 gentlemen from all parts of the district were present.

A District Co-operative Societies' Conference had also been organised along with the District Conference. It met on the first day and its proceedings have been recorded separately and submitted as an annexure to this report.

In the morning the following demonstrations were successfully conducted by Mr. D. G.
13th February 1917. 7 to 11 A.M. Ramachandra Rao, Assistant Director of Agriculture and Mr. Bennur, Agricultural Inspector.

1. Sugar-cane crushing by an improved mill and jaggory boiling by up-to-date method were demonstarted in a field in Hosmane. As a contrast, a mill was worked side by side by professional jaggory boilers from Channarayapatna. The superiority of the former was apparent to all. The improved furnace with a "Baffle Wall" which distributes the heat equally — a device of Mr. D. G. Ramachandra Rao — turned out jaggory which was pronounced by many experts that practically tested it to be much superior in flavor, taste and color to the local product and possessing the power of resistance to the monsoon damp.

2. The uses of the various ploughs and implements recommended by the Agricultural Department were practically demonstrated with the result that orders were booked for over 20 meston ploughs on the spot.

3. In the afternoon, Mr. Ramachandra Rao gave an interesting lecture on improved
13th February 1917. 2 to 4 P.M. implements, new methods of agriculture, on the advantages of growing a money-earning crop like sugar-cane, on the uses of green and other manures and selection of seed, etc.

14th February 1917. 2 to 5 P M According to the programme, the work detailed below was gone through :—

1. Mr. M. D. Raju, Mechanic of the Industries and Commerce Department attached to the Kadur District, delivered an interesting lecture in very simple kanarese on the employment of machinery and power engine in pumping water for irrigating crops, milling sugarcane, for hulling rice, for extracting oil from oil seeds and generally developing agriculture and Industries.

2. Mr. S. Venkata Rao, Superintendent of Government Industrial School, followed with a lecture on "Industrial Schools and Workshops" and explained the benefits of an Industrial education. He also explained the subjects and industries that were taught at the newly established Industrial School, at Chikmagalur.

3. Mr. C. Narayana Iyengar, Assistant Veterinary Inspector, delivered a lecture on "The curative effects of Inoculation and the establishment of Veterinary Dispensaries." In the course of his lecture, he also gave a description of the common cattle diseases, their symptoms, etc., and how the services of the Department could be availed of by the raiyats.

4. Mr. R. Nanaswami Rao, Special Revenue Officer, Kadur and Hassan Districts, read "An account of the work done under the Malnad Improvement Scheme" in the district in the matter of sinking drinking water wells, drainage of stagnant ponds and pools and shifting of insanitary villages to healthier sites and free distribution of quinine. Work done could be classified as follows :—

1. Out of 11 road works undertaken including three bridge works, seven were completed and the rest were in various stages of progress. The amount spent on this account since the commencement was Rs. 1,200.

2. Out of 24 drainage works, 15 have been completed, the rest being in various stages of progress. A sum of Rs. 2,800 had been spent on this account.

3. Out of 59 well works sanctioned, 30 have been completed and the rest are in progress. An amount of Rs. 15,250 had been expended on this account.

4. Thirteen existing wells were improved at a cost of Rs. 1,500.

5. Two large water-supply projects sanctioned were under progress. Two more are under investigation and a sum of Rs. 200 has been spent on Indavara water-supply project.

6. Clearance of lantana had been undertaken in 18 villages at a cost of Rs. 800 and the villagers advised to clear the rest by themselves.

7. Five new Dispensaries had been sanctioned for the Malnad and large subscrip
18th February 1917. tions have been made by the people to put up the necessary buildings.

The day's proceedings closed with the reading of his report by the District Economic Superintendent. He described some of the results achieved in seed selection single, seedling transplantation of paddy, green manuring, etc. He then brought to the notice of the meeting a proposal of Mr. Petrie Hay for establishing a bone crushing and manure works in Chikmagalur on Joint Stock lines. The Indian Planters present said that they would establish a similar concern themselves.

A cattle show had been organised for the day under the auspices of the District
14th February 1917. Committee. It was declared open by the Deputy Commissioner and there
7 to 11 A.M. was a good collection of draught and trotting bullocks, milch cows and
5 to 7 P.M. milch buffaloes. Goats and sheep were poorly represented but those shewn were very fine. For a first show of this kind, it was quite a success.

At the same time ploughing demonstartions were carried on in the neighbourhood in some of the fields in the neighbourhood of the Veterinary Dispensary.

In the evening, the Deputy Commissioner distributed the prizes to the successful competitors of the cattle show. He performed a similar function for the boys who had won prizes at the sports on the two previous evenings. He also distributed prizes to the girls of the Government Girls' school, Chikmagalur.

The meeting of the Conference was resumed on the 15th idem. The following items
15th February 1917. of work were gone through :—

1. The lists of major and minor wants compiled at the several Taluk Conferences were discussed along with the major and minor wants of the district as a whole and suggestions for providing them were noted.

2. A consolidated report of work turned out in the taluk by the Village Improvement Committees and Taluk Progress Committees was read.

3. The following propositions were discussed and passed :—

Proposed by Mr. C. V. Basave Gowda and seconded by Mr. D. Veeranna Gowda :—

"That this Conference records its approval of the improved methods of agriculture recommended by the Assistant Director of Agriculture and commends the use of the improved implements on a large scale at present."

"That Village Progress Committee be instructed to keep a stock and hold demonstations, their uses as well as of seed selection, green manuring and single seedling of paddy."

The propositions were adopted.

4. Mr. C. Srinivasa Rao, proposed and Mr. S. Manjiah seconded.

"That a sum of Rs. 150 should be used for the purchase and distribution of good sugar-cane seeds among the Malnad raiyats and a sum of Rs. 350 allotted for the purchase of jaggory boiling plant for demonstration purposes and that funds should be provided by reappropriation."

This proposition was adopted.

5. Proposed by Mr. C. Srinivasa Rao and seconded by Mr. H. Venkoba Rao :—

"That the Hiregowja Tank Project may be included in the list of Major and Minor wants."

The proposition was approved.

The Conference approved of the following proposals :—

(*a*) The establishment of sugar-cane mills and jaggory boiling plants by Co-operative Societies at Sakrepatna, Thangli, Chikmagalur and Belwadi.

(*b*) The addition of a Drawing class to the Industrial School at Chikmagalur and the equipment of a travelling workshop.

(*c*) Opening of Veterinary Dispensaries in all the Taluk Headquarters.

With a vote of thanks to the President and three cheers for His Highness the Maharaja and His Highness the Yuvaraja, the meeting terminated.

READ—

Extract from para 36 of the report of the Revenue Commissioner on the administration of the Revenue Department during the year 1915-16, received with his letter No. C. Per. 150, dated 30th September 1916, suggesting the omission in future Revenue Administration Reports of paragraphs on Agricultural Banks, Schools, etc., which are not under the control of the Revenue Commissioner.

READ ALSO.

Para 1 of Government Order No. 13931-65—R. F. 236-92, dated 5th February 1894, reviewing the Revenue Administration Report for 1891-92, directing that matters relating to other than Revenue Department such as those relating to Police and Civil and Criminal Justice need not be dealt with in the Revenue Administration Reports, there being separate Administration Reports on those subjects.

Order No. R. 11764-811—L. R. 229-16-8, dated 26th May 1917.

As separate annual reports on the working of Agricultural Banks, Schools, Hospitals and Dispensaries, Vaccination, Co-operative Societies, etc., are being now received from the respective Heads of Departments and reviewed by Government, they agree with the Revenue Commissioner in his view that short paragraphs on such matters are no longer necessary in the Revenue Administration Reports and accordingly direct that, in future, the Revenue Administration Reports submitted to Government be confined only to matters over which the Revenue Commissioner has control.

REPORT ON THE SECOND DISTRICT CONFERENCE HELD AT CHITALDRUG IN FEBRUARY 1917.

Introductory.—As in last year the Taluk Conferences were arranged to be held in all taluks of the district from October 1916 and the Taluk Conferences in three taluks, *viz.*, Challakere, Hiriyur and Holalkere were held in October, November 1916 and January 1917. In the meanwhile instructions were received from Government (in their Order No. R. 5650-699—L. R. 10-14-211, dated 5th December 1916) that the District Conference should be held in February of each year.

In pursuance of the above order, the second annual District Conference was held at the headquarters of the district on the 15th and 16th February 1917 under the presidency of the Deputy Commissioner Mr. C. S. Balasundaram Iyer, B.A. Several members of the Bar, Dasara Representative Assembly, the District Committee, District and Taluk Boards, representatives of Municipalities, Unions, Tank Panchayets, Co-operative Societies, Village Courts, model and other important villages and other associations and public bodies, all the officers of the district and Amildars of taluks numbering in all about 200 attended the Conference. Owing to the prevalence of plague at Chitaldrug and in the surrounding villages as well as in some taluks the attendance was not as large as would have been the case otherwise.

2. The proceedings commenced at 1 P.M. in the Chamarajendra Memorial Hall, when the Deputy Commissioner in opening the Conference explained the object with which they had assembled there and touched upon the recent order of Government referred to above regarding the holding of such Conferences and the nature of work to be transacted in them. He drew attention to the organisation of the Conference in that it consisted of representatives of definite interests and local bodies, instead of being a mere gathering of all who chose to come. This new constitution was calculated to create greater enthusiasm and lead to useful results. In the previous year the work was mainly the dissemination of knowledge but the deliberations of this year were expected to lead to practical work and definite results. The Conference would consider the main needs of the district for social, intellectual and material advancement, deliberate how to satisfy them and set in motion the respective agencies for action. He then referred to the portion of the Government Order dealing with the work to be done at the Conference, *viz.*, the preparation or revision of the list of major and minor wants of each taluk, the discussion of local grievances and measures for redressing the same, and taking stock of the progress made so far in the working of the special schemes under Economic Conference activities and Village Improvement scheme, etc. He further said that discussion of the subjects for the 2nd Session of the Dasara Representative Assembly to be held in April 1917, would also form part of the programme of the Conference.

3. The District Economic Superintendent then read his report on the working of the Village Improvement scheme and the work done in this district so far in matters agricultural, educational and industrial, etc. The main points contained in the report are detailed hereunder for information.

Village Improvement scheme:—Works, such as the construction of musafirkhanas, chavadies, gokattes, formation of new roads and repairs to old ones, etc., at an estimated cost of Rs. 4,127 were undertaken during the current year for which the villagers contributed half the amount in the shape of cash and labor. In addition to these wells were sunk in the district at an estimated cost of Rs. 12,804 for which also the villagers contributed a sum of Rs. 4,638 either in the shape of cash or labor and school buildings were constructed at a cost of Rs. 1,516, the raiyats' contribution being Rs. 978. Thus it will be seen that a total sum of Rs. 18,447 was utilised for works of public utility till the end of February 1917.

Economic activities.—Village Savings Banks have been established in twelve villages and Village Munsiffs' Courts in seventeen villages.

Three Tank Panchayets and six village forests have been formed.

Fifty-two grant-in-aid schools and 60 night schools have been opened in the district. Of the latter, ten have already been sanctioned by the Inspector-General of Education. Three Panchama schools, three English grant-in-aid schools, five practical instruction classes, and one commercial class at Davangere, a metal class at Hosdurga, a knitting class at Talak and Home Industrial Class at Molakalmuru and rattan classes at Challakere and Harihar have been started.

Grants have been sanctioned for nine libraries opened in the district. Mr. Nanjundappa, Sahukar of Pandrahalli has made a free gift of Rs. 5,000 for the Agricultural School to be started near Janakonda.

Two candidates have been sent this year to the Hebbal Agricultural school for training each being paid a monthly scholarship of Rs. 10.

No. R. 11890-1—L. R. 12-16-155, DATED 28TH MAY 1917.

Fifty improved ploughs have been introduced during these six months and implement depots will be opened at Chitaldrug and Hiriyur. Mr. Doddabasappa of Davangere has come forward to start a mill for spinning yarn for making kamblies and has deposited an earnest money of Rs. 1,000. The matter has been referred to the Director of Industries and Commerce Department for necessary instructions and advice in the matter.

4. The business on the Agenda (copy herein enclosed for ready reference) was next taken up. The Amildars of taluks explained in detail the items in the list of major and minor wants in respect of their taluks stating the progress made. Suggestions were invited thereon by the President with the result that the list as existing was considered by those present to be adequate. A few additional matters suggested were noted in the reserve list. Mr. Anantha Chetti, a leading member of the Bar, spoke on the District Board Railway scheme and the Railway debenture loan of 9 lakhs recently sanctioned by Government and made a strong appeal to the people to subscribe liberally to the loan and explained the several ways in which the district would be benefited. He was ably supported by Messrs. Sanjiva Rao, Pandrahalli Nanjundappa and B. Venkatasamanna. All of them strongly urged that earnest efforts should be made to secure the requisite amount and suggested the appointment of a special officer for the purpose. The President said that every thing that was feasible was being done and invited the hearty co-operation of all non-official leaders to popularise the scheme.

5. The subjects to be sent up to the Dasara Representative Assembly to be held in April next were then discussed. There were in all 33 subjects, of which 12 were proposed to be sent up, 4 kept for local investigation and the rest were either withdrawn or not pressed. A list of the selected subjects has been sent to Government (*vide* this office No. , dated). A few topics relating to English education in village schools, fees to be levied therein, etc, were brought forward and discussed. Points touching the relationship between khatedars and hissedars, payment of kandayam by the latter to protect their interests, change of pattas, sub-division of shares, entry of rights in the special register and other kindred subjects were also discussed.

6. The Conference resumed its sitting on the 16th February 1917 at 1 P.M., when the following lectures were delivered:—

1 "Tank Panchayets and Village Munsiffs' Courts" by Mr. Venkatasamanna, Secretary, District Committee, Economic Conference.

2. "Village Forests" by Mr. D. Raja Rao, District Forest Officer.

3. "Improvements in the hand spinning of wool for kamblies" by Mr. W. Tirumala Rao, Pleader.

4. "Co-operation" by Mr. M. Rama Rao, Inspector of Co-operative Societies, Chitaldrug Circle.

5. "Honorary Supervisors" by Mr. P. Seshachar, Inspector of Co-operative Societies, Davangere Circle.

6. "Rural Industries" by Mr. S. Raghavendra Rao, Technical Assistant to the Inspector-General of Education.

Mr. B. Venkatasamanna, Advocate, Member of the Legislative Counil and Secretary to the District Committee of the Economic Conference, explained to the people the object of Tank Panchayets and Village Courts and impressed upon them the necessity of availing themselves of the beneficient schemes. Mr. Raghavendra Rao touched upon the present condition of rural industries such as carpentry, smithy, etc., and offered some practical suggestions for their improvement. Mr. Tirumala Rao recurred to his subject "present difficulty felt" in the supply of woollen yarn for the manufacture of kamblies—kambli weaving considered as a cottage industry and how to remove it and indicated the lines on which improvements might proceed. He promised to prosecute his investigation and hoped to show some tangible results before the next Conference.

After lunch a popular scientific lecture illustrated by experiments on "Air and its properties" was delivered by Mr. S. Krishna Rao, Science Assistant, Government High School, and was much appreciated. Subramanya Iyer, Drawing Master, District Normal School, spoke on the importance of drawing in schools and illustrated his lecture by means of demonstrations.

7. In winding up the proceedings of the two days, the President referred to the several measures of reforms introduced by Government for amelioration of the condition of the people and called upon them to co-operate with the Government officers in making them a success. Then he dwelt at length on the necessity of organising a system of scholarships to aid the deserving poor students of the district for prosecuting their studies and promised that a scheme would ere long be drawn up and exhorted the audience to do their best to give help to the movement. He further pointed out that at the headquarter town of Chitaldrug, a public library and a museum of commercial and industrial products should be,

formed and said that needful steps would be taken to open them shortly and requested that every one in the district should feel it a pride to do every thing in his power to help these institutions.

8. A sum of Rs. 150 was sanctioned (in equal proportions from Village Improvement Funds and Economic Conference Funds) for expenses in connection with the District Conference, out of which a sum of Rs. 37-15-3 was utilised.

Thanks are due to the various official and non-official helpers who rendered useful assistance in various arrangements for the Conference.

Abolition of the Irrigation Wells Establishments.

No. R. 11812-21—L. R 622-12-8, DATED 26TH MAY 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Government Order No. 3266-77—R. F. 58-96, dated 8th November 1898, sanctioning the permanent retention of the Irrigation Wells Establishment on a certain scale in the Kolar, Tumkur and Chitaldrug Districts.

2. Government Order No. R 6519-20—R. F. 58-96, dated 17th March 1900, sanctioning the retention of a similar establishment in the Bangalore District.

3. Correspondence ending with letter No. 1221, dated 31st July 1913, from the Revenue Commissioner in Mysore, recommending the retention of the above establishments in the Kolar, Tumkur and Chitaldrug Districts, subject to certain modifications.

Order No. R. 11812-21—L. R. 622-12-8, dated 26th May 1917.

The Irrigation Wells Establishments consisting of 7 Inspectors on a pay of Rs. 20 plus 8 (horse allowance) and a peon on Rs. 6 per mensem for each Inspector, was originally sanctioned for supervising the construction of irrigation well works as well as to attend to miscellaneous office work in connection with the grant of Land Improvement and Takavi Loans. On the suggestion of the Deputy Commissioner, Bangalore, the Revenue Commissioner, while submitting his proposals for the reorganization of the District Office Establishment, recommended the abolition of the Irrigation Wells Establishment, on the ground that it was entertained at a time when the system of granting loans for the construction of irrigation wells was first introduced and that it was not now needed, as the work had devolved on the general District Establishment. The Deputy Commissioners of the other Districts in which similar establishments exist, *viz.*, Kolar, Tumkur and Chitaldrug are, however, of the opinion that it is necessary to continue them, with slight modifications.

One for Bangalore District.
One for Kolar ,,
Four for Tumkur ,,
One for Chitaldrug ,,

2. Government have carefully considered the whole question and are of opinion that since shekdars have been entrusted with the investigation of loan applications and the supervision of the construction of loan-works, and the Office Staff has been considerably augmented, it is no longer necessary to retain a separate establishment for attending to loan-work, exclusively. They accordingly direct that the establishment referred to above be discontinued with effect from 1st July 1917, the existing staff being otherwise provided for.

3. When however in any year the number of works in progress in a district is sufficiently large to require the services of a whole-time clerk, the Revenue Commissioner may, with the sanction of Government, entertain temporary men on a pay of Rs. 25 per mensem, for the purpose.

READ—

Letter No. 153, dated 23rd March 1917, from the Superintendent of Revenue Survey and Settlements in Mysore, soliciting instructions as to whether the maps and records of the Survey Department may be corrected so as to show therein the roads, etc., opened by the villagers under the Village Improvement Scheme.

Order No. R. 10892-902—L. S. 48-16-2, dated 7th May 1917.

Government are not prepared to pass any general orders authorizing the correction of the maps and records of the Survey Department in consequence of the formation of new village roads under the Village Improvement Scheme. There is, however, no objection to the corrections being made in those cases in which the roads formed are of importance and are maintained as permanent roads.

1. Government Order No 11508, Rev 329, dated 13th February 1879, sanctioning the original settlement of the late Tarikere Taluk in the Kadur District

2. Letter No 80, dated 16th November 1916, from the Superintendent of Revenue Survey and Settlements in Mysore, submitting proposals for the revision settlement of the same taluk.

(Printed as accompaniment I)

3. Letter No. C 2678, dated 3rd February 1917, and 10th February 1917, from the Revenue Commissioner in Mysore, forwarding with his recommendations the opinion of the Deputy Commissioner of the Kadur District, regarding the proposals referred to above

(Printed as accompaniment II)

4. Letter No. C 3, dated 27th February 1917, from the Superintendent of Revenue Survey and Settlements in Mysore submitting his final remarks in the matter.

(Printed as accompaniment III)

Order No. R. 11457-69—L. S. 25-16-9, dated 21st May 1917.

These proposals relate to the revision of the assessment of 284 Government villages of the late Tarikere taluk of which 211 are in the present Tarikere taluk, 40 in the Kadur Taluk, and 33 in the Channagiri Taluk.

2. The tract under consideration covers an area of about 532 square miles, and forms an extensive plain except in the Southern and Western portions which are semi-malnad in character. The climate is generally good. The Central and Western portions are more favourably situated than the Eastern, where the seasons are severe and rainfall irregular and at times even precarious.

3. The Taluk is irrigated by a number of small streams with five anicuts at different places, of which two are important. A project for the improvement of the anicut at Kallhalu, at an estimated cost of over Rs. 8,000 is under consideration. There are 249 (29 major and 220 minor) tanks of which 22 major and 32 minor tanks have been restored. Lift irrigation by means of Yatam Wells is also practised on a large scale.

4. In addition to the usual dry crops, Ragi, Jola, Wheat and Horse gram, Bengal gram, and Coriander are also grown. The last named is said to be a particularly remunerative crop. Rice is the principal wet crop and arecanut, betel, vine, and cocoanut are the principal garden crops.

5. The population of the taluk has varied greatly at different times. In the first decade of the original settlement, the taluk shared the general depression brought about by the great famine of 1878, the decrease being about 8 per cent, which was more than made good during the next decade. The Census figures of the next two decades ending 1901, 1911, show considerable fluctuations on account of the movements of the floating population of labourers and the inroads of plague. To what extent precisely, these vicissitudes affected the normal population, cannot be determined. The density per square mile has however increased to 156 in 1911 as against 135 at the time of the original settlement.

No. R. 11457-69—L. S. 25-16-9, DATED 21ST MAY 1917.

6. As regards communications, the taluk is advantageously situated. There are several high roads newly opened since the original settlement. Most of the intervillage tracks have also been improved. The Poona section of the Madras and Southern Mahratta Railway runs North to South. The Birur-Shimoga Railway Line and the recently completed Tramway between Tarikere and Narasimharajapura have also contributed towards providing a ready market within easy reach of the cultivator besides considerably improving the trade conditions of the taluk. The want of a road, however, connecting Ajjampur, Bukkambudi and Channagiri is said to be keenly felt. The matter has been referred to the Public Works Department and the Deputy Commissioner of the Shimoga District for necessary action.

7. The taluk has materially advanced in its agricultural and economical conditions since the original settlement. There has been a substantial increase in the number of houses and agricultural stock, such as, carts, ploughs, sheep, goats, etc. The expansion of cultivation has also been marked, the increases under dry, wet and garden lands being 40, 35 and 80 per cent respectively. Nearly 67 per cent of the area which lay waste at the original settlement has been taken up for cultivation. The value of the land has steadily risen. The prices of food grains, etc., have increased by more than 100 per cent.

8. The original grouping of lands in the taluk into three classes is proposed to be left intact during the resettlement.

9. For purposes of resettlement, the Superintendent of Revenue Survey and Settlements in Mysore proposes to revise the rates as detailed below:—

Land	Group	Original Settlement		Revision Settlement	
		Maximum rate	Average rate	Maximum rate	Average rate
		Rs. a. p	Rs. a. p.	Rs. a p	Rs. a. p.
Wet	I	6 8 0	3 6 3	7 0 0	3 9 10
	II	6 0 0	3 0 7	6 8 0	3 5 1
	III	5 0 0	2 6 11	5 8 0	2 10 10
Dry	I	1 12 0	0 13 3	2 4 0	1 1 2
	II	1 8 0	0 10 5	2 0 0	0 14 1
	III	1 4 0	0 9 4	1 8 0	0 11 3
Garden		16 0 0	6 10 0	14 0 0	4 14 4

10. The above proposals involve an increase of Re. 0-3-7 or 30 per cent per acre for dry lands, of Re. 0-3-11 or 8 per cent per acre for wet lands and a decrease of Rs. 1-11-8 or 26 per cent per acre for garden lands. The net result is an increase of Rs 32,288 or 23·4 per cent over the collections under the existing rate.

11. The Deputy Commissioner accepts the proposals, but the Revenue Commissioner considers that the increase of 30 per cent in the dry rates is too high and that the garden maximum also should be reduced from Rs. 14 to Rs. 12. It is urged that the proposed percentage increase of 30 in the average dry rates is higher than that hitherto sanctioned in the case of any other taluk except Tumkur, and the absolute increase of Re. 0-3-7 higher than Bangalore which has peculiar advantage of its own. The resettlement report however shows that the original rates were deliberately fixed very low chiefly on the consideration that there were large tracts of arable waste then. The extent of waste land since then has been considerably reduced by the rapid expansion of cultivation as already noted in para 7 *supra*. In the opinion of Government, a comparison between the old and the new rates does not appear to be a satisfactory criterion by which to judge the suitability of the rates. A more satisfactory test would be to see whether with reference to the present agricultural and economic conditions of the taluk, the rates are fair and reasonable, and how they compare with rates sanctioned in the neighbouring taluks and other taluks recently settled. Judged by these standards, there is ample justification for the proposed rates. The rainfall is good, and the soil, much of which is

of first class quality, is also of great variety admitting of the cultivation of valuable dry crops including wheat and the highly remunerative Bengal gram and coriander crops. Government have provided improved irrigation facilities at great cost. Many villages are within easy reach of the Railway which runs through the heart of the taluk, and road communications are also good. The taluk suffered the minimum extent of loss (8 per cent) during the great famine, while in the neighbouring taluk of Hosdurga which is the only taluk where the maximum rate (Rs. 2) was lower, it was as great as 40 per cent. In every respect the taluk is in a much more advantageous position than the Gudibanda Sub Taluk in which Government have recently sanctioned a much higher rate, *viz.* Rs. 2-10-0 per acre. The maximum is lower than what Government sanctioned for the adjacent taluks of Shimoga, Channagiri and Chikmagalur and what is proposed for the neighbouring taluk of Kadur. Under these circumstances, Government do not consider it necessary to reduce the dry rates proposed by the Superintendent, Revenue Survey. The garden rate too is fair and needs no reduction, as apart from the very large expansion of 85 per cent or 2,000 acres in the Bagayet area, the gardens in this taluk are far superior to those of the adjacent taluks and the taluks of Belur and Shikarpur with which the Revenue Commissioner compares it and in fixing the maximum at Rs. 14, the assessment in no individual case will be enhanced. Besides, the average garden rate has been cut down by Rs. 1-11-8 per acre. The rates are also in consonance with the rules of 1902. As regards the wet rates proposed, there is no question raised and Government consider them fair and reasonable.

12. Government are accordingly pleased to sanction the rates proposed by the Superintendent of Revenue Survey and Settlements in Mysore. The revised rates will be announced as soon as possible and brought into effect from the year 1917-18 with the usual guarantee of thirty years.

B. RAMASWAMAIYA,
Offg. Secy. to Govt., Rev. Dept.

To—The Superintendent of Revenue Survey and Settlements in Mysore.
The Revenue Commissioner in Mysore.
The Comptroller, Mysore Government.
The Secretary to Government, Public Works Department.
The Director of Agriculture in Mysore.
The Deputy Commissioner, Kadur District.
The Deputy Commissioners of other Districts.
PRESS TABLE.

Encl.—G. W. B.

No. R. 11457-69—L. S. 25-16-9, dated 21st May 1917.

Accompaniment I.

Letter No. 80, from D. K. Darashah, Esq., B.A., Superintendent of Revenue Survey and Settlements in Mysore, to L. Krishna Rao, Esquire, Officiating Secretary to the Government of His Highness the Maharaja of Mysore, Revenue Department.

I have the honor to submit herewith in advance for the consideration of Government six copies of my report (with six copies of the illustrative map) containing proposals for the revision of assessment of 284 Government villages of the late Tarikere Taluk of the Kadur District.

2. I have as usual sent copies of the same to the Revenue Commissioner and the Deputy Commissioner for their opinion, and I shall on receipt of their replies submit the same to Government with such remarks as may be called for.

Enclosure I.

Letter from D. K. Darashah, Esq., B.A., Superintendent of Revenue Survey and Settlements in Mysore, to L. Krishna Rao, Esq., Officiating Secretary to the Government of His Highness the Maharaja of Mysore, Revenue Department.

I have the honor to submit proposals for the revision of assessment in the Tarikere Taluk as it stood at the original settlement sanctioned in Government Order No. 11508—Rev. 329, dated 13th February 1877.

2. *Constitution.*—There were 311 villages in the taluk at the time of the original settlement, with an area of 505 square miles, but subsequent to the settlement 43 villages were absorbed in adjoining villages, 15 villages were newly formed out of Kavals, and one Inam village reverted to Government by resumption; so that against a decrease of 43 villages by absorption, 16 villages were added. The net result is that there are 284 Government villages with a total area of nearly 532 square miles. These are at present included in three different taluks as detailed below:—

1.	Tarikere	211	villages.
2.	Kadur	40	„
3.	Channagiri	33	„

3 *Re-survey*—Ample facilities were afforded during Re-survey for the sub-division of inconveniently large survey numbers, and the result was that 4,816 new numbers were formed, bringing up the total number from 18,335 to 23,151 fields. The total area of the 284 Government villages as per Re-survey is 3,40,235 acres as against 3,38,099 acres of the original survey. The increase of 2,136 acres in the total area is due chiefly to the rectification of errors detected in the old measurements and calculations. The difference amounts only to ·63 per cent, which is practically negligible where such a large area is concerned. The following table shows the details of area under the different classes of land:—

Description of land	Former Survey acres	Acres according to re-survey	Difference + or—
Arable dry crop land	1,48,873	1,46,982	—1,891
Rice or wet land	10,104	9,918	— 186
Garden land	2,591	4,451	+1,860
Unarable land	1,76,531	1,78,884	+2,353
Total ...	3,38,099	3,40,235	+2,136

There is thus a very appreciable expansion of garden cultivation by nearly 72 per cent, since the original settlement. The contraction in the dry and the wet areas is due partly to increase in garden cultivation, and partly to land having been transferred to the head "unculturable" on account of roads newly formed, fresh village sites, margins cut out under tank bunds, and such other public purposes.

4. *Re-classification.*— Re-classification was confined to the revision of the water class in wet and garden lands, keeping up the original soil value. Only such of the cultivable lands as were newly formed out of old *Kharab* numbers for purposes of cultivation were classified as to soil.

No. R. 11457-69—L. S. 25-16-9, dated 21st May 1917.

5. *Position.*—The taluk is irregular in shape, and is situated on the borders of the Shimoga and Chitaldrug Districts. It is bounded on the north and north-west by Channagiri and Shimoga Taluks, on the east by Hosdurga, on the south by Chikmagalur and Kadur Taluks, and on the west by the late Lakkavalli Taluk.

6. *Physical features.*—The southern and western portions bordering upon Chikmagalur and Lakkavalli, partake of the nature of semi-malnad country; the rest of the taluk is an extensive plain, with here and there an isolated hill to break the monotony. There is a long range of low hills along the west border, becoming high and steep in the south-west, where the Kallattigiri peak of the famous Baba Budan Hills rises to a height of 6,155 feet. This western range is comparatively bare of vegetation except on a section at the north end which lies in the Ubrani magni, where some good forest is to be seen. The Baba Budans in the south are covered with thick evergreen forests to within a few hundred feet of the summit, affording valuable shelter to the numerous coffee plantations which have sprung up there. The rest of the taluk, the centre and the east, present an undulating surface, where the valleys are wide and deep, and lend themselves particularly well to high class cultivation. The prosperous Bukkambudi valley is an example of this, but one of the most agreeable sights one may see is to be had from about the 4th milestone from Tarikere on the road coming from Ajjampur, where a very wide sweep of intensive cultivation, for the most part perennial garden interrupted here and there by rice and sugar-cane fields, is presented to the eye in a horseshoe-shaped valley, a portion of which is known as the Tarikere valley.

7. *Drainage.*—The Kallathi Tirthahalla and the Kushi, locally known as the Rangapurhalla, two of the tributaries of the Bhadra river, drain the western portion of the taluk comprised in the hoblis of Tarikere, Amrutapur and Lingadahalli, while the rest of the tract is drained by the Bukkambudhi halla, which, together with another stream coming from Ajjampur, flows in a south-easterly direction, and falls into the river Vedavati in the Kadur Taluk.

8. *Climate and rainfall.*—The climate in the western half of the taluk is more temperate than that of the eastern portion, where the summer is hotter and the winter colder. This is particularly true of the villages included in the Hirenallur hobli. The central region is free from extremes, and enjoys a reputation for exceptionally good climate. Though no part of the taluk is entirely free from vicissitudes of rainfall, the central and western portions compare favourably with the villages along the east, where a year of partial failure intervenes a little more frequently. Rain gauges have been maintained at Tarikere, Ajjampur and Shivani, and latterly also at Lingadahalli. The average quantities gauged at the different stations as recorded in the latest report of the Government Meteorological Department are shown below:—

Tarikere	...	31·47 inches	...	(43 years' average),
Ajjampur	...	25·56 ,,	...	(18 years' average),
Shivani	...	23·46 ,,	...	,,
Lingadahalli	...	30·66 ,,	...	(4 years' average),

the average fall at Tarikere, Ajjampur and Shivani for the last twenty years being 35·45, 25·26, and 23 inches respectively. Thus the heaviest fall is recorded in the extreme west. It becomes moderate and more seasonable in the central portion, and somewhat precarious in a strip along the eastern border which adjoins the Hosdurga Taluk.

9. *Soils.*—There is a great variety of soils in this taluk ranging from the poorest red and sandy to the best black around Shivani and Ajjampur, with all the intermediate grades. Coarse soil as well as loam are to be found on the east side, while towards the centre, good black or brown soils are abundant. In the south and the south-east, light red soil comes much into evidence. A phenomenon often noticed in the case of valleys in the centre is that the bottom and the lower slopes have a thick covering of black soil, which passes into brown higher up, whilst the uplands are capped with considerably inferior soil. This of course must be attributed to the finer elements being continually washed down from the higher levels. A few saline soils are met with in the taluk, but they are by no means as common as they are in the taluks situated more to the east.

10. *Crops.*—The centre and the east of this taluk are essentially dry crop tracts. Ragi, jola, Bengal gram and horse gram are the chief products in dry soils, but the cultivation of coriander has for some years past proved so easy and remunerative, that it has to a considerable degree supplanted most of the other dry crops, inclusive of cotton. Many raiyats now grow just so much of ragi and jolam as will supply their wants in grain and fodder, and use the rest of their dry fields for the more remunerative coriander or Bengal gram. Coriander requires but a small quantity of water, hence the east of the taluk where the rainfall is moderate and the soils are largely of the higher order, lends itself remarkably well to that class of cultivation. Other considerations in favour of coriander are that it requires no weeding operations, and will not be touched by cattle. But the crop rapidly exhausts the soil,

whereas Bengal gram actually leaves nourishment in the soil to help the following year's crop. It may be said on the whole that the cultivation in the dark soils to the east of the railway line is about equally divided between coriander and Bengal gram. Ground nut, another very paying variety, has begun to attract the raiyats' attention. Avare, togari, save, sajjee, navane, castor, gingelly, chilly and tobacco are grown in quantities comparatively much smaller. The existence of cocoanut gardens on dry land well situated with reference to surrounding country, is another result of tendencies now forming among the more thoughtful of the agriculturists. Once the initial period of rearing cocoanut plants is tided over successfully, the cultivator may reasonably expect from the seventh year forwards, ample reward for his patience, an acre of 40 trees rarely bringing in less than Rs. 150 per year for 50 or 60 years. The annual expense on a garden that has begun to yield fruit never exceeds 10 per cent of the gross income. Remarks of much the same character apply to the graft mango gardens of which there are many more now than there were at the original settlement. Superior rice and sugar-cane are grown in parts of Tarikere, Lingadahalli, Amrutapur and Shivani hoblis. It is not usual to take a second crop of rice in the same year, though in some places adequate water facilities are not lacking. In parts of Tarikere hobli bordering upon Shimoga and Lakkavalli, terraces of paddy fields may be seen producing excellent rice, though dependent chiefly upon the falling rains. Wheat is cultivated in some of the superior soils in the central portion of the taluk. Good supari gardens exist in the Bukkambudhi valley and in the vicinity of Tarikere. Betel leaves of a very fine quality are grown around Tarikere; the leaves of Machenahalli are said to be among the best produced in the State, and are much in demand at the bazaars at Chikmagalur, Kadur, Shimoga and Birur. Numerous supari and cocoanut gardens are found all over the taluk, and all available space with any pretence to sub-soil moisture is utilised for this purpose. It is considered even more profitable to plant cocoanut in wet lands, than to grow rice or sugar-cane. Dry cocoanut gardens are, as has already been indicated, found to a large extent in the central and eastern portions of the taluk, especially in the Hirenallur hobli. Chiller bagayet, consisting of various kinds of vegetables, may be seen along the banks of the Bukkambudhi kodihalla, irrigated by small wells in the bed of the stream, and worked by *yatams*.

The supari trees here are not subject to the devastation caused by *Koleroga* as in the Malnad; but two diseases called the *anabe* and the *hedegalmundi* give some trouble. The *anabe* is where a gummy pale-red juice exudes from near the root, and the tree falls within a few days; and in the *hedagalmundi*, the crown of the tree begins to contract in size, leaving in a few days a dead stump standing. It has been calculated that in the Bukkambudi valley which contains over a lakh of trees, 3,000 trees or about 3 per cent, died of one or other of the two diseases in a year in which the havoc was considered by the raiyats to have been noteworthy.

The following is the percentage distribution of crops in this taluk:—

1	Ragi	30·26
2	Condiments	15·87
3	Other cereals	10·10
4	Jola	10·02
5	Horse gram	8·80
6	Rice	7·14
7	Miscellaneous crop—	
	Food	5·90
	Non-food	0·46
8	Coffee	4·70
9	Oil-seeds	3·68
10	Garden produce	2·09
11	Cotton	·50
12	Wheat	·24
13	Sugar-cane	·20
14	Tobacco	·01
		100·00

There are in all 18 Coffee Estates in the Lingadahalli hobli, 11 of which are owned by Anglo-Indians, and the remaining seven by Indians. They are all situated on the slopes of the Baba Budan range bordering upon the Chikmagalur Taluk. Almost all these plantations are held on permanent tenure, and are in a flourishing condition. The total area at present planted with coffee is 6,759 acres as against 2,200 acres at the time of the original settlement; the areas under coffee in 1891 and 1901 were 6,856 and 7,122 acres respectively.

11. *Water-supply.*—Of the five anicuts constructed across streams in the taluk, two only are of importance, *viz.*, those on the Kalhatti Tirthahalla and the Rangapurahalla, which irrigate a large extent of rice lands. The former is situated in the Lingadahalli hobli, the

latter is within two miles of Tarikere. A project estimated to cost over 80,000 rupees is being worked out, by which the Kallahalu anicut is being improved, and channels are being formed for the conveyance of water for increase of storage in the large tank of Ramanayakanakere, and in six others in the neighbourhood of Tarikere. This scheme serves the interest of the wet and garden lands in Dwaranalu, Hosahalli, Galahalli, Dyamapura, Channapura, Attiganahalu, Tarikere, Chikkatoor, Sitapura, Machenhalli and Sivagange villages. It will also allow of a pipe-water service in the town of Tarikere.

There are 249 tanks in the taluk, of which 29 are classed as major, and 220 as minor. Twenty two major tanks and 32 minor tanks have been restored, and are at present in good condition. The other tanks have yet to be looked to. The following are some of the important tanks with *atchkats* assessed at over Rs. 1,000 each, and restored during the currency of the original statement:—

No.	Village	Name of tank	Atchkat
			Rs.
1	Bukkambudi	Doddakere	4,064
2	Tarikere	Doddakere	1,900
3	Doranalu	Sunnadallykere	1,846
4	Belibasavanhalli	Heroyattinakere	1,706
5	Shivani	Doddakere	1,055
6	Machenahalli	Dalavaykere	1,036
7	Chikapura	Uramundinakere	1,033

The tank at Bukkambudi is, as the name signifies, the biggest in this taluk, irrigating a large extent of fine supari gardens and rice fields. When it fills, the water suffices for two consecutive years.

There are in all 1,648 wells in the taluk, of which 1,018 are used for irrigation. Numerous temporary wells may be seen on the banks of the *Bukkambudi* kodihalla, which irrigate a large extent of *Dhruvapairu* and vegetable gardens along its course. The irrigation wells are mostly of the *Yatam* class and unriveted; it is said that only about 10 per cent of them are riveted. The expensive *kapile* well is rarely met with, and there is not a single instance of a raiyat having taken a *takavi* loan from Government for constructing a well; this I think would not have been the case, had the agricultural classes been in a depressed condition, or had the climate, the physical characteristics of the country, and the facilities for superficial irrigation, not been as favourable as they actually are.

12. *Communications.*—In point of communications, this taluk is most advantageously situated. The Poona section of the Madras and S. M. Railway has its main line running south to north *via* Ajjampur and Shivani and the branch line from Birur to Shimoga traverses the very heart of the Taluk, so that the villages are very generally within easy distance of one or other of the railway stations, of which there are four within the taluk. The following high roads were in existence at the time of the original settlement:—

1. The Bangalore-Shimoga road,
2. The Tarikere-Koppa road,
3. The Tarikere-Chikmagalur road *via* Santaveri,
4. The Tarikere-Hosdurga road, and
5. The Ajjampur-Birur road.

The communications mentioned below were made after the settlement:—

1. The Lingadahalli-Birur road,
2. The Lingadahalli-Chikmagalur road tapping almost all the coffee estates on the Kallathigiri Range,
3. The Birur-Anthargatte road (still in progress),
4. The road from the Shivani Railway Station to Bukkambudi *via* Shivani and lastly,
5. The recently constructed light tramway between Tarikere and Narasimharajapura which has already proved of much use to the people.

In addition to these, there are numerous inter-village tracks available for wheeled traffic in fair weather, and the village improvement committees are keeping themselves fairly busy in improving them. With the marginally noted four railway stations within the limits of the taluk, and a station at Birur, which is an important trading centre, situated very near the border of the taluk, together with so many made roads and

1. Shivani.
2. Ajjampur.
3. Shivapur.
4. Tarikere.

cart-tracks running in all directions, the trade conditions have vastly improved since the time of the original settlement. The raiyats find a ready market for all the surplus produce they grow. They are now free to sell it to the best advantage, without middle-men to share profits with.

A very long and keenly felt want in the matter of communications is a road connecting Ajjampur, Bukkambudi and Channagiri. About 7 miles of such a road would fall within the Kadur District, and the remainder in the Shimoga District. The proposal is an old one, not yet sanctioned because of difficulties in initial outlay and in maintenance. At any rate, it is quite certain that in the wet season particularly, the villages concerned, of which there are no less than 40 in the Tarikere Taluk alone, are badly off for want of a road facilitating ingress and egress. Trade, health and comfort are being sacrificed to a serious extent year after year. Nowhere have I yet met raiyats who argue so feelingly for a road. They promise contributions, and agree to a special fund of an anna per rupee of *kandaya* being collected, and to the establishment of toll-gates at convenient points, if Government could see their way to do the rest for them.

13. *Markets.*—Weekly markets are held in the seven villages noted in the margin, all within the taluk. The transactions at the Tarikere mart average Rs. 4,000 a week, the others are of less importance, the business amounting to from Rs. 200 to Rs. 500. The markets at Birur and Yagati, though situated outside the taluk, play an important part in the disposal of the surplus produce of the Tarikere Taluk. An annual fair is held at Anthargante during a car festival in the month of February; eight to ten thousand people congregate at the place, and transactions to the extent of about ten thousand rupees are said to take place.

1. Tarikere.
2. Sollapur.
3. Ajjampur.
4. Shivani,
5. Santaveri,
6. Bukkambudi,
7. Duravigere,

14. *Exports and imports.*—The principal articles of export are cocoanut, supari, ragi, jola, coriander, cotton and coffee. Cocoanuts are exported chiefly to Bombay, and supari and betel leaves to Shimoga and Birur. Ragi, jola, horse gram and Bengal gram are exported in considerable quantities to Koppa side, and new tramway will prove a very useful institution to the raiyats for that reason. The articles imported are, piece goods, ironware, salt, kerosene oil and sugar.

15. *Manufactures.*—There are no manufactures of any note in this taluk. The smelting of iron ore in some of the villages of the Lingadahalli hobli is now abandoned owing to the cheap ironware imported from Madras and Bombay. Gold mining attempted near Ajjampur and Bukkambudi has failed, as the quartz was not available in sufficiently large quantity. There are 244 cotton and 216 wool looms in the taluk, and 35 sugar-cane and 8 oil-mills. Timber sawing, cart-making, rope and country shoe making are also among the minor industries carried on. An enterprising gentleman has opened a place for the manufacture of harmoniums which are reported to be in demand at Bangalore and other centres.

16. *Population.*—The following table shows the population of the 284 Government villages under report, at the decennial census operations since 1871; the density per square mile according to these accounts which are the most reliable we have, were 156 in 1911, as against 135 at the time of the original settlement.

	YEAR.				POPULATION.

,,	1901	...	...	...	91,327
,,	1911	...	...	...	83,118

Thus 6,398 persons, or slightly over 8 per cent of the population, were lost during the great famine of 1878, but the recuperative powers of the taluk are so great that the loss was more than made good during the next decade, when an increase of 2,595 persons or nearly 3·3 per cent over the population of 1871 occurred. There was a still further rise in 1901 of 9,945 persons or 12·2 per cent, but the major portion of this increase appears to be due to a large percentage of floating population working on the Birur-Shimoga railway line. The apparent decrease in 1911, when the railway operations had closed, of 8,209 persons or nearly 9 per cent, may be attributed largely to this cause, though the effects of the inroads of plague during the decade and the attraction of the manganese mines in Shimoga Taluk to labourers, may no doubt claim to have had a share in the results of the census in 1911. Yet another reason lies in the decrease in the area under coffee during 1911, by over 5 per cent of that of 1901, which must have caused a diminution in the floating population on the estates, for, as is well known, the coffee estate coolies come chiefly from places on the west coast. The density of population in 1911 on every square mile of cultivable area works out to 330, while that on the actually cultivated area becomes 390.

No. R. 11457-69—L. S. 25-16-9, DATED 21ST MAY 1917.

17. *Agricultural resources.*—The following statement shows the present condition of the taluk as compared with what it was at the time of the original settlement.

Items	At original settlement	As per Re-survey	Increase or decrease	Per cent
1. HOUSES.				
1. Tiled	3,024	8,690	+ 5,666	+187
2. Mudroofed	232	787	+ 555	+239
3. Thatched	12,456	12,020	— 436	— 4
Total ...	15,712	21,497	+ 5,785	+ 37
2. CATTLE.				
1. Horned	91,394	87,879	— 3,515	— 4
2. Sheep and goats	22,658	36,325	+13,667	+ 60
Total ...	1,14,052	1,24,204	+10,152	+ 9
3. Ploughs	10,828	13,138	+ 2,310	+ 21
4. Carts	2,262	4,669	+ 2,407	+106

It will observed that there has been a decided improvement under almost all the heads, the percentage of increase under carts, sheep and goats, houses and ploughs being 106, 60, 37 and 21 respectively. There is fall of 4 per cent in the number of horned cattle, and this I think is due to the fact of the elimination of the weak, the diseased and the useless among the cattle, which in bygone times could subsist upon the free pastures which were far more ample then than they are now.

18. *Cattle.*—The cattle are of a fairly strong and large make in the northern and the eastern parts of the taluk, while those in the western maganis, where the rainfall is heavy, are naturally of a stunted growth. Breeding-bulls are maintained at important centres, but it would be well to arrange to give better help to the raiyats in the matter of cattle breeding, by increasing the number of these bulls. There is a fairly plentiful supply of fodder in the western half of the taluk, while in the eastern half and especially in the Hirenellur hobli, scarcity of fodder is pretty frequently felt, when a monsoon has not been favourable. It is high time the raiyats in these parts took to raising more of fodder crops than they actually do so that a store sufficient for about two years may always be on hand as a safeguard against risks. Lack of grazing in these eastern villages is a serious grievance, and portions of Amrut Mahal Kavals may, where they are conveniently transferable, be made over to the raiyats with great advantage to the tract concerned. Lack of fuel has also been a crying want for many years in these villages.

19. *Modes of husbandry.*—No marked change is observed anywhere, in the mode of husbandry followed. The old pattern ploughs are used everywhere, and no labour saving machinery or implements of an improved kind have been introduced to any appreciable extent excepting bullock-worked sugar-cane mills which have become popular, and are commonly used in all the sugar-cane tracts. In parts of the Shivani and Ajjanpur hoblis, stone rollers are used for threshing the jola, as a substitute for the old practice of getting the ears trodden by bullocks. In all other respects, the old methods of agriculture still prevail.

20. *Tenure.*—The bulk of the agricultural population consists of Lingayets and Vokkaligars who hold land direct from Government. Subletting is rarely resorted to; where there is any, the *samakor* or *whram* tenure prevails, one-half of the produce going to the cultivator, and the other half to to the owner of the land. The *muggupe* also obtains when valuable crops like sugar-cane, involving considerable labour are cultivated. Under this tenure, one-third of the produce is taken by the owner of the land and two-thirds by the cultivator. The land assessment is in all cases paid by the owner himself.

21. *Value of land.*—Statistics of sales and mortgages of land in the tract under report, compiled from the books mantained in the Registration Department, were examined by me, and the following is an abstract showing the total number of transactions examined, the amount concerned, and the ratio, the sale or mortgage money bears to the survey assessment.

No. R. 11457-69—L. S. 25-16-9, DATED 21ST MAY 1917.

	Number of transactions	Amount fetched	Total survey assessment	Ratio
Sales	1,219	1,95,095	8,091	21 times the assessment.
Mortgages	327	73,361	3,159	23 do

There has undoubtedly been a steady rise in the value of land, on the whole, nearly commensurate with the rise in the prices of food grains. It is a matter of common repute that high grade garden land reaches at times so high a price as Rs. 3,000 an acre in Tarikere. The price of wet land varies from Rs. 25 to Rs. 350 per acre and that of dry land from Rs. 10 to Rs. 200.

22. *Prices.*—In the annexed table are given the quinquennial averages of the prices of the more important of the articles of agricultural produce. The quotations for the fifteen years 1886-1900 relate to the whole of the Kadur District, the Amildar having been unable to furnish any for the Tarikere Taluk individually; those given for the year 1901 onwards are for the taluk itself.

(Figures are not available for columns left blank.)

The course of prices is made clear by these figures; it will be seen that all the more important of the articles have gone up by considerably more than 100 per cent since the old settlement came into force Small fluctuations there always have been, but the general tendency in recent years is for prices to maintain the elevations reached. The problems relating to prices are highly controversial, and are discussed at great length in the report recently presented to the Government of India by the committee appointed to look into the matter, and in the Government of India Resolution thereon. Any disquisition of the kind is, however, not relevant in a Revenue settlement report; the fact of the great advance in prices is all we need take account of, as bearing on the question of profits accruing to the cultivator. Further, there cannot be any reasonable apprehension as to the prices of agricultural produce running back to old levels; so much has the country advanced in the matter of communications and of intercourse with India beyond the Mysore State, that alterations in prices there, are finding a ready response in all parts of Mysore. It is hardly an exaggeration to say that we are no longer competing with our local markets, and that we are competing practically with the markets of the whole world.

23. *Labour and wages*.—The railway, the tramway, the high roads and other public works, and the activities in the coffee plantations have produced in recent years a considerable demand for labour. Skilled labourers are paid from 8 annas to one rupee per day, while unskilled labour is paid for at 5 annas a day, and women and children from 2½ to 3 annas each. The annual agricultural labourers or *gitadalus* are paid from Rs. 1½ to Rs. 3 a month in addition to food and clothes. The food costs about Rs. 50 per annum, and the clothing which consists of a kambly, a coat, a pair of pancheys, a turband and a pair of sandals for foot wear, costs in all about 10 rupees.

24. *Education and schools*.—There are in the taluk, 5,124 literate persons or 6·16 per cent of the population, comparing with 6·25, the percentage for the Mysore State as a whole. Much attention is of late being paid to the spread of primary education among the masses. There are in all 6 secondary and 18 primary schools in the taluk, the total number of pupils being 1,626; the cost incurred from various funds during 1913-14 is reported to be Rs. 6,418.

25. *General condition of the people*.—According to the latest census, 79 per cent of the population depends upon agriculture for livelihood, and only 7·6 per cent upon industries. The rise in prices certainly brings more money to the agricultural classes than they could have possibly earned a generation back; at the same time, the advance in prices for the articles they have to purchase, coupled with the undoubted fact of their having adopted an improved style of living, compels them to spend more than they used to before. The raiyats are no longer content to dwell in houses of the old pattern, more attention is paid to ventilation in building new houses or in improving old ones, and earthen pots and coarse clothing are being gradually replaced by brass vessels and finer fabrics for wear. In short, the wants of the rural population are increasing year by year, with the consequence that a correspondingly strong incentive to earn more money is manifesting itself. It is my belief that the people are on the whole, more prosperous and in easier circumstances than they were thirty years ago. The fact that not a single raiyat in the whole taluk has applied for a takavi loan for constructing an irrigation well, is a striking indication of the material prosperity of the tract.

26. *Revenue history*.—It was shown in para 2 above that the villages comprised in the late Tarikere Taluk are shared at the present time between three taluks thus:—

The present Tarikere Taluk		211 villages
,,	Kadur ,,	40 ,,
,,	Channagiri ,,	33 ,,

The first group of the villages forms the bulk of the late Tarikere Taluk, for which details of revenue collections are furnished by the Amildar without interruption, commencing with 1878 the year of the settlement. Appendix A which relates to this group shows that steady progress has been made in cultivation as in revenue collections, excepting for a set-back in the period between 1903-04 and 1907-08. It is highly gratifying to note that this portion of the taluk was not affected adversely by the Great Famine of 1878, which is more than can be said of such a large tract on almost any other side of the maidan portion of the State. The interruption in the years 1904-08 is ascribed by the Amildar to the loss of life and general confusion that followed the advent of the Plague. The following quinquennial abstract of Appendix A gives a clear idea in a shorter form, of the evolution of agriculture in the 211 villages which form the great bulk of the taluk under report. The figures bespeak very good conditions on the whole.

Separate figures are not available for columns left blank.

No. R. 11457-69—L. S. 25-16-9, DATED 21ST MAY 1917.

Regarding the second group of the 40 villages now in the Kadur Taluk, the Amildar has been unable to furnish the figures for the years prior to 1897-98 (*vide* Appendix A1); thus, no definite statement can be made regarding the effect of the Great Famine in this region. I annex a statement below which gives the figures for every five years commencing with the first year for which information is available. Here too the totals prove steady expansion in cultivation, though one could wish that details under the three heads of cultivation, dry, wet and bagayet could also have been forthcoming.

Period	Government occupied land								Remission

1913-14	18,677	+11	..	...	...	...	...	...	3,894	2,073	—21

There was a trifling remission of Rs. 55-12-0 in 1910-11 on account of the breach of the Hirenellur tank, when a moiety of the wet assessment was remitted under the rules.

Remarks of much the same nature have to be made in the case of the 3rd group of villages (33 villages in the Channagiri Taluk), of which the collection figures are available

only from the year 1884-85. The following quinquennial abstract shows at a glance the progress of cultivation and revenue there:—

Period	Government occupied land								
	Dry		Wet		Garden		Total

The trifling remission of Rs. 19 is on account of the breach of the Duravikere tank in 1908-09.

No. R. 11457-69—L. S. 25-16-9, DATED 21ST MAY 1917.

Full details are not to be had in the Taluk offices regarding the coercive steps taken since 1878-79 for the collection of revenue not tendered in time. A statement for twelve years only, 1902 to 1914, has been furnished, from which it is to be seen that there was an annual average of 68 cases in the whole of the taluk of land put up to auction for the realisation of Rs. 1,249 or 0·9 per cent of an average demand of Rs. 1,39,818. The Amildars have not been able to assign any particular cause for this, such as burdensomeness of assessment; and indeed, the proportion of land thrown up is very small, remissions on account of the inability that would follow heavy assessments are entirely absent, and lightly assessed waste land has generally been at hand to those who wished for an exchange. It would scarcely stand to reason under the circumstances to draw any inference derogatory to the standard employed in fixing the assessments at the original survey.

27. *Grouping.*—I have so far endeavoured to explain all the circumstances of the taluk that are relevant to the main purpose of this report, namely, the deciding about the assessments to be levied in the future. The first step we have now to take is to consider whether the groups into which the villages had been disposed at the old settlement stand in any need of recasting. The original grouping appears to have been arranged after a careful consideration of the climatic conditions prevailing in the different parts of the taluk as also of communications, proximity to markets and other economic factors. Bearing the principle in mind that the established grouping should not be altered except for very weighty reasons, the only factor of importance sufficient to justify an alteration in the grouping in the case of Tarikere Taluk is perhaps the Railway which was constructed after the original settlement took place. It so happens, however, that the Railway passes for the most part through villages of the old first-group itself, which of course can be raised no higher; and as the advantages enjoyed by the villages in the other group relatively among themselves, cannot be said to have undergone any material change, there is no good reason for disturbing the original grouping anywhere. It is true some of the villages of the second group, coloured yellow in the accompanying map, are considerably benefited by the Poona section of the Southern Mahratta Railway line, but the climatic conditions prevailing there, do not admit of their being placed in the first group; the result of such a step, if taken, would be to make the weight of an enhancement on these villages doubly heavy, for, the transfer to a higher group would itself mean the application of higher maxima, and as these maxima are themselves to be enhanced under the revision proposals, the effect would be to place a doubly heavy weight on such villages. The 284 Government villages now under discussion will therefore be retained in three groups as before:—

Group I.—134 villages in the central portion of the taluk, colored pink in the accompanying map.

Group II.—114 villages colored yellow in the extreme east and west.

Group III.—36 villages colored blue, and situated in the extreme south-west near the slopes of the Kallahathi hills.

28. *Maximum rates.*—The different maximum rates fixed at the original settlement were as follows:—

Groups	Dry			Rice			Garden		
	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
I Group	1	12	0	6	8	0	16	0	0
II Group	1	8	0	6	0	0	16	0	0
III Group	1	4	0	5	0	0	16	0	0

A reference to the original settlement report discloses the facts that the rates had for certain reasons been deliberately fixed low. I cannot do better than quote the opinions of the officers who were consulted at the time. The Deputy Commissioner wrote:—

"The maximum of rice lands is made lower than that fixed for Channagiri, to "which taluk Tarikere is not inferior in the natural and artificial advantages it possesses "of climate, and facilities for transport or sale. In the same manner the maximum "dry crop rates fixed for this taluk are lower than those fixed for Shimoga and Channa-"giri."

The Commissioner of the Nagar Division stated in paras 6 and 7 of his letter:—

"The maximum for 1st class villages in Tarikere is equal to that for the 2nd class "villages in the Channagiri Taluk and is less than that for 2nd class villages in the Shimoga "Taluk. I am inclined to think that the villages in the centre of the Tarikere Taluk, "particularly those around Ajjampur, might compete at least with those of the 2nd class,

"(maximum dry rate 2-0-0) south of Honnali in the Shimoga Taluk, if not with those of the "1st class bordering on Honnali (maximum dry rate 2-4-0)."

The Superintendent of Revenue Survey wrote in para 3 of his final report:—

"The determination of the maximum rates of assessment for the Tarikere Taluk, now "under consideration, rested in a great measure on the rates already adopted in Channagiri, "Hosdurga and Shimoga, but chiefly the two last, already settled, but the circumstances of "a taluk, as in the present case, are sometimes such, as to suggest a slight deviation from "the strict rule of comparative assessment. The large extent of arable waste in the taluk "under report renders it in my opinion advisable, as duly explained in my report, to stop "somewhat short of the extreme limit of assessment, which might perhaps be considered "justifiable. I should not have hesitated under certain circumstances, to go a little higher "than I have done in both dry crop and rice, but I should regret to have to do so with so "large a proportion of arable waste. With arable unoccupied land bearing assessment of "Rs. 44,100, I am unwilling to advocate the adoption of rates higher than those proposed in "my original report."

The Settlement Commissioner wrote in para 17 of his letter to Government:—

"The great area and survey valuation of the waste land, inculcated great caution in the "assessment of the occupied land for which it is possible that we might have proposed "somewhat higher rates, but I do not feel that this could have been done without some risk "of interfering with the absorption of the waste into the occupied area."

These quotations are taken from pages 35, 33 and 3 of volume eight of Select Records.

It is clear that the rates adopted at the original settlement were deliberately kept low in consideration of the large extent of assessed lands lying waste, and that consideration alone. But time has changed the situation as the statement given below will show:—

Description	Cultivated acres			Waste acres		
	At original settlement	As per Re-survey	Difference to cultivation	At original settlement	As per Re-survey	Difference
Dry ...	88,024	1,23,230	+35,206	65,722	21,687	—44,035
Wet ...	6,544	8,785	+ 2,241	1,991	608	— 1,383
Garden ...	2,341	4,317	+ 1,976	100	74	— 26
Total ...	96,909	1,36,332	+39,423	67,813	*22,369	—45,444

*This has been further reduced to 16,682 acres in 1913-14, the latest year for which accounts have been furnished by the Taluk office (*Vide* Appendix B).

Cultivation has expanded by 40 per cent in dry land alone, by 35 per cent in wet, and by so much as 85 per cent in bagayet. The extent of arable waste is seen to have been reduced by over 67 per cent. There has been a further reduction in the area of assessed waste lands as detailed in the para below. I may point out by the way, that the reason for the area of additional occupancy not closely corresponding with the area diminished under the head of assessed waste, is that some of the latter has been changed to "Kharab" on account of the non-agricultural uses it has been taken up for as described in para 3 above.

The next table I give shows the revision rates that have recently been sanctioned by Government in some of the taluks adjoining the Tarikere Taluk.

Taluk	1st Group			2nd Group			3rd Group		
	Dry	Rice	Garden	Dry	Rice	Garden	Dry	Rice	Garden
1. Hosdurga	2·0	6·8	8·0	1·12	6·8	8·0	1·4	6·8	8·0
2. Channagiri	2·4	8·0	10·0	2·2	8·0	10·0	2·0	8·0	10·0
3. Shimoga	2·10	6 8	12·0	2·4	5·12	12·0	1·6	5·4	12·0

No. R. 11457-69—L. S. 25-16-9, DATED 21ST MAY 1917.

In climatic conditions, Tarikere is undoubtedly superior to Hosdurga, where the average rainfall is only 22·78 inches for the past 43 years, as against 31·47 for the same period at Tarikere. In point of Railways and other communications and general situation in the State, and in fact from every other important point of view, Tarikere is decidedly better off than Hosdurga, better off than even Channagiri, as was observed by the late Deputy Commissioner, Mr. P. Krishna Rao, whose words I have quoted above.

I have consequently no hesitation in proposing the maximum rates noted in the table given below for the Tarikere Taluk; the old rates are also shown side by side with them.

Groups	Old maximum rates									Revision maximum rates								
	Dry			Wet			Garden			Dry			Wet			Garden		
	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
I Group	1	12	0	6	8	0	16	0	0	2	4	0	7	0	0	14	0	0
II Group	1	8	0	6	0	0	16	0	0	2	0	0	6	8	0	14	0	0
III Group	1	4	0	5	0	0	16	0	0	1	8	0	5	8	0	11	0	0

The maximum dry rates proposed are lower than those sanctioned for the adjoining taluks of Shimoga and Channagiri and only 4 annas higher for each group than those adopted for Hosdurga. The rice rates I have proposed, are considerably below those of Channagiri, and slightly higher than those taken for Shimoga and Hosdurga. As the condition of the gardens is more or less the same in all the groups I propose adopting, as before, a uniform rate for all the groups, reducing it from Rs. 16 to Rs. 14. A few words are perhaps called for to explain why I propose 14 rupees for the gardens, while the maximum for the maidan taluks hitherto revised does not exceed Rs. 12. The gardens of the Tarikere Taluk are as a whole distinctly superior to those of the adjoining taluks, a state of things due partly to the soils being comparatively free from ingredients that would hinder productivity, but chiefly to the relatively good rainfall which is well conserved by the geological characteristics of the tract. Hardworked expensive *kapile* wells which are the rule elsewhere are the exception here. The inexpensive *yatam* is resorted to where a garden requires help in dry weather. Tanks receive their supply, in a more regular manner, and the yield and the net profits are commensurately larger. The great majority of the well-stocked gardens of the original survey are now in equally good if not in better condition, and have during the currency of the settlement brought a full measure of profit to the owner. The supari halat was abolished in 1907, with the consequence that the garden owners have been liberated from severely irksome trammels. There is no complaint among the raiyats of the taluk as to any oppressiveness in the garden rates now being paid. Under these circumstances, it is a perfectly good measure to reduce the old maximum to no lower than 14 rupees. I beg to add however, that I have not in a single case raised any lower rate to Rs. 14, in other words, this high rate has been adopted only for gardens which already bear the same or a higher rate, and which moreover are now in an equally good or a better condition.

29. *Effect of Revision.*—By adopting the rates proposed by me, the following results in average rates are obtained:—

Description	On area found occupied according to Revision Survey		Difference	Percentage of increase or decrease
	By former settlement rates	By revised rates		
	Average rates	Average rates		
	Rs. a. p.	Rs. a. p.	Rs. a. p.	
Dry	0 12 0	0 15 7	+0 3 7	+30
Wet	3 1 5	3 5 4	+0 3 11	+ 8
Garden	6 10 0	4 14 4	—1 11 8	—26
Total ...	1 0 2	1 4 0	+0 3 10	+23·7

The increase of Re. 0-3-7 to the *khushki* average must be said to be a substantial one, but it certainly is not unmerited, and cannot prove burdensome. The old average of Re. 0-12-0 in a taluk of which the soils are generally of a high order is, under existing circumstances of population, convenience of markets, communications, etc., all too low, and the revised average which itself falls short of a rupee per acre, should, I think, be cheerfully accepted by the raiyats

No. R. 11457-69—L. S. 25-16-9, DATED 21ST MAY 1917.

The old wet rate also, Rs. 3-1-5, is a really light tax, which could possibly bear much raising. The average in the generality of the maidan taluks hitherto revised, works out to between 4 and 5 rupees. But a sudden raising of the wet rates in Tarikere Taluk to that extent, would be certain to cause much discontent. Whatever the grounds may have been for the great moderateness of the old rates, we can now take account of two facts alone, namely, the fact that the rates *were* low, and the fact that a very sharp enhancement in any case is to be avoided. It must be owned by Settlement officers, besides, that the outcry persistently made in recent years against the pressure of the rates on wet land in unfavourable seasons, has imbued them with a cautiousness akin to timidity. I consider on the whole that an advance of Re 0-3-11 per acre or 8 per cent on the old average would just suit in the case of Tarikere Taluk.

The average garden rate has been cut down by a sum of Rs. 1-11-8. The new average will be Rs. 4-14-4, which proves by the way, that though a maximum of Rs. 14 has been applied, there cannot be any very considerable area assessed at that high rate, or at a rate approximating to that figure. It should be recollected moreover, that an unusually large area of 1,976 acres has accrued to gardens within the past generation, and that new gardens should, at least for a certain length of time, be treated with a leniency that will encourage the employment of capital and energy on intensive cultivation. The next statement I give shows exactly what the burden is going to be on each of the different descriptions of garden land.

No.	Description	Particulars relating to gardens in the taluk inclusive of occupied unoccupied and inam gardens						Increase or decrease
		At original settlement			As per revision settlement accounts			
		Acres	Assessment	Average per acre	Acres	Assessment	Average per acre	
			Rs.	Rs. a. p.		Rs.	Rs. a. p.	Rs. a. p.
I	Tank gardens ...	Separate figures for each kind of garden are not available.			1,985	14,154	7 4 6	...
II	Gardens receiving indirect benefit from tanks, streams, etc.				768	3,826	4 15 8	...
III	(*a*) Gardens under self-dependent wells.				142	305	2 2 4	....
	(*b*) Gardens as in III (*a*) but assessed at simple dry rates owing to the failure of wells.				74	124	1 10 10	....
IV	Old dry cocoanut gardens ...				294	792	2 11 1	...
	Total ..	2,547	16,961	6 6 10	3,263	19,501	5 15 7	—0 7 3
V	New gardens under wells sunk since Original Settlement whether self-dependent or indirectly benefited.	...	...	.....	330	679	2 0 11	.....
VI	New dry cocoanut gardens ...	...	...	.....	839	1,612	1 14 9	.....
	Total ..	2,547	16,961	6 6 10	4,432	21,792	4 14 8	—1 8 2

What the result has been, of applying the rules regulating garden assessment, is clear from these statistics. I think no more comment on the figures is called for. It must be pointed out that the discrepancy between the figures quoted in this statement and the garden averages given in the statement preceding it is due to the fact that the latter takes into account only the occupied gardens in Government land, whereas occupied, unoccupied and inam are all included in the other statement.

No. R. 11457-69—L. S. 25-16-9, DATED 21ST MAY 1917.

30. *Effect on groups.*—How the several groups will be affected by these proposals will appear from the following statement :—

Group	Bab	By former survey according to accounts for 1913-14, the latest year for which accounts have been furnished			By revision survey			Difference
		Acres	Assessment	Average	Acres	Assessment	Average	
1	2	3	4	5	6	7	8	9
			Rs.	Rs. a. p.		Rs	Rs a. p.	Rs. a. p.
I	Dry	69,968	57,831	0 13 8	66,370	71,170	1 1 2	+0 3 11
	Wet	3,849	13,050	3 6 3	3,669	13,266	3 9 10	+0 3 11
	Garden	1,702	11,418	6 11 7	2,933	14,894	5 1 3	—1 10 4
	Miscellaneous (temporary water rate.)	..	998	..				..
	Total ..	75,519	82,670	1 1 6	72,972	99,330	1 5 9	+0 4 3
II	Dry . .	54,225	35,399	0 10 5	50,479	44,412	0 14 1	+0 3 8
	Wet	3,674	11,150	3 0 7	3,600	11,939	3 5 1	+0 4 6
	Garden	710	4,862	6 13 7	1,309	5,958	4 8 10	—2 4 9
	Miscellaneous	..	215	..	.	..	..	...
	Total	58,609	51,626	0 14 1	55,388	62,339	1 2 0	+0 3 11
III	Dry	6,791	3,961	0 9 4	6,381	4,473	0 11 3	+0 1 11
	Wet ..	1,446	3,511	2 6 11	1 516	4.062	2 10 10	+0 3 11
	Garden	65	288	4 6 11	75	294	3 14 9	—0 8 2
	Miscellaneous	..	65	...	..	..	..	..
	Total ...	8,302	7,828	0 15 1	7,972	8,829	1 1 9	+0 2 8

A substantial increase of 3 as. 11 p. and 3 as. 8 p. per acre has been effected on dry soils of the first and the second groups, respectively, and this is as it should be. Naturally also the increase in the third group is a moderate one of 1 anna 11 p., for we know that the *khushki* in this group is less productive, partly because of the inferiority of the soil, and partly because the crop is more liable to damage by the rainfall which is usually heavier here than it is in the other parts of the taluk.

While the increase on the wet rates is moderate throughout, it will be noticed that it is heaviest in the 2nd group. The fact is, that though water-supply of both good and indifferent character is to be found everywhere, the relative proportion of the lands under good supply is highest in the villages of the 2nd group. The degree of increment on the rate naturally follows that circumstance.

The old recorded area of garden land in the 2nd group is small in itself, but much of it which is very good, was assessed at the old settlement at the maximum rate, or some rate near to it; the lower maximum now adopted has served to cut down such high rates. Further, the old area of 710 acres in this group has expanded to 1,309 acres at Re-survey, *i.e.*, by 85 per cent; in none of the other groups is the proportion of additional garden quite so large. It must be recollected also that new gardens, unlike long established gardens, have to be handled in a specially tender manner. All these facts are reflected in the amount of reduction effected in the average rate of the second group Rs. 2-4-9 per acre, as compared with Rs. 1-10-4 and Re. 0-8-2 in the 1st and the 3rd groups.

No. R. 11457-69—L. S. 25-16-9, DATED 21ST MAY 1917.

31. A better idea as to how the old average rates compare with the new, and how the new averages for each class of cultivation stand to one another in the several groups, is gained by a transposition of entries of the table given above as exhibited in the following:—

Group	Old average rates			New average rates		
	Dry	Wet	Garden	Dry	Wet	Garden
1	2	3	4	5	6	7
	Rs a p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p	Rs. a. p.
I	0 13 3	3 6 3	6 11 7	1 1 2	3 9 10	5 1 3
II	0 10 5	3 0 7	6 13 7	0 11 1	3 5 1	4 8 10
III	0 9 4	2 6 11	4 6 11	0 11 2	2 10 10	3 14 9

I show below the average rates of the taluks adjoining Tarikere which have already had revision rates sanctioned and introduced. The rates now proposed for Tarikere compare quite reasonably with them, as I have little hesitation in saying that Tarikere is on the whole, a tract distinctly superior to any of them.

Taluks	Average dry rate	Average wet rate	Average garden rate	Total average
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a p.
Shimoga	0 13 8	2 14 6	5 8 8	1 9 6
Channagiri	0 15 11	3 13 2	4 1 2	1 2 10
Tarikere	0 15 7	3 5 1	4 14 1	1 1 0

32. One more financial statement is given below in order to show what the result of the operations of the new rates will be on the taluk as a whole. The acreage in column 2 relates to the area found to have been occupied at Revision Survey. The assessment under the old and the prospective rates are placed side by side in columns 3 and 4.

By former survey and settlement, as per taluk accounts relating to the year of revision survey		By revision survey and the rates now proposed		Difference	Percentage
Total area of occupied lands	Assessment	Total area of occupied lands	Assessment		
1	2	3	4	5	6
Rs.	Rs.	Rs.	Rs.	Rs.	
1,36,743	1,38,210	1,36,332	1,70,498	32,288	23·4

Thus an enhancement of the assessment on the occupied area by a sum of Rs. 32,288, or by 23·4 per cent will have been effected, and considering all the circumstances of the case, I think this enhancement is a perfectly just and reasonable one.

33. *Assessed waste land.*—The extent of Government assessed waste land of the different descriptions still available for cultivation, is shown below:—

Group	Dry			Wet		
	Acres	Assessment	Average rate	Acres	Asesssment	Average rate
		Rs.	Rs. a. p.		Rs.	Rs. a. p.
I	8,091	5,721	0 11 4	114	377	3 4 11
II	11,585	7,892	0 10 11	309	994	3 3 6
III	2,011	1,257	0 10 0	185	464	2 8 2
Total ...	21,687	14,860	0 11 0	608	1,835	3 0 3

	Garden			Total		
	Acres	Assessment	Average rate	Acres	Assessment	Average rate
			Rs. a. p.			Rs. a. p.
I	37	69	1 1 10	8,242	6,167	0 12 0
II	37	83	2 3 11	11,931	8,959	0 12 0
III	....	.....	.....	2,196	1,721	0 12 6
Total ...	74	152	2 0 10	22,369	16,847	0 12 1

The total area at Revision Survey is seen to amount to 22,369 acres. But as I have pointed out before, this area has contracted to 16,682 in 1913-14, the latest year for which accounts have been furnished by the Amildar. The area under the same head was 67,81[illegible] acres, when the old settlement was introduced, showing that something like 75½ per cent o[illegible] it has passed to occupation since then.

34. *Conclusion.*—To sum up, the old dry rates will under my proposals be advanced by 3 annas 7 pies per acre, or by 30 per cent, the wet rates by 3 annas 11 pies, or by 8 per cent the garden rates will be cut down by Rs. 1-11-8 per acre, *i.e.*, by 26 per cent. The net result on the occupied area will be an increase of 3 annas 10 pies per acre. This result could not have come about had not a large accession of nealry 2,000 acres accrued to garden cultivation, which is most of it paying only the easy old dry rates at the present time. The final result on the revenue of the taluk as a whole, is an increase of Rs. 32,288 over collections under existing rates, that is, an increase of 23·4 per cent. I have set forth in sufficient detail, the justification for the new rates, and beg they may be sanctioned.

35. *Limits of increase.*—The limit of enhancement, 66 per cent in the case of villages has been exceeded in the five villages noted in the margin; but this is found to be due not to a more enhancement of the rates but to an increase in occupied area, and to the recent introduction of irrigation on lands that are treated as dry lands in the akarbands. Cases of increase over the allowed percentage on individual holdings will be duly inquired into when the settlement is introduced.

Serial No.	Village.
113.	Kolakere.
115.	Hanumalapura.
200.	Mudagere.
249.	Basavanahalli.
278.	Nandibatlu.

36. *Cesses.*—The local fund and irrigation cesses will be levied separately according to standing orders.

A map of the taluk illustrating my proposals, and the Revenue and Classwar statements, accompany this report.

APPENDIX A.

Revenue statement for the 211 villages of the Tarikere Taluk of the Kadur District from 1878-79 to 1913-14.

No. R. 11457-69—L. S. 25-16-9, DATED 21ST MAY 1917.

ACCOMPANIMENT II.

Letter No. C. 2678, dated 3rd February 1917, from K. R. Srinivasiengar, Esq , M. A., Offg. Revenue Commissioner in Mysore, to the Secretary to the Government of His Highness the Maharaja of Mysore, Revenue Department.

In continuation of my letter No. C. 2678, dated the 9th January 1917, I have the honor to submit my opinion on the proposals of the Superintendent of Survey and Settlements in Mysore for the revision of assessment in the Tarikere Taluk as it was in 1877.

2. The Deputy Commissioner, Kadur District, has agreed to the Superintendent's proposals. The Deputy Commissioner of Shimoga has not yet furnished his opinion on the proposals: but as only 33 of the villages covered by the proposals are included in the Shimoga District, I have considered it unnecessary to wait for his reply.

3. The Superintendent's report discloses that out of a total extent of Rs. 67,813 acres of assessed land that lay waste in the year of the original settlement, 75½ per cent has been occupied, leaving only 16,682 acres unoccupied at the end of 1913-14. The Season and Crop Report for 1915-16 indicates a still further contraction in the unoccupied area within the last two years. It is also noticed from the Resettlement report that the area under garden crops has expanded 72 per cent, that the facilities of communications have been considerably increased by the opening of Bangalore-Poona and Birur-Shimoga Railway lines and of the Tarikere-Narasimharajapura Tramway and the laying of several roads in the interior, that prices have risen nearly 100 per cent, that land has increased in value and lastly that there has been considerable improvement in the prosperity of the tract as evidenced by the increase in the number of tiled houses and carts since the last Settlement.

4. Per contra, we find that there has been an appreciable contraction of the area under Coffee since 1901, that a large tract comprising nearly 40 villages has no communications worth the name, that no really important market exists within the tract and that no manufactures of any consequence have yet established themselves in the taluk. The population of the tract has increased by only 5·5 per cent between 1871 and 1911, as against an increase of 14·7 for the whole State; but even this is not spread all over the tract covered by the report, as a reference to the census figures will show an appreciable fall in population in the malnad villages (mostly contained in group iii) comprised in the tract. This and the fact that there has been a decrease of 4 per cent among horned cattle in the tract are factors which detract considerably from the other evidences of the increased material prosperity of the tract and merit anxious consideration and call therefore for moderation in the assessment of the tract.

5. Turning now to the proposed rates, the Survey Superintendent remarks in para 29 of his report that "the increase of Re. 0-3-7 or 30 per cent to the Kushki (dry) average must be said to be a substantial one, but certainly is not unmerited and cannot prove burdensome." But it may be pointed out that the percentage of increase propsed is higher than that sanctioned in the case of any taluk till now resettled except Tumkur and that the absolute increase of Re. 0-3-7 per acre of dry land is higher than that sanctioned for any taluk except Bangalore. The exceptional advantages of Bangalore are explained in detail in the Government Order sanctioning the resettlement. The increase of Re. 0-3-4 in Tumkur Taluk was evidently sanctioned as it was accompanied by substantial reductions in the wet and garden rates. But none of these considerations apply in the case of Tarikere. The taluks of Banavar, Shimoga and Davangere have increases of only 23 per cent, 14 per cent and 21½ per cent respectively. I would therefore beg leave to suggest a slight lowering of the proposed maximum dry rate.

6. The case with regard to the garden rate seems to be even worse. The Survey Superintendent proposes a specially high maximum of Rs. 14 per acre for the gardens and has given his reasons therefore in para 28 of his report. I am however diffident as to the conclusion drawn by him. It is an open question, admitting of widely varying opinions, whether the absence of *Kapiles* and the presence of the more primitive *Yatam* is a sign of prosperity or of lack of enterprise. Similarly also, it is a moot point whether absence of any instance of takavi advance for wells (paras 11 and 25 of the Report) is an indication of easy circumstances or of the unsuitability of the tract for irrigation wells as well as the incapacity of the raiyat to construct such well. Be that as it may, it appears to me undesirable and unsafe that the maximum garden rate for this taluk should be fixed at a higher figure than that adopted for any taluk hitherto resettled excepting the Malnad Taluks of Sagar and Tirthahalli. I may point out in this connection that the maximum rates of the Taluks of Shikarpur, Shimoga, Belur and even Nagar, whose gardens have advantages by no means inferior to those of Tarikere are less, being Rs. 10 in the first case and only Rs. 12 for the rest. In view of the definite and repeated instructions of Government regarding the liberal treatment to be accorded to gardens, I would urge the lowering of the maximum of Rs. 12 as in most other taluks. It has also to be remembered that in this taluk, the two prevalent diseases of areca, *anabe* and *hedagalmundi* still continue unchecked, that gardens, cannot come into being nor can they be maintained in an efficient condition without considerable outlay

No. R. 11457-69—L. S. 25-16-9, dated 21st May 1917.

of capital and personal labour on the part of the owners and their families and that there is an element of great risk in garden cultivation which does not exist in the cultivation of annual crops, as a single year of drought or the infection of a disease in a single season spells wholesale loss and ruin to the garden owner.

7. So much for *ain* gardens. As regards the gardens coming under the operation of Government Order No. R. 3138-46—R 8-1900, dated 24th January 1902, (pages 523-4, Land Revenue Manual), they do not seem to have received any better treatment. This order directs that old well gardens under self-dependent wells should be assessed *within* the highest dry crop rate. But the statement at the foot of page 16 of the Superintendent's report discloses that the average rate on such gardens will be Rs 2-2-4 and such of them as happen to be cocoanut gardens will have to pay an average of Rs. 2-11-1. Since the maximum dry rate proposed for the first group itself is only Rs. 2-4-0 per acre, it is obvious that old cocoanut gardens which admittedly do not derive any benefit (direct or indirect) from Government works of irrigation have been taxed much higher than the maximum dry rate, not merely of their group only, but of the entire taluk itself. Similarly even the average for the non-cocoanut gardens is so near the highest maximum for the taluk that the conclusion appears irresistable that instead of being assessed *on merits* within the highest dry rate for their respective groups, they have been assessed as near the highest dry rate for the taluk itself as possible.

Rule 2 of the Rules of 1902, directs that old well gardens in which the well supply has failed should be assessed at dry rates, *i.e*, assessed as if they were dry lands. Now the average for such gardens is found to be Rs 1-10-10 per acre against an average of Re 0-15-7 per acre of dry land. It is no doubt possible to explain that as the best lands have been used as gardens, their classification values are high and therefore their average is high. But the average is so near the maximum that one can reasonably entertain a doubt in this respect and I would humbly suggest that this matter should be investigated in detail. I entertain the same doubts with regard to the treatment of new gardens, for though they ought, under the rules of 1902, to be assessed at dry rates, *i.e*, as if they were dry lands, their average ranges from Rs. 1-14-9 to Rs 2-0-11, *i e*, much in excess of the maximum dry rate for the 3rd group, equal to the maximum for the 2nd and not much less than that of the highest dry rate for the entire taluk.

I beg leave therefore to suggest that a general reassessment of all gardens falling under Rules 1, 2 and 3 of the Rules of 1902, be ordered strictly according to that order.

8. As regards the proposed wet rates, I am of opinion that they are reasonable and may be adopted.

9. In conclusion I may be permitted to observe that the comparison of present and revised revenue in para 32 is not quite accurate; as the figures given for present revenue includes the irrigation cess which is merged therein, while those given for the revenue at the revised rates do not include the cess which will be recovered as a separate levy I may also beg leave to point out that Appendix B also is not very useful in its present form as the figures given under "Former Survey" do not pertain to the same year as that in respect of which the figures under "Revised Survey" are given.

10. A copy of this letter has been sent to the Survey Superintendent for his information.

ACCOMPANIMENT II.

Letter No. C. 2678-2, dated 10th February 1917, from K. R. Srinivasiengar, Esq., M.A, Officiating Revenue Commissioner in Mysore, to the Secretary to the Government of His Highness the Maharaja of Mysore, Revenue Department.

In continuation of my letter No C 2678, dated 3rd instant, furnishing my opinion on the revision of assessment on lands comprised in the late Tarikere Taluk of the Kadur District, I have the honor to forward herewith copies of the marginally noted D. O. letters and to invite the reference of Government to the fact that coffee lands have not been brought within the operation of the Revision Survey.

This Office D O letter No 408, dated 31st January 1917, to the Survey Superintendent
Survey Superintendent's letter No 65, dated 2—3rd February 1917.

Enclosure (1) to A II.

D. O. letter No. 408, dated 31st January 1917, from the Office of the Revenue Commissioner in Mysore, Bangalore, to the Superintendent of Revenue Survey in Mysore.

With reference to proposals for the revision of assessment in the Tarikere Taluk, may I request the favour of your informing me how you propose to deal with coffee lands held otherwise than on permanent assessment.

No. R. 11457-69—L. S. 25-16-9, DATED 21ST MAY 1917.

ACCOMPANIMENT II.

etter No. C. 2678, dated 3rd February 1917, from K. R. Srinivasiengar, Esq., M. A., Offg. Revenue Commissioner in Mysore, to the Secretary to the Government of His Highness the Maharaja of Mysore, Revenue Department.

In continuation of my letter No. C. 2678, dated the 9th January 1917, I have the honor to submit my opinion on the proposals of the Superintendent of Survey and Settlements in Mysore for the revision of assessment in the Tarikere Taluk as it was in 1877.

2. The Deputy Commissioner, Kadur District, has agreed to the Superintendent's proposals. The Deputy Commissioner of Shimoga has not yet furnished his opinion on the proposals: but as only 33 of the villages covered by the proposals are included in the Shimoga District, I have considered it unnecessary to wait for his reply.

3. The Superintendent's report discloses that out of a total extent of Rs. 67,813 acres of assessed land that lay waste in the year of the original settlement, 75½ per cent has been occupied, leaving only 16,682 acres unoccupied at the end of 1913-14. The Season and Crop Report for 1915-16 indicates a still further contraction in the unoccupied area within the last two years. It is also noticed from the Resettlement report that the area under garden crops has expanded 72 per cent, that the facilities of communications have been considerably increased by the opening of Bangalore-Poona and Birur-Shimoga Railway lines and of the Tarikere-Narasimharajapura Tramway and the laying of several roads in the interior, that prices have risen nearly 100 per cent, that land has increased in value and lastly that there has been considerable improvement in the prosperity of the tract as evidenced by the increase in the number of tiled houses and carts since the last Settlement.

4. Per contra, we find that there has been an appreciable contraction of the area under Coffee since 1901, that a large tract comprising nearly 40 villages has no communications worth the name, that no really important market exists within the tract and that no manufactures of any consequence have yet established themselves in the taluk. The population of the tract has increased by only 5·5 per cent between 1871 and 1911, as against an increase of 14·7 for the whole State; but even this is not spread all over the tract covered by the report, as a reference to the census figures will show an appreciable fall in population in the malnad villages (mostly contained in group iii) comprised in the tract. This and the fact that there has been a decrease of 4 per cent among horned cattle in the tract are factors which detract considerably from the other evidences of the increased material prosperity of the tract and merit anxious consideration and call therefore for moderation in the assessment of the tract.

5. Turning now to the proposed rates, the Survey Superintendent remarks in para 29 of his report that "the increase of Re. 0-3-7 or 30 per cent to the Kushki (dry) average must be said to be a substantial one, but certainly is not unmerited and cannot prove burdensome." But it may be pointed out that the percentage of increase propsed is higher than that sanctioned in the case of any taluk till now resettled except Tumkur and that the absolute increase of Re. 0-3-7 per acre of dry land is higher than that sanctioned for any taluk except Bangalore. The exceptional advantages of Bangalore are explained in detail in the Government Order sanctioning the resettlement. The increase of Re. 0-3-4 in Tumkur Taluk was evidently sanctioned as it was accompanied by substantial reductions in the wet and garden rates. But none of these considerations apply in the case of Tarikere. The taluks of Banavar, Shimoga and Davangere have increases of only 23 per cent, 14 per cent and 21½ per cent respectively. I would therefore beg leave to suggest a slight lowering of the proposed maximum dry rate.

6. The case with regard to the garden rate seems to be even worse. The Survey Superintendent proposes a specially high maximum of Rs. 14 per acre for the gardens and has given his reasons therefore in para 28 of his report. I am however diffident as to the conclusion drawn by him. It is an open question, admitting of widely varying opinions, whether the absence of *Kapiles* and the presence of the more primitive *Yatam* is a sign of prosperity or of lack of enterprise. Similarly also, it is a moot point whether absence of any instance of takavi advance for wells (paras 11 and 25 of the Report) is an indication of easy circumstances or of the unsuitability of the tract for irrigation wells as well as the incapacity of the raiyat to construct such well. Be that as it may, it appears to me undesirable and unsafe that the maximum garden rate for this taluk should be fixed at a higher figure than that adopted for any taluk hitherto resettled excepting the Malnad Taluks of Sagar and Tirthahalli. I may point out in this connection that the maximum rates of the Taluks of Shikarpur, Shimoga, Belur and even Nagar, whose gardens have advantages by no means inferior to those of Tarikere are less, being Rs. 10 in the first case and only Rs. 12 for the rest. In view of the definite and repeated instructions of Government regarding the liberal treatment to be accorded to gardens, I would urge the lowering of the maximum of Rs. 12 as in most other taluks. It has also to be remembered that in this taluk, the two prevalent diseases of areca, *anabe* and *kedagalmundi* still continue unchecked, that gardens, cannot come into being nor can they be maintained in an efficient condition without considerable outlay

No. R. 11457-69—L. S. 25-16-9, dated 21st May 1917.

of capital and personal labour on the part of the owners and their families and that there is an element of great risk in garden cultivation which does not exist in the cultivation of annual crops, as a single year of drought or the infection of a disease in a single season spells wholesale loss and ruin to the garden owner.

7. So much for *ain* gardens. As regards the gardens coming under the operation of Government Order No. R. 3138-46—R. 8-1900, dated 24th January 1902, (pages 523-4, Land Revenue Manual), they do not seem to have received any better treatment. This order directs that old well gardens under self-dependent wells should be assessed *within* the highest dry crop rate. But the statement at the foot of page 16 of the Superintendent's report discloses that the average rate on such gardens will be Rs. 2-2-4 and such of them as happen to be cocoanut gardens will have to pay an average of Rs. 2-11-1. Since the maximum dry rate proposed for the first group itself is only Rs. 2-4-0 per acre. it is obvious that old cocoanut gardens which admittedly do not derive any benefit (direct or indirect) from Government works of irrigation have been taxed much higher than the maximum dry rate, not merely of their group only, but of the entire taluk itself. Similarly even the average for the non-cocoanut gardens is so near the highest maximum for the taluk that the conclusion appears irresistable that instead of being assessed *on merits* within the highest dry rate for their respective groups, they have been assessed as near the highest dry rate for the taluk itself as possible.

Rule 2 of the Rules of 1902, directs that old well gardens in which the well supply has failed should be assessed at dry rates, *i.e.*, assessed as if they were dry lands. Now the average for such gardens is found to be Rs. 1-10-10 per acre against an average of Re. 0-15-7 per acre of dry land. It is no doubt possible to explain that as the best lands have been used as gardens, their classification values are high and therefore their average is high. But the average is so near the maximum that one can reasonably entertain a doubt in this respect and I would humbly suggest that this matter should be investigated in detail. I entertain the same doubts with regard to the treatment of new gardens; for though they ought, under the rules of 1902, to be assessed at dry rates, *i.e.*, as if they were dry lands, their average ranges from Rs. 1-14-9 to Rs. 2-0-11, *i.e.*, much in excess of the maximum dry rate for the 3rd group, equal to the maximum for the 2nd and not much less than that of the highest dry rate for the entire taluk.

I beg leave therefore to suggest that a general reassessment of all gardens falling under Rules 1, 2 and 3 of the Rules of 1902, be ordered strictly according to that order.

8. As regards the proposed wet rates, I am of opinion that they are reasonable and may be adopted.

9. In conclusion I may be permitted to observe that the comparison of present and revised revenue in para 32 is not quite accurate; as the figures given for present revenue includes the irrigation cess which is merged therein, while those given for the revenue at the revised rates do not include the cess which will be recovered as a separate levy. I may also beg leave to point out that Appendix B also is not very useful in its present form as the figures given under "Former Survey" do not pertain to the same year as that in respect of which the figures under "Revised Survey" are given.

10. A copy of this letter has been sent to the Survey Superintendent for his information.

ACCOMPANIMENT II.

Letter No. C. 2678-2, dated 10th February 1917, from K. R. Srinivasiengar, Esq., M.A., Officiating Revenue Commissioner in Mysore, to the Secretary to the Government of His Highness the Maharaja of Mysore, Revenue Department.

In continuation of my letter No. C. 2678, dated 3rd instant, furnishing my opinion on the revision of assessment on lands comprised in the late Tarikere Taluk of the Kadur District, I have the honor to forward herewith copies of the marginally noted D. O. letters and to invite the reference of Government to the fact that coffee lands have not been brought within the operation of the Revision Survey.

This Office D. O. letter No. 408, dated 31st January 1917, to the Survey Superintendent.
Survey Superintendent's letter No. 65, dated 2—3rd February 1917.

Enclosure (1) to A. II.

D. O. letter No. 408, dated 31st January 1917, from the Office of the Revenue Commissioner in Mysore, Bangalore, to the Superintendent of Revenue Survey in Mysore.

With reference to proposals for the revision of assessment in the Tarikere Taluk, may I request the favour of your informing me how you propose to deal with coffee lands held otherwise than on permanent assessment.

No. R. 11457-69—L. S. 25-16-9, dated 21st May 1917.

Enclosure (2) to A. II.

D. O. letter No. 65, dated 2—3rd February 1917, from the Survey Superintendent in Mysore, to the Officiating Revenue Commissioner in Mysore, Bangalore.

With reference to your D. O. letter No. 408 of the 31st ultimo inquiring as to how it is proposed to deal with Coffee lands in the Tarikere Taluk held on other than permanent tenure, I write to say that the settlement of Coffee lands will not be undertaken by the Survey Department. Government have evidently entertained no idea of a revision of the assessment of these, though all matters relating to coffee lands appear to have been under their consideration when they passed the recent order No. 4693-703—L. R. 330-11-4, dated 18th November 1916.

ACCOMPANIMENT III.

Letter Camp No. 3, from Mr. D. K. Darashah, Superintendent of Revenue Survey and Settlements in Mysore, to B. Ramaswamayya, Esq., B.A., B.L., Officiating Secretary to the Government of His Highness the Maharaja of Mysore, Revenue Department.

In continuation of my letter No. 80, dated 16-11-1916, submitting copies of the revision settlement proposals of the Tarikere Taluk, and with reference to the Revenue Commissioner's letter to you, No. C. 2678, dated 3rd February 1917, copy of which he has sent to me, offering remarks on the proposals, I have the honor to state as follows:—

2. In para 9 of his letter, the Revenue Commissioner draws attention to a defect in the form of Statement C. appended to the Report, inasmuch as the details of occupied land given under the heading "By former survey" relate to the latest year for which the Amildar furnishes figures, and not to the year to which the revision survey figures relate. The statement was prepared in accordance with the practice hitherto in vogue in sending up settlement reports, but it is true that the comparison would become more or less vitiated in the case of a taluk in which the particulars for occupied land differed substantially from that obtaining in the year in which re-survey was carried out. The matter was however taken notice of by me a few months back, since when arrangements have been made for the removal of the defect from future settlement reports. I must at the same time point out that the figures I have given in the text of my report are nowise affected by the faults of the appendix; there, the comparison rests on the common basis of the state of things that prevailed in the two years during which revision survey was carried out in the taluk.

3. The comparison made between the proposed and the current revenues must also be said to be incomplete, as the Revenue Commissioner points out, because the irrigation cess which forms part of the present assessment will have to be a levy distinct from the assessment, under the latest orders on the subject. I have drawn attention to this fact in section 36 of the report, where I have said that the cess will be levied separately.

4. The chief point in the Revenue Commissioner's critique is however, that the proposed dry and garden rates are exorbitant, but in my humble opinion all his scruples arise from an insufficient appreciation of facts. I am compelled to think that he has allowed his judgment to become almost captious in its tenor, a hypercritical pre-occupation with details preventing his taking the wider view he might have taken of the subject matter; nor are his pronouncements upon details correct, as I shall show presently.

5. Before dealing with the Revenue Commissioner's remarks relating to the dry and the garden rates, I shall very briefly touch upon some statements of a general character made by him.

1. Coffee cultivation has contracted since 1901 as pointed out in section 10 of my report, though it is still considerably in excess of what it was at the original settlement. But it is difficult to see how this fact can lead to the conclusion that the ordinary cultivation on dry, wet and garden land which has advanced so rapidly within the past 35 years as to absorb three-fourths of the old waste land, should now be treated very leniently. The inference, if any should be drawn, ought to be of the opposite kind.

2. I had advocated the removal of a long-felt want for a road between Shivani and Channagiri, to serve the convenience of a group of about 40 villages in the north, but that circumstance is not in itself of such very serious importance as to interfere with the general progress of the village in question. Agriculture has flourished there in about the same degree as it has elsewhere. If so much is to be made of the lack of good communications in this little area, I wonder what the Revenue Commissioner would have to say of the numerous inner recesses of the malnad, which it is not only impossible to make highways in but which are cruelly isolated for several months during the monsoons, the inhabitants having frequently to live upon the half rotten provisions they are obliged to lay in before the rains commence:—and yet most of these Malnadis are content to pay higher rates at least

No R 11457-69—L. S. 25-16-9, dated 21st May 1917.

for their gardens, than Tarikere Taluk was ever asked to pay Shivani, a village in the east of this group is itself a Railway Station, and is connected with Ajjampur by a high road The most remote of these villages is not many miles away from either the Railway on the east, or the Ajjampur-Tarikere road on the south I must add that the construction of a road from Shivani to Channagiri, is one of the subjects noted for consideration and action by the Public Works Department, and it will not be surprising if something is soon done about it

3 Tarikere is an internal market town of considerable importance as I have shown in Section 13 of my report, and Birur situated very near the south-east corner of the taluk, is a nest of Sowcars and dealers who buy up all agricultural produce brought to them It is wrong to say that the people have a serious grievance about the situation of their market places

4 Except for some of the semi-malnad portions of the taluk, where public health is not so vigorous as it might have been and the density of population is relatively lower, the health conditions usually prevailing in the taluk are excellent Due allowance has been made for the lower conditions in the semi-malnad tracts as may be seen from the very easy dry and wet rates adopted for the lower groups As for the gardens, I have taken personal care to suit the new rate to existing conditions in each one of them Though a 14 rupee maximum has been adopted throughout the taluk it is practically a nominal maximum for the villages of the third group, where the average garden rate is shown to be only Rs 3-14-9 in para 31 of the report

5 A decrease of 4 per cent in horned cattle is by no means a sign of decline in agricultural stock There is nothing to show that disease or mortality is commoner in Tarikere than in any other maidan taluk The explanation given in Section 17 of the report still appears to be the right one With such an advance in agriculture as the Tarikere Taluk has made, the people cannot afford to maintain unserviceable animals that can only consume the fodder which should serve the animals required for the greatly increased cultivation Let us recollect that more than 15,000 acres have, during the settlement period passed into occupation, and that the lack of free grazing land particularly in the Ajjampur hobli has become a sore grievance It is not surprising to find then, that the useless among the cattle have been pushed out by the really serviceable animals

6 I now pass to the rates which the Revenue Commissioner criticises in detail The 'Dry' maxima adopted for such of the adjoining talukas as have already been revised, and those for certain other talukas which the Revenue Commissioner has brought into his discussion, are exhibited in the table below for purposes of comparison —

Taluk	Maximum			Remarks
	Rs	a	p	
Bangalore	3	4	0	Revised
Tumkur	2	12	0	"
Belur	2	10	0	"
Shimoga	2	10	0	"
Shikarpur	2	4	0	"
Channagiri	2	4	0	"
Hosdurga	2	0	0	"
Banawar	2	8	0	Revision proposals now under consideration by Govt.
Tarikere	2	4	0	As proposed

It will be observed that the maximum proposed for Tarikere does not, with one exception, exceed that of any other maidan or semi-malnad taluk named in the list, and that it stands well below the Bangalore, the Tumkur the Shimoga and the Banawar rates The exception alluded to, is the Hosdurga Taluk in the north-east, where a lower maximum of Rs 2 was fixed more than 12 years ago, for easily intelligible reasons, the relative inferiority of the class of crops generally raised, the large area of 50,000 acres lying waste, and the very severe loss in population (40 per cent) incurred during the Great Famine. This last fact, Government had prominently in view, in passing their Order No R 4159-68—L. S. 77-03-4, dated 14th November 1904, where the specially moderate increment of four annas to the old maximum of Rs 1-12-0, was considered sufficient, because "the tract in question has just recovered from the effects of one of the most terrible famines that devastated any country." But with Tarikere, the facts are quite different The highly remunerative Bengal-gram and Coriander are commonly taken from the better soils (Section 10 of the report) nearly 68,000 acres of waste land are now reduced to 22,300 acres (Section 33), and the Great

Famine could do it no more harm than to take the lives of the exceptionally small fraction of 8 per cent of the population (Section 16).

7. I beg to point out further that as a taluk, Tarikere is nowise inferior to the sister taluk of Banawar, and that it excels Banawar in many respects. The old maximum of Rs. 2 in Banawar has been proposed to be raised to Rs. 2-8-0, a measure which is considered quite just by the Deputy Commissioner. Even the Revenue Commissioner in his letter No. C. 1676 Gen., dated 24th January 1917, to the Secretary has not attempted to advance a single argument to show that it is not a fair increase, but only ventures upon a suggestion, somewhat inconsequential as I regard it, that, as the 2nd group in Banawar deserves to have its maximum raised still more, the 1st group maximum of Rs. 2-8-0 "may be slightly decreased," as though it were a matter for a compromise. My point is that even if the Rs. 2-8-0 maximum for Banawar were to be "slightly decreased." the Tarikere maximum of Rs. 2-4-0 would still not exceed it, and may even fall sensibly short of it.

8. The absolute increase of 3 annas 7 pies to the avarage rate is, as I have admitted, substantial, but not unfair, considering (1) the substantial savings to the raiyats in consequence of the Railway and other improvements to traffic that have occurred subsequent to the original settlement, (2) the estimation in which land is held as proved by the ease with which revenue collections have been made, and the remarkable absence of remissions (Section 26), and the extraodinarily high multiple of the assessment that sale and mortgage have produced (Section 21), and (3), the opinions expressed in no faltering tones, by the Deputy Commissioner and the Nagar Division Superintendent (Section 28) to the effect that they could not help regarding the rates proposed at the old settlement as being unnecessarily lenient, which rates Government sanctioned on the sole consideration of a possible risk in taking higher rates at a time when a large area of arable land lay unoccupied. I have personally no fear whatever as to how my rates will work in the taluk, and I make bold to say that dry land in Tarikere Taluk could, on merits, bear higher rates than those fixed for any of the taluks that surround it,—but the principle that the past standard of collection cannot be neglected in framing a system for the future, has to be scrupulously kept in view. The Revenue Commissioner states that except in the case of Bangalore and Tumkur, the percentage of increase is higher than that fixed for other revised taluks. I have only to point out in reply, that that is the natural consequence of two facts (1) that the original rates have proved unquestionably lenient in Tarikere, and (2) much of the soil of the taluk is of first class productivity. Even in Bangalore and Tumkur the soil is all of the second and the third orders, whereas in Tarikere, there are thousands of acres of pure *Regur*, though there are not wanting pretty extensive areas which will, even under the proposed maxima, bear only a rate of 2½ annas an acre. In concluding this part of my reply, I beg to bring it to your notice that the Revenue Commissioner carefully refrains from saying or suggesting that the 'dry' maxima or averages will in themselves be prohibitive or irksome to the raiyat. All his remarks amount to saying that the Tarikere rates should be kept low because certain other taluks have been assessed low.

9. With regard to the gardens, I think I have shown cogent reasons in Section 28 of my report for adopting a maximum (Rs. 14) slightly higher than that adopted in Maidan taluks heretofore. The taluk is situated in proximity to the Malnad country, which circumstance enables it to enjoy a comparatively good and reliable rainfall; the tanks are generally of very good use to the gardens; the gardens under the better class of tanks have no need of help from wells, so sure is the support they give; out of 1,510 wells of all kinds there are only 1,018 in all the taluk that are used for irrigation, the absence of *Kapile* wells is significant evidence of excellent geological formations and of reliability of rainfall, whereby water is usually retained and tapped at easy depths, suitable for the employment of inexpensive *Yatas*. I have shown too, that as a result of all this, the average condition of the gardens is distinctly high, certainly higher than that of Belur, Shikarpur and Shimoga gardens with which the Revenue Commissioner compares them. The dearth of agricultural coolies and the *koleroga*, terrible enemies to the malnad man, are practically non-existent here. The losses due to the *anabe* and *hedegalmundi* diseases (Section 10) bear no resemblance to the havoc caused by the malnad disease. The abolition of the *halat*, through which the losses and the irrigating restrictions on the raiyat were sought to be removed, has worked a swift and direct effect in Tarikere Taluk, while away in the malnad, the wicked old *suttige* system is so persistent, that the benefits of the generous measure taken by Government are being realised in much smaller and slower instalments. I have personally satisfied myself that there is no complaint among the garden owners of Tarikere as regards the weight of the existing assessment, all that is wanted being a re-distribution of the burden to suit changes where they have occurred. I may point out lastly (Section 28), that not a single old garden has been assessed at the maximum rate of Rs. 14 which has not heretofore been paying the same or a higher rate, and which moreover, is now in a condition at least equally good with what obtained at the original settlement. Under these circumstances, I consider it is legitimate, if a little out of the usual course, to take a maximum of Rs. 14 and I feel certain the protest is the outcome of an apprehension that this maximum must be harmful for no other reason than that it moves out of the accustomed groove.

No. R. 11457-69—L. S. 25-16-9, DATED 21ST MAY 1917.

10. With regard to the old and the new self dependent well gardens (iii) (A) and V in the table given at the foot of Section 29 of my report), the Revenue Commissioner expresses a doubt as to their having been assessed only on soil merits, as they should be under the garden rules of 1902. The fact that the averages for these gardens Rs. 2-2-4 and Rs. 1-14-9 respectively, though within the dry maximum, are much in excess of the average dry rate in the taluk, has, he says, given occasion to the doubt. A little reflection will show why the ordinary dry average (Re. 0-15-7) is exceeded in the case of these gardens. There is, as I have pointed out in my report, a good deal of first class soil in the eastern and the central portions of the taluk, but it must be kept in mind that there is in it a great deal of very poor soil also. I can point out several tracts in which the fields are unable to rise above the "rockbottom" rate of 2½ annas. If we could count up the value of only the first few classes of dry soil in the taluk to the exclusion of the lower soils, the average rate under a maximum of Rs. 2-4-0 would be found to lie nearabouts Rs. 2. A very large admixture of very bad soil has therefore kept the 'dry' average in the taluk so low as Re. 0-15-7. But the case is different with gardens, for a raiyat will as far as he can help it, select the pick of the village lands for the more intensive and valuable cultivation associated with gardening; moreover the special heavy manuring effected for a great many years in the gardens is bound to impart additional exellence of a permanent kind, which it is impossible for the vast expanses of dry land to acquire. The soil value of gardens consequently runs much higher on this account alone. Another equally important factor is also to be reckoned, the distance between the village site (the raiyats' home) and his land. The most casual observer will have discerned that, as a rule, and by reason of the force that makes for economic adjustments, gardens are situated as near the village site as water and soil facilities will allow, so that the expense and the trouble involved in the constant watching against man and beast, the carrying of large quantities of manure, the transport of the produce, etc., are considerably reduced; on the other hand, the less valuable and the far more numerous dry fields are necessarily situated in all grades of remoteness from the village site; garden land is acre for acre situated very much nearer to the raiyat's home. This special advantage is naturally taken account of by all systems of settlement, with the result that the survey valuation of the more distant lands is proportionately lighter than that of the less remote. The two factors therefore, of superiority of soil and of propinquity, have automatically lifted the average soil value in gardens. This explanation also serves to explain the average rate of Rs. 1-10-10 on self dependent gardens (iii) (*b*) in the Statement) in which the old wells have failed.

11. In discussing the cocoanut gardens, old and new (IV and VI in the table), the Revenue Commissioner has overlooked the fact that a majority of them are indirectly benefited by being near to a stream, a tank or a channel. Entry No. ii relates only to old *well-gardens* so benefited, and is exclusive of what is technically termed 'dry' cocoanut gardens, many of which are favourably situated for drawing underground moisture made available by streams, tanks or channels, the property of Government. It would be quite absurd to say that what is called a dry cocoanut garden can thrive without some such source of sustenance. In the case of the old gardens, rates have been fixed corresponding to the indirect merit attaching to each, though not exceeding the existing rates under the old settlement, in several instances the old rates have been cut down to suit existing conditions. Similarly, the new cocoanut gardens have been assessed according to the quality of soil and situation, though in their case the 'dry' maximum has not been exceeded. All this is in consonance with the Rules of 1902.

12. I think enough has been said in this letter and in the report, to remove any doubt as to how the proposed settlement will work in the taluk. The original settlement of the taluks in the State may, as a whole, fairly lay claim to the exercise of a moderation that has brought a welcome relief to the administration in bad seasons, and I fully believe that this fine tradition will keep alive in the case of Tarikere, in spite of the enhancement proposed which, as a matter of natural course, must occur under circumstances which leave little doubt as to its suitability. Prices all round, whether of articles or of service, have doubled since Tarikere was last settled; it can therefore be no great straining of a conclusion to say that the value to Government, of the old assessment, has come to be about a half of what it was at the time of the old settlement. And since it is impossible for any one to maintain that the old rates have ever oppressed the Tarikere raiyat, it is manifest that the moderate proposals I have made will still leave much in his hands which the Public Treasury could justly have reckoned as its own.

13. The Deputy Commissioner of Kadur District has expressed approval of my proposals without reserve.

14. I beg in conclusion that the orders of Government may kindly be obtained and communicated to me at the earliest opportunity to enable me to introduce the new settlement.

No. R. 11457-69—L. S. 25-16-9, dated 21st May 1917.

Enclosure to A. III.

Letter G. C. No. 1885—16-17, dated 16th December 191- from B. T. Kesava Iyengar, Esq., B. A., Assistant Commissioner in District charge, Kadur District, to D. K. Darasha, Esq., B. A., Superintendent of Revenue Survey and Settlement in Mysore, Bangalore.

With reference to your letter No. 228, dated 15th November 1916, forwarding copy of your report regarding the revision of assessment of 284 Government villages of the late Tarikere Taluk and requesting to be furnished with my opinion thereon, I have the honour to state as follows:—

The proposals affect 211 villages of the Tarikere and 40 villages of the Kadur Taluk.

The chief thing noticeable in the report is the reference to the marked expansion of garden cultivation, a fact which indicates the general level of prosperity in the taluk, as garden cultivation requires more capital while it also certainly yields more profit.

Great changes have taken place since the original settlement, changes which have considerably increased the material prosperity of the taluk. The large extent of arable waste land, which at the time of the original settlement cautioned the Survey officers against the levy of a high assessment which considering the generally good soil of the taluk, would have been quite justifiable, has been reduced by 67% thus affording a proof of the rapid progress in the material welfare of the taluk.

In point of communications also, this taluk is most advantageously situated. The Birur-Shimoga Railway and the Poona Section of the Madras and Southern Maharatta Railway are easy of access from any part of the taluk. Two or three important railway feeder roads have been made since the original settlement, as the result of which trade has considerably improved. The value of land has risen very much and the prices of food grains have gone up by more than 100 per cent. It may be safely asserted that the halcyon period of low prices is never likely to recur again, as it is not with local markets that we are competing but with the markets of the world.

It is therefore in view of these improved conditions — conditions which spell prosperity to the raiyat that proposals have been made for enhancing the assessment on wet and dry lands.

Even at the time of the original Settlement, it was considered by the then Survey Superintendent that dry crop and rice land could have been assessed much higher than was actually done, the only reason for not adopting the higher rates being that there was a large extent of arable waste land, to encourage the cultivation of which comparatively low rates had to be levied. This consideration has now vanished and a large extent of arable waste land has been brought under the plough, while other material improvements have followed without the raiyat having in any way contributed towards them. In view of these facts, I am of opinion that the increase proposed for dry and wet lands is but just and as such it calls for no remarks.

The slight reduction of assessment on garden lands will not only come as a blessing to the garden owners, but will serve as an incentive to others to extend this kind of cultivation.

Taking all the circumstances into consideration we have every reason to agree with the proposals contained in the report under consideration and accept the recommendations made therein without reserve.

Revision Settlement of the late Banavar Taluk.

No. R. 11470-82—L. S. 20-16-4, DATED 21ST MAY 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Government Order No. 11468—R. 236, dated 26th March 1878, sanctioning the original settlement of the late Banavar Taluk in the Kadur District.

2. Letter No. 62, dated 12th October 1916, from the Superintendent of Revenue Survey and Settlements in Mysore, submitting proposals for the revision settlement of 381 villages of the same taluk.

Printed as Accompaniment I.

3. Letter No. C. 1676, dated 27th January 1917, from the Revenue Commissioner in Mysore, submitting his views and those of the Deputy Commissioner, Kadur District, in regard to the proposed settlement.

Printed as Accompaniment II.

4. Letter No. 4, dated 16th March 1917, from the Superintendent of Revenue Survey and Settlements in Mysore, submitting his final remarks in the matter.

Printed as Accompaniment III.

Order No. R. 11470-82—L. S. 20-16-4, dated 21st May 1917.

These proposals relate to the revision of the assessment of 381 Government villages of the late Banavar Taluk, of which 248 are in the present Kadur Taluk, 10 in the Hosdurga Taluk and 123 in the Arsikere Taluk.

2. The tract under consideration is a rough trapezium in shape and covers an area of nearly 580 square miles. The general aspect of the country is that of a slightly undulating plain with some hills in the north-west and south-east. The climate is dry and healthy except in the north-western portion in the neighbourhood of the hills. The rainfall is scanty but well distributed. The soil varies from the poorest sand to the best black cotton.

3. The taluk possesses very good irrigational facilities. In addition to the Madagakere and Ayyankere, which are two of the largest tanks of the State, there are numerous other big tanks with extensive atchkats which are fed by channels drawn from the Veda and the Avati rivers and the Javagal Halla. There are also several irrigation wells.

4. The chief dry crops are ragi, gram, cereals, oil-seeds and jola. Rice and sugar-cane are the chief wet crops, areca and cocoanut being the principal garden produce.

5. The population of the taluk decreased by 22% during the first decade of the original settlement owing to the great famine of 1878 but it recovered lost ground in the very next decade. Since then the population has been steadily rising. The figure according to the latest Census is 90,453 or an increase of 24% over the population of 1871. The density per square mile is 156 against 125 in 1871.

6. Other signs of an improvement in the material prosperity of the people since the original settlement are an increase in agricultural stock, cattle, ploughs and carts, an increase in the number of tiled houses, and an expansion of cultivation, particularly, garden cultivation which has increased by about 6,721 acres. The area under occupation has increased from 98,680 acres to about 164,486 acres or by 74 per cent. The value of land has also risen. From statistics relating to sales and mortgages it is gathered that sale proceeds on an average amounted to 30 times the assessment, and loans on the security of lands to 34 times the assessment on the lands.

No. R. 11470-82—L. S. 20-16-4, DATED 21ST MAY 1917.

7. The communications in the taluk have considerably improved. The advent of the Railway since the original settlement has effected much improvement in the economic condition of the taluk. It has given a great stimulous to trade and brought within the easy reach of the raiyat, even the most distant markets, so that he is now in a position to dispose of his surplus agricultural produce in the most advantageous manner. In addition to the Bangalore-Honnavar high road which existed at the time of the original settlement, two other roads have been opened and village cart-tracks have been considerably improved.

8. The original soil classification as well as the grouping of the lands in the taluk into three classes is proposed to be retained intact during the resettlement also. Government agree with the Superintendent, Revenue Survey, that there are well marked differences between the first and second groups, and consequently there is no reason to equalise them in the matter of rates as proposed by the Officiating Revenue Commissioner.

9. The subjoined statement shows the old rates and those proposed to be adopted during the resettlement of the taluk.

Land	Group	Maximum rate per acre		Average rate per acre	
		Original	Revised	Original	Revised
		Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Wet	I ...	7 0 0	7 12 0	3 11 7	4 5 2
	II ...	6 8 0	7 4 0	3 15 10	4 7 4
	III ...	6 0 0	6 12 0	3 7 1	3 13 11
	Mean for all the three groups ...	... ...	... ..	3 12 6	4 3 6
Dry	I ...	2 0 0	2 8 0	0 14 11	1 2 9
	II ...	1 12 0	2 2 0	0 12 11	0 15 10
	III ...	1 8 0	1 12 0	0 9 11	0 11 9
	Mean for all the three groups ...	.....	.. ..	0 12 6	0 15 4
Garden ...	I ...	16 0 0	12 0 0	2 6 11	2 4 7
	II ...	.....	.. ...	3 2 5	2 14 7
	III ..	.....	.....	1 15 4	1 13 8
	Mean for all the three groups ...	.....	. ....	2 9 8	2 7 0

10. The average dry and wet rates are thus increased by Re. 0-2-10 or 23 per cent, and Re. 0-7-0 or 12 per cent per acre, respectively, while the garden average is reduced by Re. 0-2-8 or 6 per cent per acre. The average rate per acre, taking all the three descriptions of land into account, has risen from Rs. 1-1-6 to 1-5-8 or by Re. 0-4-2 or 24 per cent per acre. The absolute increase in the revenue of the taluk according to the old and proposed rates is Rs. 32,694 or 19·2 per cent.

11. The revised rates proposed for the dry and garden lands have been accepted as suitable by the Deputy Commissioner, and the Officiating Revenue Commissioner. As regards the wet rates, however, both of them consider that an uniform increase of 12 annas in the maximum rate for all the groups is too high, as this cultivation is beset with many difficulties such as high prices of cattle and manure, scarcity of labour, silting up of tanks, etc. Government, however, observe that these conditions are not peculiar to the Banavar Taluk alone but prevail everywhere. At the same time, there are certain other considerations which in their opinion fully justify the proposed moderate increase of 12 per cent in the wet rates. The chief of them are the large expenditure of nearly 6¾ lakhs of rupees incurred in the improvement of irrigation works and the increase of nearly 100 per cent in the price of rice, the principal wet crop of the taluk. The rates also do not compare unfavourably with those sanctioned in the resettled maidan taluks in the neighbourhood. The permanent Revenue Commissioner, while agreeing to the proposed dry and garden rates, suggests that the wet rates may be considered as inclusive of the irrigation cess. Government, however, do not see any reason to waive the separate levy of this cess, which is duly authorized during resettlement, under existing orders.

No. R. 11470-82—L. S. 20-16-4, DATED 21ST MAY 1917.

12. Having regard to the foregoing circumstances, Government are pleased to sanction the rates proposed by the Superintendent, Revenue Survey, in their entirety, and direct that the revised rates be announced as soon as possible and brought into effect from the year 1917-18.

13. In conclusion, the Government consider that it would be useful if information about the variation in the prices of the principal agricultural products at the time of the original and revised settlement, is furnished in the resettlement reports, and direct that such information be given in future reports. It must also be noted that the increase or decrease of revenue incidental to Resurvey should be indicated with reference to the assessment on the lands under occupancy during the year of revision survey, calculated according to the old and new rates and not, as seems to be the present practice, by comparing the figures of the different years.

PRESS TABLE.

EXD.—C. R.

NO. R. 11470-82—L. S. 20-16-4, DATED 21ST MAY 1917.

ACCOMPANIMENT I.

Letter No. 62, dated Camp Mysore, 12th October 1916, from D. K. Darashah, Esq., B.A., Superintendent of Revenue Survey and Settlements in Mysore, to L. Krishna Rao, Esq., Secretary to the Government of His Highness the Maharaja of Mysore, Revenue Department.

I have the honor to forward herewith for orders of Government six advance copies of Report No. 12, dated 4th July 1916, from the Deputy Superintendent, Mysore Revenue Survey, submitting proposals for the revision of assessment of 381 villages of the late Banavar Taluk as it stood at the original settlement, and to state that, as usual copies of the report with appendices and map have been forwarded to the Revenue Commissioner and to the Deputy Commissioner of the Kadur District for an expression of their opinions in the matter. On receipt of their replies, the same will be sent to Government with my remarks, if any.

Enclosure to A. I.

No. 12, dated 4th July 1916, from C. Rajagopalacharlu, Esq., B.A., Deputy Superintendent, Mysore Revenue Survey, to D. K. Darashah, Esq., B.A., Superintendent, Mysore Revenue Survey, Bangalore.

I have the honour to submit the following proposals for the revision of assessment of 381 villages which constituted the late Banavar Taluk of the Kadur District, as it stood at the original settlement.

2. *Constitution of the taluk.*—At the original settlement, the taluk consisted of 433 villages, which, by absorption and amalgamation, were reduced to 381 villages and when the taluk was abolished, these 381 villages were absorbed in the adjoining taluks of Kadur, Hosdurga and Arsikere, thereby forming at present, portions of Kadur, Chitaldrug and Hassan Districts. Kadur Taluk has appropriated 248 villages, Hosdurga 10, and Arsikere 123.

3. *Boundaries.*—The taluk is bounded on the north by the Tarikere and Hosdurga Taluks; on the south by Belur and Arsikere Taluks; on the east by the Arsikere and Hosdurga Taluks and on the west by the Chikmagalur Taluk.

4. *Position.*—The old Banavar Taluk is extensive in area, being about 580 square miles. The taluk measures about 35 miles in length (from north to south) from 13° 15″ to 13° 43″ North latitude and about 38 miles in width (east to west) from 75° 50″ to 76° 24″ East longitude, and shows on the map as a rough trapezium. The taluk is narrow at the south and as we proceed northwards, beyond Banavar, it bulges out to the east and west. The town of Banavar was once the headquarters of the taluk, and boasted of possessing one of the best mud forts in the State: but it is now crumbling into ruins.

5. *Physical features.*—The tract is overrun with hills in the north-west and south-east and intersected with many roads and railways, rivers and streams, and possesses tanks of great capacity. The general character of the tract under report is that of a slightly undulating plain. In the north-west of the taluk we find jutting out a spur of the Bababudan range of hills and in the east Gardangiri forms an important land mark. In the south-east there are rocky hills, being a continuation of a range of hills beginning at Segegudda in the Hassan Taluk. The river Vedavati flows through the taluk from the south-west to north-east. The Javagal halla from the south joins near Yagati and into this river, *i.e.*, Vedavati, the whole of the surrounding country drains. The two important sources of water-supply to this taluk are the two big Tanks situated in the Chikmagalur Taluk, *viz.*, Ayyankere and Madagadakere. Ayyankere is situated between hills, its chief source of supply being Gowrihalla, which takes its rise in Mullainagiri, the highest peak in the Bababudan hills, about 6,317 feet above the sea level. After the above tank is fed by Gowrihalla, the kodi water of this tank forms the river Veda. The Veda river irrigating the lands about Sakrepatna by its channels, flows by Kadur in a north-easterly direction. The Avati has also its origin in Mullainagiri and the stream from it supplies the Madaga tank. The two rivers, *viz.*, Veda and Avati meet at Thangali, three miles south-east of Kadur and thus form the river Vedavati which has a course of about 25 miles. The taluk is not well wooded. The hill tops are bald and the tract of the country to the north-west has scrub jungle and the region round about Yemmedoddi kaval affords cover for tiger, cheeta, samber and spotted deer. The taluk to the south, north, east and north-east is maidan; the only vegetation we see is the arecanut and the cocoanut gardens.

6. *Flora.*—The tract under report is mainly maidan in nature. It is only in the north-western corner we see scrub jungle and prominent hills. The region is tolerably provided

with the common trees. The tree vegetation in the taluk is poor, especially in the eastern and the north-eastern portions. The avenue trees contribute their quota of vegetation. As the eastern and the north-eastern portions of the taluk do not contain much vegetation or plant life, the question of afforestation will be of vital importance as contributing to the material prosperity of the taluk. The tree will furnish, ready at hand, a material that has the greatest variety of application to the meeting of the wants of man and it also serves the purpose of supplying a cover to the soil to prevent wasting of the soil and to retard the flow of water.

7. *Soils.*—Every variety of soil is met with in the taluk: from the poorest sand to the best black cotton soil. The soil of wet lands is of average quality, the predominating element in it being clay or sand. Towards the north-west of the taluk, the soil is generally gravelly and towards the north and round about Yagati, the soil is poor and has a white limy appearance. In the west and portions of the east and south of the taluk, we find a soil which is a mixture of gravel, sand and red forruginous earth, best suited for the growth of palm, date or cocoanut, and here thrives the cocoanut which forms a principal product of the taluk.

8. *Irrigation and water-supply.*—In addition to the two big tanks of Ayyankere and Madagadakere with their channels, there are many tanks in the taluk and most of these are fed by channels, drawn off either from the Veda or the Avati or from the Javagal halla. The following are tanks that have a good storage of water and command extensive achkats:—

1. Javagal.	9. Gargi.
2. Nerlgi.	10. Yagati.
3. Devanur.	11. Belgur.
4. Devankere.	12. Kankatte.
5. Patnagere.	13. Keresanthe.
6. Kadur.	14. Hiriyur.
7. Macheri.	15. Nagathihalli.
8. Yellambalsi.	16. Nagasamudra.

The channels that feed tanks are silting up and the wastage of water owing to their disrepair is nothing extraordinary as this is a circumstance common to many tanks in the State. If there is a systematic and periodical clearing of silt and execution of timely repairs proper storage and regulation of water in the channels for the benefit of the land below them, the ability of such channels will be better appreciated and complaints from raiyats regarding insufficiency of water will be few, and the raiyats, I have no doubt, will be tempted to lay out their capital for the better productivity of their lands. Some channels are in fair order, but they still require improvement. There are, in the tract, irrigation wells in some of the gardens and when the supply of the tank water runs short, especially during summer, these wells supply water for irrigation. Raiyats know very well the uses of irrigation and irrigation facilities, and an improvement in this direction is eagerly sought for by them. One of the best forms of intensive agriculture at present or in ancient times, is that of irrigation. Irrigation in a way contributes to the density of population and develops a system of industrial co-operation which yields higher return of economic products for the labour employed. Irrigation will not only allow the use of lands that could not otherwise be called into service but, by proper use of lands of insufficient rainfall, they may be made to yield a larger return for the labour and capital expended. A raiyat practising irrigation knows what his income will be each year. He rises above the uncertainty of drought and fickleness of monsoons. By the help of irrigation, uncertainty of agriculture will be reduced to certainty. It may also be pointed out that the agricultural practice in dealing with irrigated land, is capable of improvement in the direction of a more economical use of water. When a raiyat is unable to apply manure to his irrigated lands, he is under the necessity of using a large quantity of irrigation water in order to secure silt in its place (in the place of manure). There can be no doubt that there are many practical difficulties in the way of procuring manure and it is not also to be forgotten that there is also a difficulty of capital to invest on improving irrigated land.

9. *Climate and rainfall.*—The general character of the climate varies chiefly with the latitude. Besides latitude, it varies under the following circumstances:—

Altitude. Longitude.

Presence of rivers. Aspect.

Character of the soil and situation as affected by shelter, slope or inclination of the ground, etc.

It generally affects not only the productivity of the land, but also the physique and character of the people. The climate of the tract under report in ordinary seasons, is generally

dry and the health of the people is generally good. There are six rain-gauge stations in the tract under report as shown below:—

Name of the station	Average	Years
Kadur	22·45	34
Sakrepatna	27·48	9
Yagati	20·23	8
Birur	17·56	9
Banavar	23·31	23
Kankatte	21·34	21

The averages of the several stations for the years available are also indicated. Another statement showing the actual rainfall at the different seasons of the year during 1913, compiled from the rainfall register, is also appended:—

Station	January to April	May	June to September	October to December	Total for the year
Kadur	1·76	3·18	8·67	8·61	22·22
Birur	0·18	6·14	10·48	4·95	21·75
Sakrepatna	2·30	3·49	15·24	9·09	30·12
Banavar	0·70	2·20	13·03	0·93	16·86
Kankatte	...	1·90	11·17	0·97	14·04

The average rainfall is, no doubt, scanty; but the rainfall during several seasons of the year is more or less ample. It will be seen from the second statement of rainfall that it decreases as we proceed to the east of the taluk. Though Sakrepatna is not within the range under report, the rain-gauge at the station is about two miles from Bannur and other villages that come under the scope of this report. I have, therefore, taken the rain-gauge record of the station to show the meteorological conditions of the due west of the taluk. Though the rainfall for the whole taluk may be considered scanty, we have the benefit of the moisture of the soil as contributed by the many tanks and the irrigation channels. This taluk, like others, depends on the monsoons. If the rains fail during July, August and September, the raiyats are face to face with drought. The taluk gets more rain during the south-west monsoon, as will be seen from the statement compiled from the rainfall register for 1913 referred to above. Every year, anxieties are felt regarding the prospects of the monsoon. The south-west monsoon brings in the greatest rainfall and the prosperity of the raiyat in any particular year depends upon the rainfall being tolerably normal in amount and seasonably distributed. The north-western portion of the taluk is said to be unhealthy, particularly in the neighbourhood of the hills. The population in those parts is sparse and this partly accounts for cultivation being in a backward state. The unhealthiness complained of is said to be due to the influence of the jungle at the foot of the hills and many years must elapse before any material change can be effected. The jungle tract can only be cleared away by the labour of an abundant population.

10. *Crops and cultivation.*—The practice of regular rotation of crops is followed in many villages of the taluk. The raiyat knows that the fertility of his field cannot be maintained at a high standard if the same crop is taken too often in consecutive years; and he knows too which crops are particularly exhausting and which exercise an ameliorating influence on the soil. The staple crops are regulated by local conditions of soil and climate and the rotations that are possible are similarly determined as the result of experience. The common system of growing mixed crops in dry lands, serves in many respects the purpose of rotation. Though there is no established system of rotatory crops, yet the principle of not overstraining the resources of the soil is fully understood by the raiyats. A crop requiring little nourishment generally succeeds an exhaustive crop and fallows are common in the case of inferior soils.

The following are the dry crops grown in the taluk:—

Wheat, jowari, ragi, cotton, Bengal gram, coriander, fenugreek, oil-seeds, beans, chillies, togari, horse gram and tobacco.

Wet crops chiefly rice and sugar-cane.

Everywhere below tanks, rice is extensively grown. The yearly quantity of this produce varies more through the fitfulness of temper of people than from any irregularity of the

seasons or want of water in tank or any untoward circumstances. Sugar-cane is grown either below tanks or with the help of channel water wherever the soil is good and the water-supply facilities are ample. The soil best suited for sugar-cane is a rich vegetable earth, which on exposure to the air, readily crumbles into fine mould. Such a soil capable of being saturated with water and easily drained after being meliorated by crops of leguminous plants or fallowing, is not extensively met within the taluk. We only come across with patches of sugar-cane cultivation here and there. At present much attention is not paid to its cultivation. It is necessary to encourage the cultivation of healthier and more prolific varieties of cane and to employ great care in cultivation and also to use more economical processes for extracting the juice and, above all, to adopt the most modern and efficient methods of refining. Garden crops are areca, cocoanut, betel-leaf, plaintains and vegetables.

Coffee gardens are very few. They are met with in Hogarehalli and Yemmedoddi kaval. In the latter place its cultivation is entirely neglected. The soil is good and the water-supply, ample. Anything and everything will grow there; but the whole estate is left in a deplorably neglected condition.

The gardens below Devankere, Devanur, Banavar, Keresanthe, Bramhasamudra Kankatte and Kadur tanks are good and flourishing. In the most of the gardens below tanks, cocoanut has taken the place of areca and betel-leaf. The growth of this plant is extended over a large area, from the south-eastern corner of the Tarikere Taluk to Kadur, Arsikere, Tiptur, Chiknayakanhalli and Gubbi Taluks and it thrives best in the taluks of Chiknayakanhalli and Tiptur. The habitat of this crop is either below a tank or by the margin of the water-spread of the tank or a low lying land or a convenient valley. A short note on the growth and uses of cocoanut is appended.

NOTE.

Cocoanut when fallen dried from the tree, planted on sandy soils, shows its first offshoots above the ground after about 3 to 5 months and at the end of the 6th or 8th month, it is fit for transplantation. At the end of eight or ten years it begins to bear fruit; and from that period onwards, it becomes a valuable source of wealth to the possessor. While it continues young, the fruit, or rather the interior of the nut, affords a palatable and nutritive food. The watery liquid within, which is termed milk, is a beverage equally pleasant and cooling and is as agreeable to the palate as invigorating to the body. When older, the cocoanut is used for a variety of a culinery purposes. The nut grown older still, when pressed yields oil and the nut itself after the juice is pressed, forms the food of the poultry and domestic animals.

The process of drawing toddy from the cocoanut tree is simple. When the tree has grown to a considerable height, one of the sprouts, technically called 'spathi,' which forms what is called a flower, is cut off nearly at its base bearing a stump sufficiently long for an earthern vessel to be attached to it into which the juice of the tree trikles and forms the liquor called 'toddy.'

The inside or soft part of the tree is used for fuel, while the more solid and external part is converted into rafters and the natural net work which surrounds the base of the branches form sieves for straining medicinal ores, etc. The boughs which support the fruit, are used as brooms as well as the husk of the shell which is converted into brushes for whitewashing.

The shell itself makes fuel and the fibres of the husk which enclose it form coir another valuable article of exportation. The cocoanut leaf is put to a great variety of uses; with the cocoanut leaf the comfortable hut or bungalow is constructed.

In the irrigated areas the yield of cocoanut is not much. Each tree gives from 60 to 75 nuts a year and in unirrigated areas, such as valleys and margin of the water spread of tank, it varies from 60 to 150 nuts. Cocoanut planted on low ground, grows to a height of 60 to 80 feet and lives about 100 years, while those in the hilly regions live about 120 years and do not reach so great a height and they take more time to bear fruit.

Regarding the percentage of distribution of the crops, ragi, gram, other cereals and oil-seeds show a large percentage. The percentage of other crops is comparatively smaller as will be seen from the statement given below:—

Jola	...	...	7·07	Oil-seeds	...	...	10·78
Bajara	...	...	·59	Tobacco	...	...	·52
Ragi	...	...	32·01	Cocoanut	...	...	2·22
Gram	...	...	13·91	Condiments	...	...	2·07
Pulses	...	...	1·48	Areca	...	...	·02
Rice	...	...	3·25	Garden produce	...	...	8·71
Other cereals	...	...	16·66				
Cotton	...	...	·71		Total	...	100·00

No. R. 11470-82—L. S. 20-16-4, dated 21st May 1917.

11. *Markets and fairs.*—In the following places, weekly markets are held:—
Birur, Javagal, Kadur, Keresanthe, Kankatte, Banavar, Devanur, Pura and Belagur.

Out of these, the markets held at Birur and Javagal are the most important. In the former market, considerable trade is carried on in areca, jaggory, cocoanuts and ragi, and in the latter, paddy and rice are extensively sold.

The markets at Arsikere, Tarikere and Chikmagalur, outside the taluk, are also resorted to.

12. *Exports and imports.*—The following are the chief articles of export:—
Cocoanut, supari, ragi, tobacco, coriander and oil-seeds.

The following are the imports:—

Piece-goods, salt, kerosene oil and Europe-manufactured articles.

13. *Manufactures.*—There are about 290 cotton and woollen mills in the tract and the manufacture in some of the villages is confined to native cloths and coarse blankets.

14. *Industry.*—In addition to several kinds of agricultural labour and the specific caste occupations, there are various modes of earning money. Raiyats, during the slack season, hire out their carts and bullocks. The collection of tangadi bark gives work to several families of madigars. Sales of grass, straw and firewood are sources of profit.

Judging from the various measures that are being adopted for bettering the condition of the people by Government for the spread of education among the masses, and the spirit of inquiry that is being engendered in people, optimistic views may be safely entertained regarding the future development of industry—particularly in the taluk and generally in the whole State.

The obstacles which prevented the adoption of the modern scientific methods of manufacture, are being removed.

Means of transport are spreading over the whole State. Capital for the purchase of machinery may now be borrowed on easy terms. In English, a common language has been found in which to transact business with all provinces of India and with a large portion of the western world. All these conditions are favourable to a great industrial development.

15. *Communications.*—The taluk is well supplied with roads. The M. and S. M. Railway line runs through the taluk almost parallel to the Bangalore-Harihar road to a distance of about 40 miles and there are four Railway Stations at convenient places. The Bangalore-Shimoga road that existed at the time of the original settlement, runs through the taluk for about 30 miles, branching off to Hiriyur, Belur and Sakepatna at Kasba Banavar; to Chikmagalur at Kadur; and to Ajjampur and Hosdurga at Birur. Since the original settlement, the following roads came into existence.

Birur-Lingadahalli;
Sakrepatna-Banavar, joining at Devanur Railway Station;
Yegati-Pura.

There are many cart-tracks all over the taluk fairy trafficable during fair weather. Owing to the improved means of communications in the taluk, there is an increase of internal traffic between the various trade centres and a considerable import and export trade in all kinds of grain produce and goods, in which thousands of carts take part with the railway. Owing to the facilities afforded by the railway for trade, prices, to the great advantage of the raiyat, have speedily doubled. With this rise in prices, the value of land has also increased; especially that of lands near railway stations which are now worth from 5 to 10 times their former value. The production of valuable or marketable crops such as coriander, cocoanut, etc., has been greatly stimulated

Before the railway came into existence, the raiyat got little benefit from an abundant harvest; his markets were limited to a small area, and if the supply was greater than the demand, as it will be in a good season, prices fell and he was deprived of the profits from the larger yield. Now the railway has altered these conditions. The improvement in communications has equalised prices in the case of agricultural produce within reasonable distance from railway stations; and when harvests are abundant, food-stuffs no longer rot for want of buyers as the raiyat has access to all the available markets. The extension of the railway and roads has thus provided outlets for surplus agricultural produce and has caused general rise of prices even in remote villages that were absolutely land-locked 30 years ago. New staples are largely grown for export while the exports of rice, cotton and oil-seeds have also greatly increased. In this way vast sums of money have reached the agricultural classes who have been able to raise their standard of living and to pay their land revenue more easily than before.

16. *present and past survey.*—In carrying out the re-survey, 26,639 old survey numbers have become 33,408 new survey numbers and this gives an increase of 6,769 numbers

or 25 per cent of the number of fields. In addition to this, every survey number was examined during re-survey and missing boundary marks were put up. As usual there was a good deal of measurement in connection with new roads.

During re-survey, every facility was given for the breaking up of large sized numbers into small ones of convenient size. The re-survey work was, on the whole, heavy. The extent of each description of land according to past and present survey is shown hereunder:—

Description of land	Former Survey acres	Present Survey acres	Difference
Arable dry crop	1,88,751	1,82,641	— 6,110
Rice or wet land	11,240	11,421	+ 181
Garden land	11,360	18,081	+ 6,721
Non-arable land	1,62,734	1,58,961	— 3,773
Total ...	3,74,085	3,71,104	—2,981

With regard to the different descriptions of land, the only item which exhibits a marked difference, is garden. The increase in garden extent is 6,721 acres, thus giving an increase of 59 per cent over the former area. The perceptible increase in garden extent, especially of wat-hukum bagait, is an index of the agricultural development of the taluk since the last survey. Thus there has been a corresponding decrease in the arable dry land as the same has been converted into wat-hukum bagait.

The above expansion of garden cultivation indicates that the raiyats are fully aware of the beneficial results of a re-settlement and they freely invest capital without being scared by the fear of an unduly enhanced assessment.

17. *Re-classification.*—The original soil classification has not been in any way altered or disturbed except in the cases of conversion of dry into wet or of kharab lands classed for the first time in the interests of cultivation; but, as per rules in force, the water classification of all the rice and the garden lands has been carefully revised.

18. *Population.*—The following table exhibits the population of the taluk for the last five census years as also the density per square mile:—

Year	Population	Density per square mile
1871	72,571	125
1881	56,756	98
1891	71,268	123
1901	85,203	147
1911	90,453	156

Between 1871 and 1881, *i.e.*, in the year 1876-8 there was famine in the State and probably no real growth of population; and it is therefore convenient to compare the population for the several census years beginning from 1881.

From the statement given above, it may be seen that the population has increased steadily from decade to decade, the increase from 1881 to 1891 being 26%; from 1881 to 1901, 50%; and from 1881 to 1911, 59%; and this increase is probably due to fairly good cycle of seasons.

I believe that, in a country like Mysore, where the great body of the people are husbandmen, where their wants are simple and few, where the expenses of rearing children are trifling, where marriage is general and where other concurrent circumstances contribute to encourage population, and where waste lands abound, the extension of agriculture will keep pace with the advance of population by lands of inferior quality or lands at inconvenient distances being taken up. But it is to be noted that the raiyats are not prone to take up inferior lands and the only remedy in the way of improving such lands would be in increasing facilities for water-supply as an inducement to convert dry lands into wet.

19. *Agricultural resources.*—As judged from census figures, it may be noted that nearly ⅔ of the population are dependent on agriculture, living at a scale of comfort very low and mainly governed in their occupation and modes of life and thought by ancient custom, caste and tradition. In the State, there is little native capital or enterprise; consequently, the burden of stimulating progress and advancing the economic condition of the people has devolved mainly upon Government. It is, of all things, desirable to ascertain whether the

No. R. 11470-82—L. S. 20-16-4, DATED 21ST MAY 1917.

rude implements and the accustomed process of the Mysore raiyat, could be advantageously supplanted by those of other civilised countries, and whether the establishment of experimental farms in various parts of the State, under the superintendence of proper persons selected by Government for the purpose, might not be useful in the way of example as a corrective of some of the disadvantages and defects of the prevailing system. We are also fully sensible that the prejudices and the indolence of the raiyat population strongly operate against any improvement. These are in fact, the most inveterate enemies to improvement in all countries; but they are nowhere invincible when we deal with them with prudence, skill and perseverance. I do not mean that we should vexatiously interfere with the usages of the raiyats or that we should attempt forcibly to change their habits; but, on the other hand, when their habits are bad, let us not plead their attachment to them. Our efforts may, for a long time, in this direction be unavailing; but, if judiciously directed, we may not despair of eventual success.

I am of opinion that however rude may be the implements and the processes of the Mysore raiyat employed in cultivation, they are not ill-adopted to the soil and climate. It may also be said that the first and the most effectual step towards the improvement of agriculture, is to improve the condition of those who pursue it. Successful cultivation lies not only in understanding the nature and preservation of soils and the adaptability of crops to them, but also in a study of the best machinery, its care and use and the careful watching of the markets in order to know what to produce and when to market it at a given price.

To ensure better husbandry, there are a few impediments, such as the fewness and weakness of cattle, the want of manure and want of proper water-supply, and these defects will, I hope, disappear with the advance of time.

A statement is given hereunder showing statistical information collected during re-survey operations:—

Items		At original settlement		As per re-survey		Increase or decrease; + or —
Houses	Thatched	10,532		9,880		— 452
	Mud-roofed	612		557		— 55
	Tiled	5,526		9,874		+ 4,348
Carts	Halli	694	1,821	32	4,066	+ 2,245
	Chakada	1,127		2,539		
	Wadder	...		1,495		
Ploughs		11,769		14,640		+ 2,871
Wells	Irrigation	...		114		+ 114
	Others	...		419		+ 419
Horned cattle		63,403		78,610		+15,207

It will be seen from the above statement that there has been a marked decrease in the thatched and mud-roofed houses and an appreciable and desirable increase in tiled house sand the other items, *viz.*, cattle, carts, ploughs, etc.; the increase is patent thereby showing that there is at present a considerable material progress when compared to what it was 30 years ago.

Subjoined is a statement showing the agricultural capabilities of the taluk:—

Taluk	Square miles	Area in acres				Proportion cultivated to uncultivated	Percentage of cultivated land on total area	Population			Number of cultivated acres for one man
		Cultivated	Uncultivated	Waste Forests, etc.	Total			Agriculturists	Others	Total	
Late Banavar ...	580	1,50,063	57,927	158,960	366,950	13 to 5	40	58,327	12,650	70,977	3 acres

Judging from the statement, there is yet room for waste lands being brought under cultivation and there will be a corresponding increase in the cultivated area per head of population. This, I hope, will be realised a few years after the introduction of the re-settlement.

No. R. 11470-82—L. S. 20-16-4, DATED 21ST MAY 1917.

As cultivation advances, the area of waste land available for grazing steadily diminishes and the prospects of the cattle are becoming worse rather than better. Their only hope lies in the introduction of fodder crops as a regular stage in the agricultural course.

Goats and sheeps are found in every village. No trouble is taken for their breeding. The former are hardy and shift for themselves, costing practically nothing to their owners for food. Under these circumstances, they may be considered as a source of profit. But, as far as the community is concerned, the goats cause more loss than gain; for, they roam over the unfenced country browsing on any crop that is not strictly guarded and making tree growth impossible in place where it would otherwise take place. Sheep are grazed in large herds. Many shepherds come from the adjoining taluks or districts and they lead a migratory life in several villages at a time when they pen their flock in fields having no standing crops on them. The cultivating raiyat welcomes such flocks for the manure for which the shepherds are paid partly in kind and partly in money. The prices of cattle have, in the last few years, increased considerably and the cause of such an increase is not far to seek. Years ago, cultivation was scanty. Lots of waste lands were available for pasture and this enabled raiyats to rear cattle in sufficient numbers. But with the advent of more settled conditions, a large increase in cultivation occurred and thereby reduced the area of grazing grounds.

20. *Condition of the people.*—The position of the agriculturists serves as a true index to the condition of the people generally. If the agriculturist thrives, his labourers will be well looked after; the merchant will drive a busy trade and the artizans and other craftsmen will live in ease and comfort.

The state of the tract under report has changed considerably. There have been improvements in communications; rise in the value of agricultural products and rise in the value lands. Population has become denser. I do not see much poverty among the raiyat population. Any ordinary raiyat, owning a few acres of land, is able to live well and with contentment. The raiyats are fairly thrifty and spend their savings, at least to some extent, on lands.

The great increase during the last thirty years in trade and commerce, the use of post and telegraph, the use of savings bank for deposits, the rise in urban wages and the expanding revenue under various heads, all testify in various degree to the steady growth of general prosperity. So far as ordinary tests can be applied, the average land-holder, raiyat, trader or artisan is now better off than he was thirty years ago. He consumes far more luxuries and is in need of more conveniences. Brass and other metal vessels have taken the place of the coarse earthen vessels of earlier times.

21. *Education.*—Education may now be said to have entered upon a progressive phase. Popular education is proceeding at a rapid rate, though its results are not yet conspicuous. It is expected by all well wishers of the country that the popular education that is being imparted will bring with it not only fullness of knowledge, but will also promote strength of will, directness of purpose and will also result in the proper training and improvement of character of persons.

22. *Sanitation and health.*—In the tract under report and other places in the State, vigorous steps are being taken for the improvement of sanitation in villages and the results in some places have been satisfactory. Even in small villages, the observance of simple sanitary rules has been inculcated.

As regards practical sanitation, the cardinal requirements everywhere are doubtless the clearing of premises and streets, the safe removal and disposal of house sewage and the careful guarding from contamination of drinking water. In crowded villages, it is desirable that the most efficient arrangement regarding drainage should be to level and improve the surfaces of public streets, lanes and house compounds, to provide for ready escape of rain and surface water by well made impervious surface drains, so that all water may flow rapidly away and form no surface pools and to combine with this, an efficient conservency system to keep as much of the house sewage as possible out of the surface drains. Shutting up bad wells and improving and protecting existing wells from sub-soil pollution, will be another step in sanitation.

We all know in a general way that a piece of work may be very much delayed if many of the labourers are in bad health, but it is only the employers of these labourers who can realise how great a hinderance this loss of time is for production. Thus the improvement of sanitation is most important, not only because it will keep more labourers alive, but also because it will keep many more labourers in good health and fit for work.

The establishment of a department for the systematic registration of births, marriages and deaths, will be of great use in the examination of questions depending upon various contingencies connected with human life.

No. R. 11470-82—L. S. 20-16-4, dated 21st May 1917.

23. *Labour and wages.*—Agricultural labourers are paid partly in money and partly in kind. The wages of agricultural labour are much higher than they used to be at the original settlement and this is solely attributable to the increased demand for labour of this description

24 *Prices of produce.*—They have increased as in other parts of the State. With the advantage of a favourable land tenure and the good cycle of seasons, there has been an increase in population and this increase necessarily led to the cultivation of poorly productive lands On these lands the returns are disproportionately costly and are nearly as expensive as on superior lands. All these causes, therefore, contribute to the rise in prices.

25. *Value of land.*—The land value has increased as in other taluks. I have had examined 309 cases of sales and 151 cases of mortgages in which the aggregate amount of sales comes to Rs. 1,03,347 and mortgages. to Rs 98,857. The lands, when sold, realised on an average 30 times the assessment and loans raised on mortgages, 34 times the assessment.

26. *Agricultural indebtedness.*—It is no peculiarity of Mysore that agriculture can hardly be carried on without credit; but the vicissitudes of season to which the country is liable often increase the risks that are a consequence of that fact.

A higher standard of living has permeated all classes of society and agriculturists are no exception. As the standard of comfort has risen, wants of every kind and demands for expenditure have increased, and with this increase has come more frequent necessity for recourse to the money lender

The raiyat is without capital and he cannot be without borrowing at one time or another. The Agricultural Banks and Co-operative Credit Societies which have only touched the fringe of agricultural indebtedness, have made a successful start If they progress, it will not only secure money on easy terms to the agriculturist. but will encourage thrift, and there is every hope that in years to come this remedy for agricultural debt will prove to be efficacious.

27. *Revenue history.*—The accounts regarding the revenue collections of the 254 villages of the Kadur Taluk which form the bulk of the late Banavar Taluk, are not available in the taluk office for 16 years beginning with the year of introduction of the original settlement, as noted in the margin, even under the heads of total area and collections, let alone the babwar details Even the accounts that have been furnished for the remaining years, are wanting in details for some of the intervening years The accounts for the remaining 133 villages, forming part of the present Arsikere and Hosdurga Taluks, have been furnished by the taluk offices concerned But as these 133 villages constitute only a little more than a third of the taluk under report, no definite idea can be formed of the remarkable expansion of cultivation and the increase of revenue which have taken place during the currency of the original settlement if I were to attempt to discuss and base my conclusions on statistics of these villages by themselves, or on the statistics of such a fragmentary nature as the figures supplied by the Kadur Taluk. I have, therefore, had to compile Appendix A from the collection figures submitted annually to your office. These accounts, though wanting in babwar details, exhibit the Revenue History of the taluk for 33 years from 1878-79 to 1911-12, the figures for the year 1910-11 alone being wanting.

From 1878-79 to 1890-91	13 years	
For 1892-93, 1893-94 and 1896-97	3 years	
Total	16 years

It will be seen from the above that the total collections, when compared with those of 1878-79, which have been taken as the basis of comparison, have gone down by 7 per cent during the first quinquennial period which followed close upon the famine of 1876-78, the result of which, as has been pointed out in several of the previous revision settlement reports was a great loss of men and cattle and a crippling of the resources, more particularly of the raiyat population throughout the entire State. As population began to increase and the raiyats gradually recovered from the effects of the famine, more and more land was taken up for cultivation, as a result of which the total area under occupation which was 94,680 acres in 18 78-79, rose in 1911-12 to 164,486 acres, or 74 per cent. The revenue collections have also commensurately increased, until the figures reached to Rs. 1,79,579 in the year 1911-12 which has resulted in an increase of 46 per cent over the collection of 1878-79. These facts are enough to show that there has been a steady and substantial progress in the tract under report both in point of cultivation and revenue.

No. 11470-82—L. S. 20-16-4, dated 21st May 1917.

28. *Grouping and maximum rates.*—In the foregoing paragraphs, I have dwelt upon the various factors which help to determine the question of levying the revised rates and for this purpose I now come to the grouping of villages. All the groups of the original settlement have, in an equal degree, participated in the material progress of the tract in the shape of expansion of cultivation, increase in the agricultural resorces and improved means of communications. I do not, therefore, propose to disturb the original grouping. For the purpose of distributing the revised rates, 433 villages of the original settlement, which have been reduced to 381 by absorption and amalgamation, as stated in para 2 above, will be devided into the following groups:—

Group I.—One hundred and ten villages situated in the south of the original taluk, enjoing a favourable climate and participating in the facilities for trade accruing from the Railway line from Shimoga to Bangalore. For these, I propose a maximum dry rate of Rs. 2-8-0 and a maximum wet rate of Rs. 7-12-0.

Note.—At the original settlement, this group consisted of 129 villages with a maximum dry rate of Rs. 2-0-0 and a maximum wet rate of Rs. 7.

These rates are not at all appreciably high when compared with the rates prevailing in the adjoining villages of the late Harnahalli, Belur and Chiknayakanhalli Taluks.

Group II.—One hundred and seventy-one villages, forming the central portion of the whole taluk. For these villages, I propose a maximum dry rate of Rs. 2-2-0 and a maximum wet rate of Rs. 7-4-0.

Note.—At the original settlement, this group consisted of 184 villages with a maximum dry rate of Rs. 1-12-0 and a wet minimum, of Rs. 6-8-0.

These rates are moderate when compared with the rates of the villages of the adjoining taluks—the late Budihal, Tarikere and Chiknagalur.

Group III.—One hundred villages forming a tract with a comparatively small rainfall situated to the north of the taluk and bordering upon the Chitaldrug District, For these, I propose a maximum dry rate of Rs. 1-12-0 and maximum wet rate of Rs. 6-12-0.

Note.—At the original settlement, this group consisted of 105 villages with a maximum dry rate of Rs. 1-8-0 and a wet maximum of Rs. 6-0-0.

The rates for this group will stand justification when compared with those prevailing in the adjoining villages of the late Budihal and Tarikere Taluks.

29. *Garden maximum.*—The old maximum for tank-irrigated gardens, was Rs 16 and for well-irrigated gardens, Rs. 6. I now propose a maximum rate of Rs. 12 for tank gardens. After giving the subject my most attentive consideration, I have come to the conclusion that the most favourably situated gardens with the best description of soil, would not bear a higher rate of assessment than Rs. 12 per acre. Gardens that do not depend on Government irrigation works are assessed under the rules of 24th January 1902:—

The following statement gives the rate for the different kinds of gardens including minor inam and waste gardens.

No.	Description of land	As per original settlement report figures			As per revision settlement			Increase or decrease per cent
		Acres	Assessment	Average rate	Acres	Assessment	Average rate	
			Rs.	Rs a. p.		Rs.	Rs. a. p.	
I	Tank gardens	...	...	..	3,036	15,753	5 3 0	...
II	Gardens receiving indirect benefit from tanks, streams, etc,	...	...	...	816	2,086	2 8 11	...
III	Gardens under self-dependent wells.	...	...	..	102	193	1 14 3	...
IV	Gardens as in III but water supply failed	...	..	...	144	166	1 4 8	...
V	Old watt Hukum	..	...	...	8,757	16,495	1 14 2	...
VI	New motstal	...	...	...	158	281	1 12 5	...
VII	New gardens under wells sunk since the original settlement and new cocoanut gardens.	...	..	...	5,075	7,165	1 6 7	...
	Total ...	11,099	28,993	2 9 10	18,088	42,159	2 5 4	—11

No. R. 11470-82—L. S. 20-16-4, DATED 21ST MAY 1917.

As separate figures and averages for tank and well gardens for the original settlement are not to be had, no comparison can be instituted as between details.

The averages for all kinds of gardens will, under these proposals, come to Rs. 2-5-4 against Rs. 2-9-10 of the original settlement.

Gardens irrigated by tanks have been assessed on the average at Rs. 5-3-0 per acre and gardens receiving indirect benefit from tanks, streams, etc., at the comparatively low average of Rs. 2-8-11. That special care has been taken in the treatment of gardens under self-dependent wells and of new gardens is apparent from the low averages at which they are assessed. On the whole, the decrease of Re. 0-4-6 per acre or 11 per cent for all kinds of gardens, though there has been an increase under garden area and total assessment, bears ample testimony to the moderation with which gardens have been assessed under my proposals.

30. *General results of revision.*—The following table showing the results of my proposals under the different descriptions of cultivation for all Government occupied lands :—

Description	By former settlement			By revision settlement			Per acre	
	Acres	Assessment	Average rate	Acres	Assessment	Average rate	Increase	Decrease
		Rs.	Rs. a. p.		Rs.	Rs a. p	Rs. a. p.	Rs. a. p.
Dry	1,44,603	1,12,805	0 12 6	1,22,189	1,17,380	0 15 4	0 2 10	.
Wet	9,582	36,231	3 12 6	9,994	42,170	4 3 6	0 7 0	...
Garden	10,987	28,618	2 9 8	17,880	43,568	2 7 0	.	0 2 8
Miscellaneous	..	3,287	...	.	...	..	..	..
Total ...	1,65,172	1,80,941	1 1 6	1,50,063	2,03,118	1 5 8	0 4 2	..

The net result of the settlement under the proposed revision will be an average increase of Re. 0-4-2 per acre of occupied area, showing an increase of Rs 22,177 or 12 per cent.

31. The distribution of the above increase over the several descriptions of occupied lands in the different groups is shown below :—

Group	Description of land	As per collection of the year 1913-14			As per revision survey			Increase or decrease in the average rate	Percentage	
		Acres	Assessment	Average rate	Acres	Assessment	Average rate		Increase	Decrease
			Rs.	Rs. a. p.		Rs.	Rs. a. p.	Rs. a. p.		
I	Dry	33,821	31,568	0 14 11	29,730	34,825	1 2 9	+0 3 10	26	...
	Wet	1,529	5,691	3 11 7	1,220	5,274	4 5 2	+0 9 7	16	...
	Garden	1,811	4,401	2 6 11	3,636	8,320	2 4 7	—0 2 4	...	6
	Miscellaneous ...	...	4	... ..	...	...	.....	... ..	...	...
	Total ...	37,161	41,664	1 1 11	34,586	48,419	1 6 5	+0 4 6	25	..
II	Dry	66,836	54,005	0 12 11	57,301	57,811	0 15 10	+0 3 11	23	..
	Wet	5,142	20,515	3 15 10	4,393	22,274	4 7 4	+0 7 6	12	...
	Garden	5,227	16,482	3 2 5	8,352	24,325	2 14 7	—0 3 10	...	8
	Miscellaneous ...	...	1,031	.....	...	...	.....	.....	...	...
	Total ...	77,205	92,033	1 3 1	70,646	1,03,410	1 7 5	+0 4 4	23	...
III	Dry	43,946	27,232	0 9 11	35,168	25,744	0 11 9	+0 1 10	18	...
	Wet	2,911	10,025	3 7 1	3,781	14,622	3 13 11	+0 6 10	12	...
	Garden	3,949	7,735	1 15 4	5,892	10,923	1 13 8	—0 1 8	...	5
	Miscellaneous ...	...	2,252	.....	...	...	....	.....	...	...
	Total ...	50,806	47,244	0 14 11	44,831	51,289	1 2 4	+0 3 5	23	..
Total	Dry	1,44,603	1,12,805	0 12 6	1,22,189	1,17,380	0 15 4	+0 2 10	23	...
	Wet	9,582	36,231	3 12 6	9,994	42,170	4 3 6	+0 7 0	12	...
	Garden	10,987	28,618	2 9 8	17,880	43,568	2 7 0	—0 2 8	...	6
	Miscellaneous ...	...	3,287	.....	...	...	.....	.....	...	..
	Total ...	1,65,172	1,80,941	1 1 6	1,50,063	2,03,118	1 5 8	+0 4 2	24	...

From the above table, it is seen that the average rate for the whole taluk has been raised from Re. 1-1-6 to Re. 1-5-8 which has resulted in an increase of Re. 0-4-2 or 24 per cent per acre. Taking the various descriptions of land in detail, the average rate for dry land shows an increase of Re. 0-2-10 per acre or 23 per cent; the average wet rate shows an increase of Re. 0-7-0 or 12 per cent, while the garden rate shows a decrease of Re. 0-2-8 or 6 per cent. The increase of 26 per cent in the dry average rate in group I is due to the soil being of a superior description.

The average rates of other descriptions of lands in the other groups are, I am satisfied, very moderate and call for no remark.

32. The following statement shows the extent of arable lands still unoccupied and of the assessment they bear under my proposals:—

Group	Dry			Wet			Garden			Total		
	Acres	Assessment	Average rate	Acres	Assessment	Average rate	Acres	Assessment	Average rate	Acres	Assessment	Average rate
1	2	3	4	5	6	7	8	9	10	11	12	13
		Rs.	Rs. a. p.		Rs.	Rs. a. p.		Rs.	Rs. a. p.		Rs.	Rs. a. p.
I ...	11,528	10,350	0 15 1	50	203	4 1 0	23	82	1 6 3	11,601	11,085	0 15 3
II ...	23,474	17,417	0 11 10	497	1,975	3 15 7	35	82	2 5 6	24,006	19,474	0 13 0
III ...	22,155	13,510	0 9 9	122	439	3 9 7	43	85	1 15 8	22,320	14,034	0 10 1
Total ...	57,157	41,777	0 11 8	669	2,617	3 14 7	101	199	1 15 6	57,927	44,593	0 12 4

It may be seen from the above that there are 57,927 acres of unoccupied area, assessed at the average rate of Re. 0-12-4 per acre, still available for cultivation, showing that there is ample scope for expansion of cultivation.

33. *Effects of the proposed settlement by groups.*—This is shown in the following table:—

Group	Number of villages	By former survey		By revision survey						Increase or decrease on occupied land
		Government occupied land		Government occupied land		Government assessed waste		Total		
		Acres	Assessment	Acres	Assessment	Acres	Assessment	Acres	Assessment	
1	2	3	4	5	6	7	8	9	10	11
			Rs.		Rs.		Rs.		Rs.	
I	110	37,161	41,661	34,586	48,119	11,601	11,085	46,187	59,504	+ 16
II	171	77,205	92,033	70,646	1,08,410	24,006	19,474	94,652	1,22,884	+12
III	100	50,806	47,214	44,831	51,289	23,320	14,034	67,151	65,323	+ 9
Total ..	381	1,65,172	1,80,941 Mts. 3,287 1,77,651	1,50,063	2,03,118	57,927	44,593	2,07,990	2,47,711	+12

There has been an increase of Rs. 22,177 or 12 per cent for the whole taluk over the collections of 1913-14, which has been obtained by the increases in the dry and the wet rates and it has been fairly distributed over the three groups corresponding with variations in the cultivation and the assessment proposed.

34. The following comparative statement shows the different descriptions of lands, their assessment under the occupied area according to the estimates of the original and revision settlements and also as they stood with reference to the collections of the year 1913-14.

No. R. 11470-82—L. S. 20-16-4, DATED 21ST MAY 1917.

As per original settlement report figures

	Total ...	1,50,063	2,03,118	1 5 8	57,927	44,593	0 12 4

My proposals are expected to yield a total assessment of Rs. 2,03,118 against Rs. 1,80,941 the actual collections of the year 1913-14 including miscellaneous revenue, *viz.*, Rs. 3,287, which gives an increase of Rs. 22,177 or 12 per cent.

35. The limits of 66 per cent prescribed for villagewar increase has not been exceeded except in the case of Kallahalli (serial No. 26 in the 3rd group) where a large extent of dry land has been converted into wet.

36. *Cesses.*—The local funds and the irrigation cesses will be a separate levy under separate rules.

37. A coloured map showing groups, etc., and the usual appendices are herewith submitted.

38. The settlement will, of course, take effect from the year following that in which it is announced.

39. In conclusion, I beg to state that thirty years is not a short space in the history of the development of the taluk. Of material progress there are, on every hand, abundant signs. All sections of the community are, from year to year, better housed, better clothed and better fed. The contentment of the people, the growth of luxurious demands and the expansion of trade, must be admitted as prognostications of prosperity and the future is very likely to reveal a prosperity in manufacturing enterprise, destined to protect the soil from the strain of over population.

40. It remains for me to notice that the proposed rates are moderate and reasonable that the general results are not unfavourable in a financial point of view and to solicit, therefore, the sanction of Government for the proposed rates.

APPENDIX A.

Revenue Statement for villages of late Banavar Taluk of the Kadur District from 1878-79 to 1913-14.

Years	Occupied lands paying assessment								Remission	Revenue collections after deducting remissions	Miscellaneous Revenue	Total Revenue columns 11 and 12

No. R. 11470-82—L. S. 20-16-4, dated 21st May 1917.

3. In modification of the Deputy Superintendent's figures relating to total revenue, original and proposed, I submit the following statement which shows exactly what the effects will be under the rates proposed.

Total area occupied in the year of revision survey		Total assessment on occupied area		Difference	Percentage of difference
As per original settlement according to taluk accounts	As per re-survey accounts	As per original settlement	As now proposed		
1	2	3	4	5	6
Acres	Acres	Rs	Rs.	Rs.	Rs.
1,49,583	1,50,063	1,70,424	2,03,118	+32,694	19·2

The discrepancy in area, 480 acres, is due in part to the correction of errors in the measurement or computation made at the original survey, and in part to cases of temporary occupancy in kharab lands, granted by the Revenue Department, but not brought on to the Akarbands and other survey records.

4. The irrigation cess of an anna for every rupee of the assessment on rice land, and on gardens benefited by the existence of sources of irrigation the rights on which vest in Government, *will be an additional levy* as the Deputy Superintendent has stated in para 36 of the Report.

5. I now come to the vital question of rates. The dry and the wet rates are considered by the Revenue Commissioner and the Deputy Commissioner as not being altogether suitable. I regret to be unable to concur in the views expressed by those officers, and beg to assure you that all sides of the question had been exhaustively discussed between the Deputy Superintendent and myself before the new rates were pitched upon.

6. The Deputy Commissioner in his letter No. G. C. 1544, dated 23rd November 1916, copy of which is appended, agrees that the proposed dry rates are fair and equitable, but the Revenue Commissioner thinks that the rate for the second group should be enhanced still more, so as to make it equal to or nearly equal to the rate on the first group. It has oft and on been brought to the notice of Government that a change of grouping ought not to be thought of except for sufficiently weighty reasons. I beg to invite attention to Section 18 of the Maddagiri Taluk report, where I had attempted to explain the complications that would result from the transfer of a village to a higher or a lower group. In the case of the second group of Banavar Taluk, the considerations advanced by the Revenue Commissioner, namely, the Railway, and the change of taluk headquarters from Banavar to Kadur, are circumstances justifying an increase of the old rate up to a certain limit, but are not strong enough to justify a complete effacement of the well-marked distinction made between the groups at the old settlement. The coloured map accompanying the Report will show that the 1st group is a block pretty regular in shape, with the Railway cutting through it almost in a diagonal line, whereas the centre and the east of the 2nd group are not benefited in an equal degree with the westerly portion, because of the great width occupied by this group from west to east. Not only are those parts worse off in point of distance from the Railway, but the majority of the villages there are connected, neither among themselves nor with the Railway, by easily negotiable village tracks. The Deputy Commissioner rightly lays stress on that matter, in para 3 of his letter which reads as follows—"The whole of the northern "and eastern portions lying to the east of the main Bangalore-Honnavar road, which forms "nearly two-thirds of the taluk, is almost entirely without roads. There are no doubt some "cart-tracks between the more important places in the several hoblis, but there are no re-"cognised or regularly maintained roads, and the tract being intersected by several small "streams or hallas, access to these parts is always attended with some difficulty, which is "increased during the rainy season." I beg to urge also, that in point of rainfall, these villages in the centre and the east are not so well off as the Banavar block is. The past average at Banavar is, according to the latest published Rainfall Report 23·56 inches (page 17). Moving northward, we find Kadur in the 2nd group registering 21·98 inches (page 21), while in the farther north Birur, also in the 2nd group, has only 19·77 inches (page 23). The rainfall diminishes eastwards also, where the country begins to merge into the zone where the precarious behaviour of the monsoon is, year after year, a matter of particularly grave anxiety to the raiyats. Kanagatta village in the 2nd group situated east of Banavar and Kadur, registers a fall of 21·40 inches (page 17). These facts are proof of the inferiority of the 2nd group in point of seasonal conditions, which neither Railway nor change of taluk headquarters can alter, and there appears to be very little justification for destroying the very skilful disposition of the villages in groups, and the differentiation in rates, adopted at the original

settlement. The Revenue Commissioner's suggestion, if carried out, will prove the more harmful if, as he proposes, the 3rd group were to be left in tact, for, the difference of treatment between the 2nd and the 3rd groups will have become the more striking, and the consequent discontent would be so much the greater. Under all these circumstances, I cannot find it in my conscience to agree in the suggestion for any larger increment than an average of 2 annas, 11 pies, acre, that will be imposed under the Deputy Superintendent's proposals on dry land in the 2nd group, as is shown in the table given in para 31 of his Report. It is suggested further, that, should the bringing of these villages under the maximum for the 1st group be considered a measure too drastic to be good, the two groups may at least be approximated by means of a reduction tn the rate for the first group. I confess I am surprised at the mode of reasoning that has led the Revenue Commissioner to propose this alternative, for, while it is evident that he has nothing to urge against the fairness of the rate in itself, as proposed for the first group, he would have us reduce it solely because the rate on the second group deserves, in his opinion, to be more closely approximated to it. The alternative wears the look of a device of compromise, directed rather to satisfy a theory based on considerations of symmetry which unduly belittles the necessity of the well-marked distinction drawn for solid reasons, at the Original Settlement, between the two groups, and which for reasons stated above is well worth-continuing during the term of years to which the revised settlement relates. If it be not unfair to demand a certain increment from a certain tract, it is scarcely a sound proceeding to sacrifice part of that increment merely because a neighbouring tract with lower assessment is deemed to be equally well-conditioned. I am not at all convinced of the necessity or the desirability of either raising the maximum of the second group, or of lowering that of the first.

7. An increase of 12 annas to the existing wet maxima of Rs. 7, Rs. 6-8-0 and Rs. 6 and resulting in an average increase of 12 per cent to the average wet rate, has been characterised as being unduly heavy. It is a well-understood fact that Rs. 9 is a maximum commonly adopted at revision settlements for rice land in maidan taluks, irrigated by sources other than river-channels. One cannot therefore discover how objection could decently be taken against the maxima proposed (Rs. 7-12-0, and Rs. 7-4-0, Rs. 6-12-0) for a taluk standing astride of the chief highway of the State, the Railway and in which seasonal and other conditions bearing on agriculture are at least on a par with those prevailing in the majority of the maidan taluk. The grounds advanced for greater moderation are of the usual kind the uncertainty of the monsoons, the silting of tanks, the increased cost of cultivation and so on. But all these are the common lot of the raiyat everywhere and it is precisely on account of these difficulties that a very safe and wide margin of his profits is left to him, and a modest 12 per cent is claimed, against prices secured for the rice alone which brings him considerably over 100 per cent, as may be seen from a statement appended to this letter, which is intended to illustrate the remarks on prices in para 24 of the Settlement Report. Let us also be mindful of how far Government have gone during the currency of the present settlement, in spending money over the improvement of irrigation within the tract; it is found from figures obtained from the Public Works Department, that the extraordinary sum of over six and three-fourths lakhs of rupees has been expended on this head. Taking the average total land revenue roughly at one and half lakhs a year (*vide* Appendix A to the Report), the average collection on wet land alone at thirty-six thousand rupees, and that on bagayet dependent directly on tank water at about Rs. 16,000, it is clear that money amounting to four and half times the total annual revenue, seven times the wet and garden revenue, and eleven times the wet revenue, has been given away for works connected with irrigation. It ought not in the face of these facts, to be possible to object to the very modest demand now proposed on wet land. I give below the exact figures, analysed according to the settlement groups, which will help to show also, that the area comprised in the two lower groups have benefited far more from the outlay on irrigation, than the villages of the first group, and that there is very good reason for applying a 12 anna increase all round, to the old maximum of each of the groups.

	Rs.
Group I	... 88,937
Group II	... 2,72,870
Group III	... 3,14,884
Total Expenditure ...	... 6,76,691

It is well to recognise besides, that the argument from defective communications does not apply to the produce of wet lands with the same force as it does to dry-land produce, for, rice the staple wet corp, is, bulk for bulk about four times as valuable as ragi.

8. In conclusion, I beg that the orders of Government on the subject may be kindly obtained very early so as to enable me to introduce the new settlement in good time.

No. R. 11470-82—L. S. 20-16-4, DATED 21ST MAY 1917.

ENCLOSURE I TO A. III.

Statement of prices of the principal articles of agriculture in Banavar Taluk.

Period	Seers per rupee			Rupees per maund		Coconuts per 100	Remarks

ENCLOSURE II TO A. III.

Letter No. 923, dated 12th February 1917, from Mr. C. Rajagopalacharlu, Deputy Superintendent, Mysore Revenue Survey, to the Superintendent, Revenue Survey in Mysore.

With reference to your D. O. No. 56, dated 14th December last, and Memo No. 647, dated 29th January 1917, forwarding respectively, for my opinion, the remarks of the Deputy Commissioner, Kadur District, as well as those of the Revenue Commissioner, on my proposals for revising the rates of assessment of the late Banavar Taluk, I beg to submit the following further information and explanation of my proposals.

2. Referring to the discrepancy pointed out by the Deputy Commissioner in the nomenclature of the Yegati-Pura road I have to point out that as the road between Yegati and Pura is connected with Birur, it has, strictly speaking, to be styled as Birur-Yagati-Pura road.

3. The Deputy Commissioner proposes the lowering of the wet maximum, but the arguments adduced are not convincing enough to call for such a step being taken. The reasons for increasing the dry maximum apply with equal force to the increase of the wet maximum. In para 7 of my report, I have mentioned that the soil of wet lands in the taluk is of average quality; but this does not mean that it is poor or worthless. Towards the north and round about Yegati, the soil is no doubt poor; but this state of things is capable of improvement by the use of manure. Silting up of channels and wastage of water are shown as defects now prevailing; but these defects have to be mended by the authorities concerned and cannot be made the grounds for lowering the wet maximum. The soil suited for sugarcane cultivation is limited, but there is nothing to prevent the raiyat from growing paddy. In my note under all the groups, I have shown the suitability of the proposed rates when comparing with the rates prevailing in the villages of the neighbouring taluks. I had carefully inspected the *locale* where the tanks are and the maximum rate I have proposed for the wet lands is in general assimilation with the rates imposed on rice lands in the adjoining taluks.

4. What has been stated in para 11 of my report about markets, has evidently been misunderstood by the Deputy Commissioner. I never stated that there were no markets of importance in the taluk for the sale of paddy or rice; but, on the other hand, I have distinctly mentioned that paddy and rice are extensively sold in the market held at Javagal.

5. *Para 3 of the Revenue Commissioner's criticism.*—In my opinion the circumstances cited by the Revenue Commissioner are not sufficient to change the groups or club together groups I and II. A new grouping of villages should be made only if called for by sufficiently weighty reasons and I am of opinion that the circumstances of the taluk have not undergone such marked changes during the currency of the last thirty years' lease as to have materially altered the condition and rateable position of particular villages or groups of villages. The question of grouping had, of course, engaged my attention and in this matter I had the benefit of the experience of the villagers themselves who are generally well acquainted with the relative value of each of the groups of villages into which they have been accustomed to subdivide the country in their own immediate neighbourhood. I had also considered the advantages that each group may happen to possess in its irrigation, vicinity to market towns

or productive power of the land, and my knowledge of the situation, the requirements and advantages and disadvantages of each group, makes me confident that the relative value assigned to each group may remain undisturbed; and thus no change in the maximum is necessary.

6. *Para 5 of Revenue Commissioner's letter.*—During re-settlement, improvements effected by a raiyat such as the construction of a well, conversion of dry crop into garden land, the repair of an old well the planting of trees, etc, are not at all taken into consideration and these factors are exempted from assessment. The exemption is allowed in fairness to the raiyat for his labour and expense and is of material help to him generally as well as affording an incentive to the expansion of cultivation. This is what I mean by "beneficial results."

7. *Para 6 of the Revenue Commissioner's letter.*—As regards the lowering of the wet assessment, I have already pointed out in para 3 *supra* that the so called defects are defects that can be mended, but not calculated to warrant any lowering of the wet maximum. When compared with the wet rates prevailing in the maidan taluks in the State, my rates will not be construed as being heavy. It must be borne in mind that in the case of wet lands, the raiyat gets water from a Government source and pays so much for the use of water, such charge being calculated to yield us a percentage on the outlay expended by the State in constructing and maintaining the work of irrigation; and the progress of events has shown that however generous this is to the raiyat, it is not just to the State on whom the demands for improved administration, education and other advantages in keeping with the times, the benfits of which accrue to the raiyat directly or indirectly, have increased to such an extent as to make our former revenue unequal to the strain of the present days.

8. *Para 8 of the Revenue Commissioner's letter.*—With regard to para 8 in which the Revenue Commissioner takes objection to the comparison instituted as being faulty on account of there not being a common basis of acreage for the old and revised rating, I beg to state that I have adopted the practice hitherto in vogue for all the settlement reports of comparing the total revision assessment with the total assessment actually realised during the last year for which the Amildar is in a position to supply the figures.

9. *Para 9 of the Revenue Commissioner's letter.*—I regret very much that there has been a mistake in the entry of assessment against the village of Basavanhalli, No. 32 in class III of Appendix II, owing to the existence of two villages of the same name near each other in the same group.

10. In conclusion, I beg to add that I see no reason to doubt that by the principles enunciated for the guidance of those engaged in the revision of assessments, the share assured for Government is everywhere kept within a reasonable limit and the proposed rates are therefore not oppressively high or repressive of enterprise.

11. The communications of the Deputy Commissioner and of the Revenue Commissioner under reply, are herewith returned.

ENCLOSURE III TO A. III.

Letter No. G. C. 1544 of 1916-17, dated 23rd November 1916, from Mr. B. Ramaswamaiya, Officiating Deputy Commissioner, Kadur District, to the Superintendent Revenue Survey in Mysore.

With reference to your letter No. 186, dated 12th October 1916, forwarding copy of report from the Deputy Superintendent of Revenue Survey containing proposals for the revision of assessment of 381 villages of the late Banavar Taluk as it stood at the original settlement, and requesting to be furnished with my opinion thereon, I have the honor to state as follows:—

It is observed that the present Kadur Taluk has appropriated 248 villages in the central and northern portions of what constituted the late Banavar Taluk, and the remarks that follow will relate to these portions only, the remaining 133 villages belonging to the Chitaldrug and Hassan Districts.

2. There is no doubt that, along with the rest of the country, the taluk has progressed considerably since the time of the original settlement, as evidenced by the increase in the density of the population, and the rise in the value of land and of agricultural products. The population of the area comprised in the late taluk has risen from 56,756 in 1881 to 90,453 in 1911 and the density per square mile from 98 to 156. The prices of produce have risen very largely, and the value of land has also increased to a very considerable extent. These are features common to all parts of the State.

3. The Settlement Officer observes, in speaking of the physical features of the tract (para 5), that it is intersected by many roads, and referring to communications, observes in para 15, that the taluk is well supplied with roads. He adds that since the original settle-

ment three district road connections, *viz.*, Birur Lingadahalli, Sakrepatna-Banavar and Yegati-Pura have come into existence. With regard to this, it must be mentioned that the description is not accurate, at least so far as the Kadur Taluk is concerned. The taluk, large as it is in area, is, it must be said, served very poorly by road communications. Leaving aside the old provincial roads, *viz.*, the Bangalore-Honnavar and the Kadur-Mangalore roads in the western parts of the taluk, the only other communications are the Birur-Lingadahalli, and the Birur-Ajjampur roads in the north-west corner, and the Sakrepatna-Banavar road in the southern portion of the taluk. The whole of the northern and eastern portions lying to the east of the main Bangalore-Honnavar road, which forms nearly two-thirds of the taluk is almost entirely without roads. There are no doubt some cart-tracks between the more important places in the several hoblis, but there are no recognised or regularly maintained roads, and the tract being intersected by several small streams or hallas, access to these parts is always attended with some difficulty, which is increased during the rainy season. The Yegati-Pura road mentioned in the report must be a mistake, as there is no such road regularly maintained the distance between the two places being under a couple of miles, and the other two roads mentioned are the only roads that have come into existence since the date of the original settlement.

4. The observation in para 6 of the report, regarding the value and importance of afforestation in the eastern and north-eastern portion of the taluk, as a measure contributing to the material prosperity of that area, has much force, as that area is devoid of vegetation and is generally bare. The subject of tree-planting deserves the earnest attention of the raiyats and of the revenue authorities.

5. There are no manufactures, arts or industries, worth mentioning in the tract under consideration. Progress in this direction may, however, be expected under the stimulating influence of the several measures adopted under the present progressive policy of Government.

6. The subject of soils, irrigation and water-supply, climate and rainfall as well as crops and cultivation, dealt with in paras 7 to 10 of the report, will be referred to in dealing with the proposed grouping of villages and the levy of the revised rates, on which they have a direct bearing. It is observed that the grouping at the original settlement is left undisturbed, and that out of the three groups, practically all the villages of the Kadur Taluk fall under groups II and III. In these groups the maximum dry and wet rates have been raised from Rs. 1-12-0 and Rs. 6-8-0 to Rs. 2-2-0 and Rs. 7-4-0 in group II, and Rs. 1-8-0 and Rs. 6-0-0 to Rs. 1-12-0 and Rs. 6-12-0 in group III. As regards tank-irrigated gardens, the maximum is proposed to be reduced from Rs. 16 to Rs. 12, the Settlement Officer holding that the most favourably situated gardens with the best description of soil would not bear a higher rate on assessment than Rs. 12 an acre. As regards gardens that do not depend on Government irrigation works the rules of 24th January 1902 are proposed to be observed with the maximum rate of Rs. 6. Coming to the average rates for the whole taluk, the rate for dry lands shows an increase of Re. 0-2-10 per acre, for wet lands an increase of Re. 0-7-0 and for gardens a decrease of Re. 0-2-8.

7. As regards garden lands, it may be said at once that the substantial decrease in the rates will come as a blessing to land owners and may be expected to lead to a wide expansion of this class of cultivation, which is very much to be desired. With regard to dry lands also, the proposed increase is not likely to be felt as a hardship having regard not only to the general progress of the tract under re-settlement, but also to the fact that raiyats often grow commercial and paying crops alongside of ordinary food crops.

8. It is a matter for consideration, however, whether the same circumstances exist, and the same reasoning will hold good, in the case of wet lands where a uniform increase of 12 annas in the maximum rate irrespective of the class of land, and of 7 annas in the average rate for the whole taluk is proposed. The Kadur Taluk is mainly a dry crop area, and the comparatively small extent under wet cultivation has not acquired any special facilities since the original settlement, the sources of irrigation not having been materially altered or improved. The question of labour supply is important in the case of wet cultivation, and this has affected to some extent this class of cultivation in recent years. Coming to the observations of the settlement Officer himself, speaking of soils, he says, in para 7, that the soil of wet lands is of average quality, and that towards the north and round about Yegati the soil is poor. Then as regards irrigation and water supply, he observes in para 8, that the channels that feed tanks are silting up, and that there is a general wastage of water owing to their disrepair. Under rainfall, he observes that the average fall is scanty, and that every year anxiety is felt regarding the prospects of the monsoon (para 9). Sugar-cane cultivation is very limited, soil suited for it is not being extensively met with in the taluk, but only in patches here and there. It is necessary to encourage the cultivation of healthier and more prolific varieties of cane (para 10). There are no weekly markets of any importance in the

taluk, particularly for the sale of paddy or rice (para 11). All these circumstances would point to the desirability of showing some consideration to the case of wet lands in the taluk, which have shown no expansion whatsoever, the area remaining practically the same as at the time of the original settlement.

9. In view of the circumstances indicated in the foregoing paragraphs, I have the honor to state that with the qualification described in the previous paragraph regarding the rates for wet lands and the desirability of showing some concession in respect of them, by slightly lowering the proposed increase in the maximum and average rates for this class of lands, the proposals contained in the Settlement Officer's report are generally well-considered, and may be adopted.

Inspection of Rain-gauge Stations.

READ—

Letter No. C 146, dated 11th January 1917, from the Revenue Commissioner in Mysore submitting the Mysore Season and Crop Report for 1915-16, with an explanatory memo and a short review of each part of the report.

Order No. R. 11923-70—Agri. 33-16-13, dated 29th May 1917.

Recorded.

2. The average rainfall during the year was lower than in the previous year, being 31·73 inches against 46·90 inches during 1914-15. The seasons, however, were fair and this resulted in good harvests and consequently there was a slight fall in the prices of the principal food grains. There was also an increase in the agricultural stock. Government are glad to observe that there was a general improvement in the agricultural and economical conditions of the State during the year under report.

3. The report will as usual be published in the *Mysore Gazette*.

READ—

Government Order No. R. 6322-31—Ft. 17-14-54, dated 23rd January 1915, requesting the Conservator of Forests to submit proposals in consultation with the Revenue Commissioner in the matter of cutting and removing grass from State Forests instead of throwing open the Forests for free grazing by cattle.

2. Letter No. 2171, dated 25th August 1916, from the Conservator of Forests in Mysore submitting the opinion of the Revenue Commissioner to the effect that it is unnecessary and inadvisable to alter the existing practice of throwing open State Forests for grazing in times of drought, and recommending that both in the interests of the people and forest conservancy the system of cutting and removing grass from State Forests should be preferred to that of free grazing.

Order No. R. 10858-67—Ft. 58-16-2, dated 7th May 1917.

Government agree with the Conservator of Forests that free cutting and removal of grass in the State Forest areas may be universally permitted. This system is by far preferable to any other prescribing free grazing under certain restrictions. The raiyats should be encouraged as far as possible to stall-feed their cattle.

GENERAL AND REVENUE DEPARTMENTS.

Read—

Letter No 11602, dated 12th May 1911 from the Revenue Commissioner in Mysore submitting for orders letter No. 339, dated 25th April 1911 (with its enclosures) from Mr. C. Venkata Rao, the then Forest Settlement Officer, soliciting instructions in the matter of the treatment of occupied Kans lying within the Mrighavadhe Forest Block in the Tirthahalli Taluk which has been reserved for constitution as a State Forest in Government Notification No R. 5508—Ft. 123-07-2, dated 25th February 1908 and requesting general instructions as to how an occupied Kan which in every case has been clubbed with a Government Kan and formed into one survey number should be dealt with in settling forest blocks in which Government Kans will have to be included.

Order No. R. 10953-7—Ft. 153-10, dated 8th May 1917.

It is reported that in the Mrighavadhe forest reserve there are as many as eleven occupied Kans which have not been separately demarcated to admit of being treated as enclosures, that it is not possible to exclude occupied Kans from the proposed State Forest and form the remaining portion as a compact block as these Kan areas are scattered and that therefore the settlement of the reserve cannot be concluded until and unless these occupied Kans are made into separate survey numbers or the Kan rights are acquired on payment of compensation.

2. The Superintendent of Revenue Survey who was consulted, states that as there are no data to define the actual position of the occupied Kan, in the field, it is not possible to separate the same from the Government Kan and demarcate it and suggests therefore the extinction of Kan rights by payment of suitable money compensation.

3. On a careful consideration of the subject, Government have come to the conclusion that the rights of the Kan holders should not be acquired and that the Kan rights in the Malnad which form a special feature of this interesting tract of Mysore should be preserved intact. They therefore direct that, in order to obviate the difficulty in demarcating the occupied Kan separately from the Government Kan, the Kan holders should be given the option to take over the management of unoccupied Kans (adjacent and clubbed) on payment of an annual fee. Where the Kan holders are not willing to take up the unoccupied Kan on the aforesaid terms, they should be required to prove the extents of the Kans in their occupancy and to pay for the cost of their demarcation, which may be undertaken by the Forest Department, after obtaining Government sanction of the boundaries in each case.

4. The Deputy Commissioner, Shimoga District, is requested to give effect to the above instructions and facilitate the work of the Forest Settlement operations in his district.

5. The Settlement of the blocks in the pending cases should be effected in the light of this order.

Read—

Government Order No. Fl. 408-57—G. F. 108-15-2, dated 15th July 1916, directing that increments of Gazetted Officers holding progressive appointments be paid only after they are sanctioned by Government in the Administrative Department and that the Head of the office or Department in which the Officer is working be held responsible for taking initiative in the matter in good time and for making a reference to Government.

2. Note dated 29th September 1916 by Mr. K. L. Datta, Sepcial Officer stating that sanction of Government to the increments of Gazetted Officers is quite unnecessary and suggesting the desirability of authorising the Audit office to issue the requisite salary slips to the treasuries concerned whenever such increments fall due, in the absence of a departmental or Government Order to the contrary.

Order No. Fl. 7231-80— G. F. 236-16-1, dated 19th May 1917.

Government direct that the Audit Department may authorise payment of increments to Gazetted Officers as they fall due, in the absence of an instruction from the Head of the Department concerned or Government order to the contrary.

GOVERNMENT OF MADRAS.

HOME DEPARTMENT (JUDICIAL.)

G. O. No. 544, 7th March 1917.

Rules for the payment of the expenses of complainants and witnesses attending Criminal Courts.

Issuing certain amendments to the — so as to provide for the payment to them of motor fares and publishing the rules revised up to date in the *Fort St. George Gazette.*

ANNEXURE I.

Notification.

Under section 544 of the Code of Criminal Procedure, the Governor in Council, with the previous sanction of the Governor-General in Council, is pleased to make the following revised rules for regulating the payment, on the part of Government, of the expenses of witnesses (including complainants) attending the criminal courts in the City of Madras :—

1. Subject to the provisions hereinafter contained, the expenses of witnesses will be paid on behalf of Government in the following classes of cases, *viz.* :—

(*a*) Cases shown in the second schedule of the Code of Criminal Procedure as not bailable.

(*b*) Cases in which the prosecution is instituted or carried on under the orders or with the sanction of the Governor in Council or of any public servants acting as such.

(*c*) Where the witness in question has been compelled to attend by a process issued under section 540 of the Code.

(*d*) Cases in which the court certifies that the attendance of such witness was directly in furtherance of the interests of public justice.

2. (1) For the purposes of these rules, Europeans, Eurasians and Indians shall be divided into three classes, and the Magistrate before whom they are required to appear, or the Commissioner of Police or in the case of witnesses from the mufassal, the Magistrate of the district from which they come shall fix the class with due regard to the station in life of each individual.

(2) For the purposes of this rule, the Magistrate of the district may delegate his powers to any Subordinate Magistrate.

3. The following are the maximum rates which may be awarded to the several classes of witnesses, and no expenses in excess of, or other than, those here provided for shall be allowed :—

Witness	Class	Subsistence allowance	Carriage-hire allowable for days of actual attendance	Travelling expenses, if any, incurred			
				By rail	By a public* motor service	By road otherwise than by public motor service	By sea or canal
Europeans and Eurasians	1st class...	5 rupees per day.	3 rupees per day ..	1st class fare	1st class fare	8 annas per mile	Actual expenses of passage
	2nd ,, ...	3 ,, ,,	2 ,, ,, ...	2nd class fare	2nd class fare	6 ,, ,,	
	3rd ,, ...	1½ ,, ,,	1 rupee ,, ...	3rd class fare	3rd class fare	4 ,, ,,	
Indians ...	1st ,, ...	2 ,, ,,	2 rupees ,, ...	1st class fare	1st class fare	6 ,, ,,	
	2nd ,, ...	1 rupee ,,	1 rupee ,, ...	2nd class fare	2nd class fare	2 ,, ,,	
	3rd ,, ...	5 annas ,,	Nil.	3rd class fare	3rd class fare	2 annas per 10 miles.	

* If there are only two classes the first and second class witnesses will be paid the higher class fare and third class witnesses the lower class fare.

4. All disbursements under these rules shall be made by the Commissioner of Police, to whom witnesses coming from the mufassal should report themselves on arrival at Madras.

5. Witnesses resident in the Presidency town will be entitled only to such actual expenses as they may show to the satisfaction of the Commissioner of Police that they have been obliged to incur in obedience to the process or order of the courts.

6. Witnesses sent from the mufassal will be furnished with a certificate by the despatching Magistrate showing the class to which they belong, the date of their departure, and the correct distances (if any) to be travelled by road; and unless such certificate is produced before the Commissioner of Police, that officer may disallow all or any of the expenses claimed.

7. Mufassal Magistrates may make reasonable advances to witnesses summoned by the High Court or Presidency Magistrate and requiring such advances to enable them to reach Madras, but shall in every such case note the same on the certificate referred to in rule 6. The Commissioner of Police should also be advised of such advances, and he will refund the amount to the officer making the advance.

8. Whenever it is practicable for witnesses to travel by rail or steamer, they shall be allowed no more than the rates prescribed for those modes of conveyance.

9. Subsistence allowance may be paid for the days occupied in travelling to Madras as well as in the return journey. The subsistance allowance at Madras will cease as soon after the conclusion of the inquiry or trial as the means of quitting the town become available.

10. The expenses of witnesses will be paid on production of a certificate signed by the presiding Magistrate or in the case of the High Court by the Clerk of the Crown setting forth the enquiry or trial in which their attendance was required and the days on which they attended.

11. It shall be competent to the court before which a witness appears to disallow payment of any expenses on behalf of Government if for any cause such court thinks fit to do so.

12. The Commissioner of Police will disallow the whole or the part of expenses of any witness for the defence whose evidence may not seem to him to have been material, unless he is satisfied that such witness has been brought down to Madras against his will and that no compensation for his expenses has been paid or deposited by the defendant. This power does not extend to the case of a witness who has been examined and certified by the Court or Magistrate to have been material.

13. In applying the foregoing rules to public servants to whom the Civil Service Regulations are applicable the following additional rules shall be observed :—

(1) When a public servant appears in any case under rule 1 to give evidence in his official capacity, that is, evidence of facts within his knowledge as an official, no payment shall be made to him, but the court will give him a certifiate setting forth that he appeared to give evidence of what had come to his knowledge, or of matters with which he had to deal, in his official capacity, the dates on which he appeared and the period for which he was detained, so as to enable him to draw travelling allowance and batta under Article 1133 of the Civil Service Regulations.

(2) When a public servant appears in his official capacity as a witness in a case which does not come under rule 1 (*e.g.* in a case in which section 244 (3) or 257, Code of Criminal Procedure, is applied), or when a public servant appears to give evidence in any case as a private person, travelling allowance and batta may be paid to him in the ordinary manner, but the court shall send an advice of all such payments made to him to the head of the office in which he is employed. In this advice the amount paid as batta and the period during which the attendance of the witness in court was necessary shall be stated,

(3) When an official of the Court of Wards appears in his official capacity as a witness in a case connected with an estate under superintendence of the Court of Wards the Judge or Magistrate before whom the trial takes place will furnish such official with a certificate showing the days on which he attended to give evidence and the amount of batta and travelling allowance paid to him on that account.

(4) When a public servant whose emoluments are governed by the Army Regulations, India, appears in any case under rule 1 to give evidence in his official capacity, he shall be paid the travelling allowance and batta admissible under these rules, and shall be furnished with a certificate showing in detail the amount paid. If the amount paid is less than the amount admissible to him under the military rules to which he is subject, the difference will be paid to him by the military authorities on production of the certificate.

14. Medical subordinates in Local Fund or Municipal employ (including Government servants lent to, and paid by, local bodies) when attending court to give evidence in their public capacity shall be paid the same rates of travelling allowance and batta as would be admissible to Government servants of similar grades under the Civil Service Regulations.

15. Subjects of the French Government who are in the official employ of that Government in the French Dependencies in India appearing as witnesses before criminal courts in Madras City may, if such claim be made, be paid their expenses at the rates to which they are entitled under the Regulations of their own Government in like case. Magistrates are required to refer any claim under this rule for scrutiny to the Collector of South Arcot, who is the Special Political Agent for the French Dependencies in India.

16. Officials of the Government of Ceylon appearing as witnesses before courts in Madras City may if such claim be made, be paid their expenses at the rates to which they are entitled under the Regulations of their own Government in like case. The claim should be submitted through the head of the department to which the official belongs.

17. Officials of the Mysore Durbar appearing as witnesses in their official capacity before courts in Madras City may, if such claim be made, be paid their expenses at the rates at which they would be entitled under the Regulations of their own Government. This arrangement may be extended by the Government to other Native States which have agreed to pay the expenses of British official witnesses from the Madras Presidency appearing in their courts on the same scale as that admissible to them under the Regulations of the Madras Government.

No. J. 4352-4401—CTS. 321-16-2, DATED 29TH MAY 1917.

II

Rules for the payment of the expenses of complainants and witnesses attending criminal courts in the Madras Presidency outside the Presidency Town.

Under section 544 of the Code of Criminal Procedure, the Governor in Council, with the previous sanction of the Governor-General in Council, is pleased to make the following revised rules for regulating the payment, on the part of Government, of the expenses of witnesses (including complainants) attending criminal courts in the Madras Presidency other than those of the City of Madras:—

1. The criminal courts are authorised to pay, at the rates specified in rule 4, the expenses of complainants and witnesses in cases in which the prosecution is instituted or carried on by, or under the orders, or with the sanction of the Government, or of any Judge, Magistrate, or other public officer, or when it shall appear to the Judge or Magistrate presiding over such court, to be directly in furtherance of the interests of public justice; also in cases entered in column 5 of schedule II appended to the Code of Criminal Procedure as not bailable; and in all cases in which the witnesses are compelled to attend by a Magistrate under the provisions of chapter XLVI of the Code.

2. (1) For the purpose of these rules witnesses are divided into two classes namely, of officials and non-officials. Official witnesses, that is to say, public servants to whom the Civil Service Regulations are applicable summoned to give evidence as officials, are entitled to receive for their journeys to and from the court and for the days spent by them in attendance at the court to give evidence in cases coming under rule 1, travelling allowances at the rates prescribed by the Civil Service Regulations for the time being in force. The court shall not, however, make any payment to official witnesses in such cases, but shall grant them certificates setting forth that they appeared to give evidence of what had come to their knowledge, or of matters with which they had to deal, in their official capacity the date on which they appeared and the period for which they are detained, so as to enable them to draw travelling allowance and batta under Article 1133 of the Civil Service Regulations.

(2) When a public servant appears in his official capacity as a witness in other cases (*e.g.*, in cases in which section 244 (3) or 257, Code of Criminal Procedure, is applied), or when a public servant appears to give evidence in any case as a private person, travelling allowance and batta may be paid to him in the ordinary manner, but the court shall send an advice of all such payments made to him to the head of the office in which he is employed. In this advice the amount paid as batta and the period during which the attendance of the witness in court was necessary shall be stated.

(3) When an official of the Court of Wards appears in his official capacity as a witness in a case connected with an estate under the superintendence of the court of Wards, the Judge or Magistrate before whom the trial takes place will furnish such official with a certificate showing the days on which he attended to give evidence and the amount of batta and travelling allowance paid to him on that account.

(4) When a public servant whose emoluments are governed by the Army Regulations, India, appears in any case under rule 1 to give evidence in his official capacity, he shall be paid the travelling allowance and batta admissible under these rules, and shall be furnished with a certificate showing in detail the amount paid. If the amount paid is less than the amount admissible under the military rules to which he is subject, the difference will be paid to him by the military authorities on production of the certificate.

3. Medical subordinates in Local Fund or Municipal employ (including Government servants lent to and paid by local bodies) when attending court to give evidence in their public capacity shall be paid the same rates of travelling allowance and batta as would be admissible to Government servants of similar grades under the Civil Service Regulations.

4. Non-official witnesses are entitled to travelling allowances under two different scales as shown below according as they are (1) Europeans or Eurasians, or (2) Indians. Persons falling under either of these descriptions are for the purposes of these rules, divided into three classes; and the Judge or Magistrate before whom they are required to appear either as complainants or as witnesses shall be careful to fix the class with due regard to the station in life which they occupy—

—	Europeans and Eurasians			Indians		
	First class	Second class	Third class	First class	Second class	Third class
1	2	3	4	5	6	7
Travelling allowance— By rail ...	First class fare.	Second class fare.	Third class fare.	First class fare.	Second class fare.	Third class fare.
*By a public motor service.	Do	Do	Do	Do	Do	Do
By road, otherwise than by public motor service.	As. 8 per mile.	As. 4 per mile	As 2 per mile	As. 6 per mile	As. 2 per mile	Pies 3 per mile
By sea or canal ...	Actual expenses of passage.			Actual expenses of passage.		
Batta not to exceed...	Rs. 3 per diem	Re. 1 per diem	As. 8 per diem	Re. 1 per diem	As. 8 per diem	As. 4 per diem

9 If there are only two classes, the first and second class witnesses will be paid the higher class fare and the third class the lower class fare.

5. In cases within rule 1, the Commissioner of Police may make reasonable advances to witnesses resident in the City of Madras who are summoned by a criminal court in the mufassal and who require the advances to enable them to reach the court. The court issuing the summons, on being advised by the Commissioner of Police of the advances made, will refund the amount to him.

6. The distance for which mileage and the number of days for which batta should be allowed for the journey to and from the station at which the court is held and for attendance at court shall be determined by the Judge or Magistrate ordering the payment in each case.

7. All bills for travelling allowance and batta to complainants and witnesses attending before the courts of Magistrates of the second and the third classes shall be scrutinized by the Magistrate of the division in which such courts are situated before the charges included in them are finally passed.

8. Whenever a Magistrate dismisses a case as frivolous or vexatious under section 250 of the Code of Criminal Procedure, no travelling allowance or batta shall be granted to the complainant in such case.

9. The criminal courts are authorized to pay the necessary and actual expenses of carriage to a witness travelling by road, in the case of persons whose sickness, age, position or habits of life render it impossible for them to walk, provided the expense incurred under this rule shall in no case exceed As. 8 a mile.

10. To Indians and Europeans graded in the first class of non-officials, there may also be allowed the actual cost of carriage-hire to and from court on the days of attendance at court.

11. Subjects of the French Government who are in the official employ of that Government in the French Dependencies in India appearing as witnesses before criminal courts in the Madras Presidency may, if such claim be made, be paid their expenses at the rates to which they are entitled under the Regulations of their own Government in like case. Magistrates are required to refer any doubtful claim for scrutiny to the Collector of South Arcot who is the Special Political Agent for the French Dependencies in India.

12. Officials of the Government of Ceylon appearing as witnesses before criminal courts in the Madras Presidency may, if such claim be made, be paid their expenses at the rates to which they are entitled under the Regulations of their own Government in like case. The claim should be submitted through the head of the department to which the official belongs.

13. Officials of the Mysore Durbar appearing as witnesses in their official capacity before courts in the Madras Presidency may, if such claim be made be paid their expenses at the rates at which they would be entitled under the Regulations of their own Government. This arrangement may be extended by the Government to other Native States which have agreed to pay the expenses of British official witnesses from the Madras Presidency appearing in their courts on the same scale as that admissible to them under the Regulations of the Madras Government.

Arms Regulation and the Rules framed thereunder.

No. J. 4507-15—Pol. 170-16-2, dated 6th May 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Read—

Letter No. 5024-494,* dated the 29th April—2nd May 1917, from the Inspector-General of Police in Mysore submitting the report on the working of the Mysore Arms Regulation and the rules framed thereunder for the calendar year 1916.

* Printed as Annexure.

Order No. J. 4507-15—Pol. 170-16-2, dated 6th May 1917.

Recorded, with the observation that the information called for in Government Proceedings No. J. 604-12—Pol. 171-15-10, dated 14th August 1916, has not been embodied in the report.

D. M. NARASINGA RAO,
Secy. to Govt., Gen. Dept.

To—The Inspector-General of Police in Mysore.
The District Magistrates of Districts.

Exd.—R. K.

No. J. 4507-15—Pol. 170-16-2, dated 6th May 1917.

ANNEXURE.

No. 5024-494—Enc. (4), dated Bangalore, 29th April—2nd May 1916, from K. R. Srinivasiengar, Esq., M.A., Officiating Inspector-General of Police in Mysore, to D. M. Narasinga Rao, Esq., B.A., B.L., Secretary to the Government of His Highness the Maharaja of Mysore, General Department.

I have the honor to submit the following report on the working of the Mysore Arms Regulation and the Rules framed thereunder for the calendar year 1916.

2. Statement No. I annexed hereto shows the number and description of licenses issued under the various forms during the year as compared with those for the previous year. It will be seen therefrom :—

(*a*) that no license to transport arms, ammunition or military stores within the State was issued during the year, against one in the Chitaldrug District in the previous year;

(*b*) that under Form II of licenses to manufacture, convert or sell arms, ammunition or Military stores, 35 licenses were issued against 36 in 1915;

(*c*) that under Form III of licenses to keep and sell arms, ammunition or Military stores, 103 licenses were issued against 91 in the preceding year;

(*d*) that under Form IV of licenses to possess arms, etc., 17,184 licenses were issued against 16,731 in 1915 showing a net increase of 453 licenses, the increase being spread over all the districts except Hassan and Shimoga which have shown a decrease of 106 and 14 licenses, respectively;

(*e*) that under Form V of licenses to go armed on a journey no licenses were issued as in the previous year;

(*f*) that under Form VI of licenses to possess arms, ammunition or Military stores, 68 licenses were issued during the year, against 101 during the preceding year; and

(*g*) that under Form VII of licenses to possess arms and ammunition for destroying wild animals, 344 licenses were issued against 303 in the previous year, showing an increase of 41 licenses of which 37 were in the Shimoga and the remaining 4 in the Chitaldrug District.

3. The number of arms covered by these licenses was 18,981 fire-arms and 171 arms of other description against 18,294 fire arms and 186 other arms in the year previous.

4. Statement No. II annexed shows the number of persons licensed to deal in sulphur. There were 99 licensed dealers during the year against 86 in 1915. The opening balance of the stock of sulphur with the dealers on the 1st January 1916, was 9 tons, 10 cwts., 1 qr. and 8·31-60 lbs. The quantity purchased was 14 tons, 9 cwts., and 19·1-10 lbs. and the quantity sold was 14 tons, 3 cwts., 1 qr., and 22 lbs., and the balance remaining unsold at the end of year was 9 tons, 11 cwts., 3 qrs., and 3·37-60 lbs. The deficiency of 4 cwts., 1 qr., and 2 lbs. of sulphur in the closing balance was due to the stock with license holder No. 3 whose shop is reported to have been closed on account of plague in Chitaldrug Town not having been checked and taken to account. Sulphur was chiefly used in the preparation of ordinary fire works as usual.

5. Statement No. III shows the inspection by Police Officers and Magistrates of stock premises and books of licensed dealers. The total number of shops for which licenses were isssued during the year was 130 or 6 more than in the previous year; of these 9 shops in Shimoga District were licensed only to possess and sell crackers and were not inspected. Out of the remaining 121 shops all but eight were inspected either by the Police or by the Magistrates. The Superintendents of Police inspected 76 shops and Police Inspectors 109. The Superintendent of Police, Hassan District inspected all the shops in his district.

6. In 55 cases, 56 persons were prosecuted, of which 44 cases with 44 persons ended in conviction, 7 cases with 8 persons ended in discharge or acquittal, 2 cases with 2 persons were struck off owing to the death of the accused and the remaining 2 cases with 2 persons (one of Tumkur District and one of Bangalore District) were pending at the close of the year.

7. Out of the 5 persons in 5 cases who were awaiting trial at the beginning of the year, 4 were convicted and one was acquitted.

No. I—Statement showing the number and description of licenses issued by the District Magistrates in the Mysore State for the year 1916 and the previous year.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

The following Government Orders regarding the increase of the strength of the Imperial Service Regiment.

(1) Government Order No. G. 4990-1—Mily. 21-14-57, dated 17th November 1914.
(2) Do No. G 8518-9—Mily. 21-14-111, dated 10th February 1915.
(3) Do No. G. 12442-3—Mily 21-14-360, dated 12th May 1915.
(4) Do No. G. 5512-13—Mily, 3 15-126, dated 30th October 1915.
(5) Do No. G. 6618-9—Mily 3 15-161, dated 26th November 1915.
(6) Do No. G. 15876-7—Mily. 3-15-382, dated 22nd May 1916.
(7) Do No. G. 3785-6—Mily. 8-16, dated 14th September 1916.
(8) Do No. G. 12800-1—Mily. 8-16-242, dated 26th March 1917.

2. Letter No. 10266, dated the 3rd May 1917, from the Chief Commandant, Mysore State Troops, forwarding a proposition statement for the revision of the establishment maintained at the Depot, Mysore Imperial Service Lancers, at a cost of Rs 10,265 per mensem.

3. Unofficial Note No. 143, dated 7th May 1917, from the Comptroller on the above subject.

Order No. G. 16016-17—Mily. 215-16-2, dated 25th May 1917.

The revision proposed by the Chief Commandant is sanctioned as a temporary measure until the conclusion of the war, as shown under "Proposed Scale" in the appendix to this order, the expenditure being met from the grant provided for the mobilization of the Regiment.

2. As proposed by him, the Chief Commandant may attach temporarily two more officers from the Mysore Horse, for training the recruits in the Depot.

3. The non-effectives returning from the field will continue to be treated as supernumeraries as directed in Government Order No. C. 26-27—Mily. 3-15, dated 17th October 1915.

PRECEDENCE LIST, PART II.

NON-OFFICIAL GENTLEMEN.—NOT BEING RETIRED OFFICERS.

CLASS I.

Principal Sirdars.

CLASS II.

All other Sirdars and persons holding 1st class titles.
Other Gentlemen specially admitted to this class by His Highness.

CLASS III.

Principal Ursu and other gentlemen admitted to this class by His Highness.

CLASS IV.

Persons holding 2nd class titles.
Non-official gentlemen entitled to *Khasa Hara*.
Other persons specially admitted to this class by His Highness.

CLASS V.

Dasara Representative Members.
Members of the Mysore and Bangalore City Municipal Boards.
Other persons specially selected for this class by His Highness.

CLASS VI.

All other persons included in the Durbar List.

II. (*a*) Officers of class I will take precedence in the order shown above subject to such changes as may be made by His Highness on personal or other considerations.

(*b*) Officers in classes II, III, IV, V and VI may take rank according to the salaries drawn by them. When two or more officers draw the same salary they may rank according to the dates from which they began to draw such salary.

(*c*) Officers holding acting appointments will take rank in the class wherein the appointment in which they act is included.

III. When an officer holds two or more offices, he should be entitled to the rank of the highest of them.

IV. When there arises a question as to one's proper position in Durbar, it may be referred to the Durbar Bakshi or other Palace Officer entrusted with the Palace Durbar arrangements who will allot a place tentatively pending His Highness' pleasure.

V. The order of precedence set forth above for officers on active service will be made applicable to retired officers as well, their position being determined by the posts held by them at the time of their retirement subject to the proviso that when there are two or more retired officers of the same rank they should take precedence among themselves according to their seniority.

VI. In accordance with the *Mamul*, officers mentioned in Part I, will be seated in order on the right of His Highness the Maharaja beginning with the front row.

VII. Retired officers will be seated after officers in active service of the same rank as that held by them prior to their retirement.

VIII. Officers on the personal staff of His Highness, the Private Secretary to His Highness, the Military Secretary, etc., are left out of the present classification and their places in Durbars and other ceremonial occasions will be left to His Highness' pleasure.

No. G. 14952-15003—G. M. 180-16-6, DATED 11TH MAY 1917.

THE REVISED MYSORE CIVIL UNIFORM REGULATION.

A. FOR INDIAN OFFICERS.

(1) The coat to be of dark chocolate color with lining of silk and with velvet collar and cuffs embroidered in gold and six gilt buttons in front in a single row with the Mysore Royal Arms. (For size and pattern of buttons see Plate I). The coat to be long enough fully to cover the knee in the standing position.

(2) The trousers to be of white kersevmere with gold lace down the side seacus (for pattern see Plate I); and

(3) The *Kammarband* in the case of those not exempted from it, and the *Uttariyam* in the case of those so exempted, to be of white silk or white cotton, bleached or unbleached, with gold lace border along the length.

(4) The details of the uniforms for officers of the various grades shall be as follows:—

(*a*) *For the Dewan*—

The coat to be embroidered in gold according to the pattern appended. (*Vide* Plate II.) In other respects, the coat, trowsers and *Uttariyam* to be the same as for Members of Council and Judges of the Chief Court.

(*b*) *For Members of Council and Judges of the Chief Court*—

Coat.—The collar and cuffs to be embroidered in gold according to the pattern and dimensions of width given in Plate III.

Trousers.—The gold lace to be 2 inches wide.

Kammarband.—The gold lace border to be 2 inches wide.

(*c*) For Chief Commandant, Revenue Commissioner, Excise Commissioner, Chief Engineer, Inspector-General of Police, Director of Mines and Geology, Senior Surgeon, Agent, Mysore State Railways, Director of Industries and Commerce, Director of Agriculture, Inspector-General of Education, Chief Electrical Engineer, Conservator of Forests, Superintendent, Revenue Survey, Comptroller, Deputy Commissioners, District Judges, Secretaries to Government, Superintending Engineers, Deputy Chief Engineer, Director of Public Health Institute, Educational Officers on Rs. 500—1,000, Chief Operator, Cauvery power, Chief Inspector of Mines, Under Secretaries to Government, Private Secretary to His Highness the Maharaja, Military Secretary, Huzur Secretary, Darbar Bakshi, Palace Controller and Assistant Secretaries on the personal staff of His Highness the Maharaja:—

Coat.—The collar and cuffs to be embroidered in gold according to the pattern and dimensions of width given in Plate IV.

Trousers.—The gold lace to be 2 inches wide.

Kammarband.—The gold lace border to be 2 inches wide.

(*d*) *For Private Secretary to Dewan*—

Coat.—The collar and cuffs to be embroidered in gold according to the pattern and dimensions of width given in Plate V.

Trousers.—The gold lace to be 1½ inches wide.

Kammarband.—The gold lace border to be 1½ inches wide.

(*e*) The Judges of the Chief Court are at liberty to wear the robes of their office instead of uniform above prescribed.

B. FOR EUROPEAN OFFICERS

(1) Blue dress coat with cream-colored silk facings and gilt buttons with the Mysore Royal Arms, white waistcoat with similar buttons and white kerseymere trousers with gold lace stripes according to the grade of the officer. (For pattern of buttons and gold lace for trousers, see Plate I.)

(2) At Mysore Durbars, European officers are at liberty either to wear the above dress, or, in the case of Military officers, the Military uniform of their rank, and in the case of the Judges of the Chief Court, the robes of their office.

C. GENERAL RULES.

(1) The use of the uniform will be restricted to formal Durbars in the Palace and on other occasions whenever specially required to do so.

(2) No uniform is prescribed for the officers comprised in the Precedence List not mentioned above. Thev will wear their usual Palace Durbar dress.

By Order,
D. M. NARASINGA RAO,
Secretary to Govt., Gen. Dept.

Special Committee of the Representative Assembly to investigate selected subjects of general importance.

No. G. 16146-195—G. M. 584-16-1, DATED 28TH MAY 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Rule XIII (1) of the Civil Service Rules issued with Government Order No. G. 3528-75—G. M. 232-12-1, dated 6th January 1913, fixing the cadre of Assistant Commissioners.

Order No. G. 16146-195—G. M. 584-16-1, dated 28th May 1917.

Under the order read above, the cadre of Assistant Commissioners was fixed at 68, but it was subsequently reduced to 66 on account of the temporary abolition of one of the Sub-Divisions in the Bangalore District and the reduction of the cadre by one in consequence of the appointment of a Deputy Comptroller.

2. Since the reduction of the number to 66, considerable need for additional officers has been felt.

On account of the large increase of work in recent years in the General and Revenue Secretariat, two Assistant Secretaries have been appointed temporarily, but as there is no prospect of any reduction in the work of the Secretariat it is necessary to make these appointments permanent. And recently, the appointment of an Assistant to the Muzrai Superintendent was sanctioned in Government Order No. 2463-513—Muz. 82-14-2, dated 2nd April 1917, as a part of the sanctioned scheme of the reorganization of the Muzrai Department.

The post of Superintendent of Police for Railways has been sanctioned for a period of two years in Government Order No. J. 1331-3, dated 21st October 1916. But the work is of a permanent character and liable to expand with the extension of Railways in the State. Hence the appointment should be made permanent.

The principle of relieving Deputy Commissioners of the direct charge of taluks having been accepted in Government Order No. R. 6185-233—L. R. 641-13-14, dated 16th December 1916, it is necessary to revive the abolished Revenue Sub-Division in the Bangalore District and create three more Sub-Divisions.

In view of the comparatively heavy work in the Districts of Bangalore, Tumkur, Mysore and Shimoga, the appointment of a Personal Assistant to each of the Deputy Commissioners of these Districts is considered indispensable.

As considerable difficulty is now experienced in finding qualified officers to fill temporary vacancies in the grade of Assistant Commissioners, a reserve of two officers is necessary.

3. The Government are accordingly pleased to direct that the three marginally noted temporary appointments of Assistant Commissioners be made permanent, the Revenue Sub-Division of Bangalore which has been temporarily abolished, be revived and ten new appointments of Assistant Commissioners, as described hereunder, be added to the cadre, thus raising it to 80.

1. Assistant Secretary in charge of the Education and Agriculture Branch of the General and Revenue Secretariat.
2. Additional Assistant Secretary, General and Revenue Secretariat, sanctioned in Government Order No. G. 7769-70—G. M. 226-16-10, dated 9th December 1916.
3. Superintendent of Police for Railways.

(i) One to the General and Revenue Secretariat for charge of the Muzrai Branch.

(ii) Three for the new Sub-Divisions to be created in connection with the scheme of decentralization in the Revenue Department.

No. G. 16146-195—G. M. 584-16-1, DATED 28TH MAY 1917.

(iii) Four for appointment as Personal Assistants to the Deputy Commissioners of Bangalore, Tumkur, Mysore and Shimoga.

(iv) Two to be in reserve for emergencies.

4. The scale of appointments of Assistant Commissioners in the several Departments, as now revised, will be as shown in the list appended hereto.

5. The two additional Assistant Comptrollers sanctioned for the audit of Public Works Accounts and Open Line Railway Accounts in Government Orders Nos. Fl. 2243—G. F. 7-14-2 and Fl. 2237—G. F. 171-13-4, dated 27th November 1914, respectively, will continue to be on a temporary footing pending the reorganization of the Comptroller's Office.

D. M. NARASINGA RAO,
Secy. to Govt., Gen. Dept.

To—The Comptroller, Mysore Government, through Branch II.

Menial Establishment of the General and Revenue Secretariat.

No. G. 15933 - G. M. 53-14-3, DATED 24TH MAY 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Government Order No. G. 126—G. M. 23-1, dated 11th July 1905, revising the scale of pay of the menial establishment of the General and Revenue Secretariat.

2. Government Order No. G. 7453-4—G. M. 236-07-2, dated 19th June 1908, passing orders on the proposals of the Retrenchment Committee for the reduction of the menial establishment of the General and Revenue Secretariat.

3. Application, dated 5th November 1914, from the menials of the General and Revenue Secretariat, praying for an increase of their pay as the scale fixed in 1905 is inadequate under present conditions.

4. Memo dated 11th December 1914 of the Registrar, General and Revenue Secretariat, explaining the necessity for revising the menial establishment of the General and Revenue Secretariat to suit the present increased needs and proposing a scheme for increasing the staff by twenty-one hands and adopting a revised progressive scale of pay to prevent stagnation.

Order No. G. 15933—G. M. 53-14-3, dated 24th May 1917.

Government consider that by arranging for the work of the menials employed under the Dewan, Members of Council and the Secretariat Officers in two shifts instead of three, as at present, reduction in the number of hands can be effected after making due provision for the increase needs of the office, and that by utilising the savings resulting from this reduction of hands and an extra grant, a liberal scale of fixed pay satisfying the present needs can be provided Government are therefore pleased to sanction a revised scale of fixed pay resulting in a reduction of twenty-nine hands with an extra cost of Rs. 200 per mensem. A statement showing the number of menials and the scale of pay sanctioned is annexed.

2. The main features of the revision are:—

(i) Change of designation of "Dafterbands" to "Attenders" involving a change in the nature of their service from "Inferior" to "Superior."

(ii) Raising the pay of the last grade of menials from Rs. 7 to Rs. 8.

(iii) Inclusion of the class of bycycle orderlies amongst dalayets and peons with an allowance of Rs. 2 each to a menial doing cycle orderly's work.

3. The revision will have effect from 15th May 1917 and the reduction sanctioned will be given effect to gradually, within a period of five years, so that the present men may not be put to hardship.

4. A statement showing the distribution of the sanctioned staff is also appended to this order.

5. The extra cost on this account during the current year will be met out of the savings under pay of the establishment of the General and Revenue Secretariat.

Necessary provision should be made in the budget for 1917-18.

D. M. NARASINGA RAO,

Placing Papers at the Disposal of the Public Press.

No. G. 16228-33—G. M. 585-16-1, DATED 29TH MAY 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Order No. G. 16228-33—G. M. 585-16-1, dated 29th May 1917.

No rules exist at present to regulate the supply of Government Orders and other official papers to the public Press nor is any uniform principle observed in practice, with the result that the number of official papers made available to the Press is needlessly large.

2. With a view to better regulate this matter, Government are pleased to direct that the Secretary to Government, General Department, be, for the present, made responsible for exercising due control in the matter in accordance with suitable rules to be framed for the purpose.

Education of backward classes.

No. 8940-90—Edn. 96-16-12, dated 8th May 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Order No. 8940-90—Edn. 96-16-12, dated 8th May 1917.

The question of promoting secondary and higher education among the less educated and literate classes in the State and offering special inducements to communities who adopt agricultural and other pursuits to acquire general and vocational education has been under the consideration of Government for some time past. Having regard to the low standard of progress in all kinds of education in the State, Government have decided to offer special facilities for the encouragement of education among the classes that have hitherto not availed themselves of the ordinary facilities provided in the State in the different grades of educational institutions and to set apart a sum of one lakh of rupees annually for awarding scholarships for their benefit.

2. The Inspector-General of Education and the Education Committee of the Economic Conference, who were requested to submit proposals for the utilisation of the amount provided for scholarships, have prepared two separate schemes. The Inspector-General of Education suggests that the amount should be utilised to improve the general standard of literacy in the State, with a view to raise the economic efficiency of the people as a whole. He therefore proposes that the scholarships should be awarded in such a manner that they may benefit at least one per cent of the school-going population, that is, about 8,500 pupils, and that a greater part of the money should be utilised in promoting primary and secondary education among the most backward classes. The Education Committee, on the other hand, propose that the bulk of the money should be spent chiefly in promoting higher education in English so as to rouse the intellectual ambition of the relatively backward classes and give them greater opportunities to qualify themselves for the public services and the higher professions.

3. As regards primary education, Government have inaugurated a policy of opening elementary schools on the grant-in-aid system on as large a scale as possible in rural areas, in order to bring primary education to the very doors of the people in villages. The total number of Government and aided primary schools has risen from 2,030 to 4,822 during the last five years. The Education Department and the several agencies connected with the Economic Conference are paying special attention to the extension of primary education. For the education of adults advantage is taken of every existing day school, to open night classes wherever possible. These measures will, it is expected, produce satisfactory results in the expansion of primary education throughout the State, and any special facilities to be further created should be confined to such classes as, through extreme poverty or ignorance, are unable to avail themselves of the ordinary facilities for elementary education. In the case of the depressed classes and others who are very low in the scale of literacy such as Lambanies, Koramas and Waddas, the entire cost of opening schools for their benefit is now borne by Government; and in addition, a certain number of scholarships will be reserved for their exclusive benefit in the primary stage and special encouragement also given to the more promising boys of these communities to pass from the primary to the secondary stage.

As regards girls, Government have provided 600 scholarships for elementary classes and 100 scholarships for vernacular Lower Secondary training, and the question of further encouragement of female education is receiving consideration separately.

No. 8940-90—Edn. 96-16-12, dated 8th May 1917.

4. A careful study of the statistics relating to the progress of education in the State in the case of communities that do not ordinarily resort to higher education shows that pupils of such communities begin to fall off first at the stage in which they have to leave their homes and go to other places having higher schools and that such falling-off increases in a greater proportion at every succeeding stage so that even in the case of boys of the well-to-do classes, there is little inclination to go beyond the secondary stage. One hundred and fifty scholarships have already been provided for the benefit of boys proceeding from village to taluk schools to study for the vernacular Lower Secondary examination, and some of these are given in the ordinary course to pupils of these classes on the ground of merit. Government therefore agree with the Education Committee that the special grant of one lakh may, for the present, be devoted chiefly to scholarships for promoting higher education.

5. The Education Committee propose to allot the amount for scholarships as follows:—

No.	Courses of education	Number of scholarships	Value in rupees	Annual total cost
			Rs.	Rs.
1	B. Sc., B.A., Intermediate	60	15	10,800
2	Entrance	70	10	8,400
3	High School	250	8	24,000
4	A. V. Lower Secondary Stage ...	570	4	27,360
5	Vernacular Lower Secondary Stage ...	600	2	14,400
	Total ...	...	.....	84,960
	Scholarships for Depressed Classes.			
1	Primary Stage	500	1	6,000
2	Vernacular Lower Secondary Stage ...	100	4	4,800
3	Industrial and other special classes ...	...	(Number and rates to be fixed by the Central Committee)	4,200
	Total ...	...	.....	15,000
	Grand Total ...	...	.....	1,00,000

It is proposed to award these scholarships to all castes, tribes or communities which have less than five per cent of their total population literate in English, Indian Christians being allowed the benefit of the scholarships in High School and Collegiate classes.

The other suggestions of the Education Committee are—

(i) That the scholarships be awarded to deserving pupils on a consideration of both merit and poverty.

(ii) That depressed classes, such as, Holeyas, Waddas, Madigas, Lambanies, and Koramas, etc., should be not only eligible for all the scholarships in this scheme but also have an additional allotment of Rs. 15,000 exclusively for their educational advancement.

(iii) For awarding scholarships, a Committee should be appointed in each separate local area with a Central Committee at Bangalore to administer the whole scheme, the members of each of these Committees being entitled to hold office for two years and eligible for reappointment. The constitution of the Committees to be as follows :—

The Central Scholarship Committee to consist of—

(a) The Inspector-General of Education (*Ex-officio* President.)

(b) The Principals of Bangalore and Mysore Colleges.

(c) Five other members representing different backward communities, with the Assistant to the Inspector-General of Education as *ex-officio* Secretary, to this Committee.

The District Committee to consist of—

(a) The Deputy Commissioner as Chairman.

(b) The District Inspector of Schools.

(c) The Head Masters of the Local High Schools

(d) Five other members representing different backward classes to be appointed by the Deputy Commissioner.

The Taluk Committee to consist of—

(a) The Amildar or the Deputy Amildar as Chairman.

(b) The Assistant Inspector of Schools of the Range

(c) The Head Masters of the Anglo-Vernacular and Anglo-Hindustani Schools at the Taluk Headquarters.

(d) Five other members representing different backward classes to be appointed by the Deputy Commissioner.

The powers of the Central Committee will be—

(*a*) To frame the necessary rules for the award of scholarships, allot amounts to the District and Taluk Committees in proportion to the school establishment in each geographical area and according to other educational requirements of the several taluks and districts from time to time, and to reappropriate amounts according to the needs of the several areas subject to the provision that the amount of Rs. 15,000 reserved for the depressed classes is spent for their benefit alone. The Committee should submit a consolidated report every year to Government regarding the working of the scheme.

(*b*) The District Committee will administer the award of scholarships above the Lower Secondary and below the Collegiate grade in each District and Taluk Committee scholarships tenable in all schools below the Anglo-Vernacular and Vernacular Lower Secondary grades. The award made by the Taluk Scholarship Committee should be reported to the respective District Scholarship Committees who should similarly report the award made by them to the Central Scholarship Committee. The Taluk Scholarships to be drawn and disbursed by the Amildar and Chairman, and the Deputy Commissioner to make the necessary arrangements for drawing and disbursing District Scholarships under the control of the District Committee.

6. Government generally approve of the proposals of the Education Committee as regards the distribution of scholarships referred to in paragraph 5 above and the mode of allotment, tentatively for a period of two years with the observation that so far as the scholarships in the lower grades are concerned the division of the entire area of the State into 100 units on the basis of taluks, sub-taluks, and cities and towns with a population of not less than 5,000 may be adhered to, and that they may be given on the basis of the population as a whole and of the population of the depressed and backward classes. As regards the appointment of the Special Committees to administer scholarships, Government however consider that these functions may be assigned respectively to the Education Committee and the District and Taluk Progress Committees of the Economic Conference with power to appoint Sub-Committees containing representatives of the different backward classes and of important educational institutions to select suitable candidates. So far as scholarships in Colleges under the control of the University are concerned, the funds will be placed at the disposal of the University Council who will be requested to frame suitable rules for the award of the scholarships consistently with the object of Government in creating the scholarships.

7. Government are also pleased to direct that one-third of the existing scholarships for technical education will be reserved for the depressed and backward classes.

8. The Education Committee is requested to submit for approval of Government all the subsidiary rules necessary for a proper administration of the scholarships by the 10th of June 1917.

No. 8940-90—EDN. 96-16-12, DATED 8TH MAY 1917.

9. An annual report should be submitted regarding the working of the scheme.

No. 9201-50—EDN. 56-16-20, DATED 11TH MAY 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Report on Public Instruction in Mysore for 1915-16, submitted by the Inspector-General of Education in Mysore, with his letter No 10075—377, dated the 3rd November 1916 ?

Order No. 9201-50—Edn. 56-16-20, dated 11th May 1917.

Important Events.—The greater part of the preparatory work for starting the Mysore University was carried out during the year under review. With the creation of the University the two first grade colleges in the State which are now included in it ceased to be under the control of the Inspector-General of Education. The second year's B. A. classes under the Mysore University have been started. University Entrance classes have been opened in the Government High Schools at Bangalore, Mysore and Tumkur and in the Maharani's College, Mysore, the Entrance class sanctioned for Shimoga having been postponed. For the convenience of students who were preparing for examinations of Madras University from the Mysore Colleges some classes teaching the courses of that University have been temporarily retained in both the colleges.

His Highness the Maharaja was pleased to accept the office of Chancellor of the Benares Hindu University. A donation of two lakhs of rupees and an annual contribution of Rs. 12,000 for ten years were made for that University.

With a view to examine the working of the various measures introduced by Government for the development of education in the State and ascertain the principal defects demanding attention, a conference consisting of the Inspector-General of Education and the Inspecting Officers of the Department, was held at the close of the year, when the entire activities of the Department were reviewed and examined. Suggestions have been made for improving the organization of the Department with reference to the authority and local jurisdiction of each officer, the training and supply of teachers, improvement of accommodation and equipment, grants-in-aid, etc. Government have already passed orders on some of the suggestions and called for definite proposals as regards others from the Inspector-General of Education.

2. *Organisation of the Department.*—In order to secure more efficient organisation of the work of the Department the appointment of Deputy Inspector-General was revived. To facilitate and expedite business, considerable powers in respect of sanctioning grants-in-aid and some other kinds of expenditure were delegated to the Inspector-General of Education. A Technical Assistant to assist the Inspector-General has also been appointed for systematising the scheme of Industrial Education in the State.

The office establishment of the Inspector-General of Education was also revised during the year at an annual extra cost of Rs. 3,600.

3. The Inspectorate was strengthened by the addition of 11 Assistant Inspectors and one District Inspector, and the clerical establishment of the offices of the Inspecting Officers was also revised in September 1915, the total additional annual cost in respect of these changes being about Rs. 50,000.

It is reported that owing to the inadequacy of the staff nearly 1,430 schools were left uninspected during the year. Twenty more Inspecting Officers styled Educational Supervisors have been recently sanctioned so that the number of

schools in charge of each Inspecting Officer may not exceed 100. The Inspector-General of Education is requested to see that adequate arrangements are made for the regular inspection of all the schools.

No separate reference is made in the report to the inspection of Secondary Schools, *viz.*, the High Schools and the Anglo-Vernacular Schools. The improvement of these schools is a matter of considerable importance. The Inspector-General is requested to furnish particulars regarding the inspection of these schools in future administration reports. On account of difficulty to get proper men as Head Masters of the Anglo-Vernacular Schools owing to inadequacy of pay Government have since passed orders revising the scale of pay of the Anglo-Vernacular Schools. The Inspector-General is requested to review in future the inspection reports of these schools and forward his reviews for the information of Government.

4. The post of a Special Magic Lantern Operator was also sanctioned for exhibiting instructive Cinema films and lantern slides at Educational Conferences. A malnad allowance of Rs. 2 was sanctioned for Village School Masters in the malnad whose pay is not more than Rs. 10 per mensem. The question of increasing the rates of grants-in- aid to schools in malnad and of granting a malnad allowance to the teachers getting Rs. 12 per mensem, is engaging the attention of Government.

5. *Statistics of Education.*—The following table gives the most essential information regarding the state of education in the various grades in the State:—

I. GOVERNMENT AND GRANT-IN-AID INSTITUTIONS.

(1) UNIVERSITY EDUCATION.

	1914-15	1915-16
Number of institutions	8	8
Number of students	936	934
Cost	Rs. 2,12,054	Rs. 2,12,303
Percentage of cost to total expenditure on Education ...	9·19	7·6

(2) SECONDARY EDUCATION.

	Boys		Girls	
	1914-15	1915-16	1914-15	1915-16
Number of schools	257	272	86	100
Number of pupils	37,217	38,866	9,638	10,811
Percentage to the total population of the sex concerned of school age	5·3	5·7	2·27	2·55
Cost	Rs. 4,83,008	Rs. 5,70,661	Rs. 1,49,797	Rs. 1,77,358
Percentage of cost to total expenditure on Education ...	20·9	20·45	6·4	6·38

(3) PRIMARY EDUCATION.

Number of schools	3,456	*4,512	383	418
Number of pupils	1,22,993	1,41,186	16,126	16,972
Percentage to the total population of the sex concerned of school age	35·67	38·7	3·8	4·0
Cost	Rs. 3,94,693	Rs. 5,37,779	Rs. 86,152	Rs, 1,00,035
Percentage of cost to the total expenditure on Education ...	17·10	19·31	3·73	3·59

*Night Schools for adults ... Of the Primary Schools 562 were night schools for adults. Of these 507 were aided and 55 unaided.

(4) SPECIAL SCHOOLS (*vide para 11.*)

	1914-15	1915-16
Number of institutions	45	78
Number of pupils	2,323	3,550

No. 9201-50—EDN. 56-16-20, DATED 11TH MAY 1917.

(5) SANSKRIT SCHOOLS.

Number of institutions	43	48
Number of pupils	1,939	2,078

II. PRIVATE SCHOOLS.

Number of institutions	1,859	1,822
Number of pupils	26,825	24,715

Expenditure.—The classification of expenditure under the various heads is as under:—

	1914-15	1915-16
	Rs.	Rs.
Direction	41,066	44,906
Inspection	1,03,655	99,866
Scholarships	99,645	96,871
Buildings	2,48,135	3,26,968
Furniture	90,289	50,189
University Education	2,12,054	2,12,303
Secondary Education	6,32,805	7,48,019
Primary Education	4,80,845	6,37,814
Special Instruction	2,19,531	2,47,236
Miscellaneous	1,79,264	3,21,156
Total ...	23,07,289	27,85,328

There was an increase of Rs. 4,78,039 in the total expenditure on public instruction during the year.

6. The percentage of boys and girls under instruction to the total male and female population of school-going age was 45·8 and 9·6 respectively as against 41·9 and 8·9 respectively in the previous year. Compared with the total male and female population of the State the percentages were 6·9 and 1·4 as against 6·3 and 1·4 in 1914-15. The total number of pupils in the secondary stage was 49,677 and the percentage of boys in the secondary stage to the total male population of school age was 5·7.

7. According to area and density of population there was 1 school for every 4 square miles and for every 786 inhabitants as against 4·8 square miles and 930 inhabitants in the previous year. By dividing the number of pupils in each grade of education by the total number of institutions the following results are obtained :—

	Average number of pupils in each institution.	Cost for each pupil per annum.
		Rs.
Primary	32	4
Secondary	133	15

The figures given above indicate that there is ample scope for increase in the number of pupils who may be instructed in existing institutions. The Inspector-General of Education and the Education Committee of the Economic Conference should pay special attention to the consideration of measures calculated to ensure proper attendance in existing schools and improve their efficiency.

8. *Compulsory Education.*—In addition to the 15 centres that had been taken up for the introduction of Compulsory Education during 1914-15, 12 more areas were brought under the operation of the Elementary Education Regulation during the year under report. The scheme made good progress in all the places except at Birur and Tarikere which were affected by plague. There is an eager desire on the part of the people for the extension of the scheme to other places, and the Inspector-General of Education is requested to submit proposals for securing more rapid development in this direction during the next few years.

9. *Female Education.*—The number of public schools for girls increased from 475 to 525 and the number of girls under instruction from 37,882 to 41,035 or by 3,153.

The efforts made for encouraging suitable vocational education for women and training them in domestic economy and science have not so far yielded any appreciable results. Of the institutions which maintained home education classes, the Mahila Seva Samaja, Bangalore, and the classes organised at Melkote are reported to be doing good work.

No. 9201-50—EDN. 56-16-20, DATED 11TH MAY 1917.

The Committee of the Maharani's College, Mysore, and the Committees of the Girls' Schools at District headquarters are reported to have shown active interest in the management of the institutions. The Hostel attached to the Maharani's College and the Women's Home at Mysore have been found to supply a real want. It is pleasing to note that several girls are reported to have been spontaneously allowed by their parents or husbands to join the institutions and continue there as boarders.

One lady candidate passed the B.A. Degree Examination of the Madras University from the Maharaja's College during the year under review. Of the seven that appeared for the Intermediate Examination of the same University in 1916, two were successful. Both the girls that appeared for the S. S. L. C. Examination from the Maharani's College, Mysore, were declared eligible for the College course, while of the eight that appeared for the same examination from the London Mission High School, two were declared eligible for admission to College. Eighteen girls passed the English Lower Secondary Examination and 112 the Kannada Lower Secondary Examination.

10. *Results of Examinations.*—The number of candidates who completed their B.A. Degree Examination and became eligible for the Degree was 47, 29 from the Central and 18 from the Maharaja's College. In the Intermediate Examination 52 passed from the Central College with 10 in the first class and 42 from the Maharaja's College with one in the first class. Out of seven candidates that appeared for the Intermediate Examination from the Maharani's College, two were successful.

Eight hundred and eleven candidates were registered for the S.S.L.C. Public Examination, of whom 237 including 4 girls were declared eligible for admission to Colleges and public service and 119 for public service only. Twenty-seven candidates appeared for the Matriculation Examination from the four aided High Schools and of these six passed.

Two thousand one hundred and thirty-four candidates appeared for the English Lower Secondary Examination, of whom 1,010 (including 18 girls) passed, 62 being placed in the first class. Two thousand nine hundred and thirteen candidates appeared for the Vernacular Lower Secondary Examination, of whom 1,348 (including 112 girls) were successful 90 being placed in the first class.

11. The following table gives information regarding the institutions for Special Education :—

Kind	Number of institutions		Number of pupils		Cost in rupees	
	1914-15	1915-16	1914-15	1915-16	1914-15	1915-16
1	2	3	4	5	6	7
Training schools for masters	4	6	258	368	42,869	63,595
Do mistresses	2	2	42	33	5,655	5,453
Engineering schools	2	2	198	208	23,937	30,912
Industrial schools for males	24	25	1,252	1,417	104,317	97,629
Do for females	3	4	104	137		
Practical instruction classes	...	30	...	909	...	832
Commercial schools	4	4	361	355	7,658	11,234
Agricultural schools	2	2	29	27	7,118	9,366
Kindergarten classes	2	1	35	40	487	32
Schools for deaf, mutes and blind	2	2	44	56	3,960	4,285
Other expenditure	...	...	...	...	23,590	23,678
Total ...	45	78	2,823	3,550	2,19,591	2,47,236

12. *Normal Instruction.*—There were in all nine Training Institutions, seven for males and two for females, their total strength being 401 (368 males and 33 females) as against 306 (264 males and 42 females) during the previous year. Vacation classes were held at Bangalore and Mysore and 112 teachers were given instruction. The results though generally satisfactory have not been sufficiently effective to meet the deficiency of trained teachers and further special efforts are needed to increase the supply.

No. 9201-50—Edn. 56-16-20, dated 11th May 1917.

13. *Technical Education.*—There are now four grades of institutions imparting technical education in the State:—

(1) Practical instruction classes, which are auxiliary to the general education classes.

(2) Taluk industrial schools.

(3) District industrial schools.

(4) Special institutions for imparting higher technical education, *viz.*, the Chamarajendra Technical Institute, Mysore, the Mechanical Engineering School, Bangalore, and the Commercial School, Bangalore.

With a view to improve the higher technical institutions Government made a special provision of Rs. 50,000 for improving the Chamarajendra Technical Institute at Mysore and the Mechanical Engineering School at Bangalore. The scale of pay, etc., of the Commercial and the Mechanical Engineering Schools at Bangalore, and the course of study, the scale of scholarships and the scale of establishment, etc., of the Chamarajendra Technical Institute, Mysore, have been revised.

Government have also recently sanctioned the institution of courses and degrees in Engineering and Commerce in connection with the University.

None of the District Industrial Schools sanctioned could be started during the year but all of them have been opened since. The question of revising the whole scheme of Technical Education in the State and placing the institutions in all grades referred to above on a satisfactory basis, is under the consideration of Government.

The work of the practical instruction classes seems also to need improvement. It is understood that many of the industrial institutions situated in the Taluk headquarters are not properly equipped and are inefficiently managed. A special report should be made regarding the state of these industrial schools with information as to which of them may be merged in the Practical Instruction classes and in what respects this scheme which has been working for the last three years requires improvement.

14. *Education of Mahomedans and other classes for whom special encouragement is offered.*—The number of schools for Mahomedans rose from 453 to 530 or by 77; and the total number of Mahomedan pupils increased from 27,390 to 29,292, of whom 21,925 were boys and 7,367 girls, the corresponding figures for the previous year being 20,615 and 6,775 respectively.

An additional Inspector of Hindustani Schools was appointed during the year. Two Mahomedan students passed the B.A. Degree examination, *viz.*, one from the Central College and one from the Maharaja's College. One Mahomedan student passed the Intermediate from the Central College and one the Moulvi Examination from the Training College, Mysore. The percentage of Mahomedan boys and girls under instruction to the total number of Mahomedan males and females of school age were 95·1 and 35·6 respectively, the percentages for the previous year being 89·4 and 32·7. The total expenditure incurred by the State specially for the encouragement of Mahomedan Education is Rs. 1,55,944.

15. The subject of affording special encouragement to all classes in the State who are backward from the point of view of higher education is engaging the special attention of Government and an annual grant of one lakh of rupees has been sanctioned for awarding scholarships to students of backward classes. The recommendations of the Education Committee and the Inspector-General regarding the distribution and administration of these scholarships have been received and are under consideration.

The number of schools for Holeyas, Madigas, Korachas and Lambanis rose from 203 to 264 and the strength from 6,213 to 6,500. The Panchama Boarding School at Mysore has served a useful purpose and a scheme for enlarging it has been sanctioned. In addition to general instruction the Panchama Boarding School also provides for training in gardening, weaving, mat-making, leather-work, etc. Two of the 13 Panchama Schools maintained by the Hindu Depressed class Education Mission combined general instruction with industrial training in weaving and rattan work.

Three new schools were opened for the hill tribes in Gundlupet and Heggadevankote Taluks, their total strength being 63.

The subject of extending the facilities for suitable education to the depressed classes is engaging the attention of Government. A Panchama Conference and Industrial Exhibition were held at Melkote in March 1916, when there was a large gathering of Panchamas.

16. *Medical Inspection and Religious and Moral Instruction.*—The total number of school-children treated for various complaints during the year was 3,210 as against 2,306 in the previous year. Orders have been passed in Government Order No. 5220-68—Edn. 164-14-2, dated 24th March 1916, for a systematic inspection of school-children at District headquarters.

Religious and moral instruction in schools has been a subject of much discussion during the year both at the meetings of the Representative Assembly, of the Legislative Council, and of the Economic Conference. The report does not give any information in regard to the working of the scheme. The Inspector-General of Education is requested to devote a paragraph to the subject in future reports.

17. *School-buildings.*—Out of a provision of one and a half lakhs of rupees sanctioned by Government for the construction of Village School Buildings, a sum of Rs. 58,603 was spent by the Public Works Department and Rs. 31,899 by the Education Department. The expenditure on other school buildings was only Rs. 1,40,655 though under Government Order No. 406-8—Edn. 208-13, dated 23rd September 1914, a sum of two lakhs of rupees is required to be spent annually for such buildings. Including the amount of money received from other sources, *e.g.*, contributions from the people, etc., the total expenditure on educational buildings during the year was Rs. 3,26,968. The Government have reasons to apprehend that want of accommodation and of suitable equipment somewhat retarded the progress of Education during the year under review in spite of adequate provision of funds. The Inspector-General of Education and the Chief Engineer are requested to co-operate with each other in the matter and by settling a definite programme in good time arrange for the proper utilisation of grants sanctioned for the purpose in future years. Improvement in the accommodation of High Schools deserves special attention.

18. *Scholarships.*—There were nine scholarship-holders studying in foreign countries, 26 in Colleges in British India for professional degrees and 40 in Technical Institutions in British India during the year. The total amount spent by the State on scholarships is Rs. 24,000 for foreign scholarships, Rs. 23,575 for scholarships in institutions in British India, and Rs. 45,722 for scholarships within the State. The University Council were requested to examine the system of University Scholarships and submit suitable proposals to adjust them to the needs of the State in respect of University Education. Their report has been received and is under consideration. Government would be glad if the Inspector-General of Education would, in consultation with the Education Committee of the Economic Conference, similarly review the whole scheme of scholarships in the other grades and submit comprehensive proposals for revising the same so that the objects with which they were instituted may be fully attained.

19. *Equipment.*—Representations are being made frequently in the Representative Assembly regarding the difficulty experienced in obtaining text-books and by frequent changes of the same. The Inspector-General is requested to adopt special measures to overcome the difficulties brought to notice and also submit proposals for the development of the Government Book Depot in order to equip it so as to meet the growing needs of the educational institutions.

The working of the depot not having been satisfactory a detailed audit of the accounts of the depot was ordered and steps were taken to remedy several irregularities brought to notice. The Inspector-General of Education has been requested to submit proposals to work the depot on commercial lines.

20. *Conclusion.*—Government have sufficiently indicated in the foregoing remarks the importance of consolidating the work already carried on by the Department in connection with the various special measures adopted for the extension

No. 9201-50—Edn. 56-16-20, dated 11th May 1917.

of education in the State. They are pleased to observe that the Inspector-General of Education has endeavoured to enlist the co-operation of all agencies in the State that could help in the advancement of education. It may be hoped that this will secure steady and rapid progress in all directions. Government have already separately acknowledged the munificent contributions made by individuals for the furtherance of education referred to in paragraph 30 of the report. The manner in which the demand for buildings and equipment has been readily responded to by the people in the shape of liberal contributions and the general interest displayed in all parts of the State by the public in the welfare and efficiency of schools are very hopeful signs for the further development of education. The Inspector-General of Education is requested to convey the appreciation of Government to all School Committees and public spirited gentlemen who have co-operated with the department during the year.

The thanks of Government are due to Rao Bahadur Mr. M. Shama Rao, for the efficiency with which the department has been managed and the staff as a whole deserve great credit for the enthusiasm displayed by them in their work and the satisfactory results attained.

PRESS TABLE.

Exd.—C. R.

Chamarajendra Technical Institute, Mysore.

No. 8891-3—Edn. 45-16-27, dated 5th May 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Read—

Government Order No. 8834-40—Edn. 462-09-24, dated 1st May 1913, sanctioning among other things the formation of the Chamarajendra Technical Institute at Mysore.

2. Correspondence ending with letter *No. 10346-385, dated 9th November 1916, from the Inspector-General of Education in Mysore, submitting proposals for revising the courses of study in the Institute, the scale of its establishment, and the number and value of the scholarships tenable in the Institute.

3. Correspondence ending with letter * No 14767-582, dated 5th January 1917, from the same officer, on the subject explaining the scheme of revision further.

4. Letter No. 14639-576, dated 12th January 1917, from the same officer stating that there is need in the Institute for the employment of a qualified Assistant Superintendent on a pay of Rs. 200—20—300 to help the Superintendent in the management and development of the Institution, and recommending that the present provision of Rs. 125 per mensem may be raised to Rs. 200—20—300 and also the appointment of a Chief Foreman or Sub-Assistant Superintendent of the Institute on a pay of Rs. 75—10—125.

*Printed as annexures.

Order No. 8891-3—Edn. 45-16-27, dated 5th May 1917.

The Inspector-General of Education has stated that in the light of the experience gained during the three and a half years for which the Institute has been working, the revision now proposed has become necessary.

2. The revision is mainly in regard to the existing courses in carpentry and cabinet-making and the allied subjects of wood-carving, inlaying and engraving. The period of training is to be spread over four years instead of three years as at present; and an advanced course for two years is also to be provided for training twenty selected students out of those that have completed the four years' course satisfactorily, in designing and advanced cabinet making, with a view to their finding employment afterwards as foremen of workshops. Out of these twenty students to be selected eleven will be from the Mysore City and the remaining nine students will be from mofussil places, two from the Bangalore District, one from the Mysore District and six from the other six districts at one from each district.

The course of instruction imparted in carpentry in the Mechanical Engineering School, Bangalore, is different from that in the Chamarajendra Technical Institute, Mysore, in that the latter institution is meant for the training of workmen and artizans while the former attempts to train a superior class of men for employment as managers and superior foremen. It is also contemplated to abolish all the carpentry classes in the Mechanical Engineering School, except in connection with pattern-moulding.

3. The Engineering section of the workshop of the Institute is proposed to be abolished as it has not been possible to run it on commercial lines as directed in the Government Order read above and the advance of Rs. 13,000 provided for the purpose is to be treated as rolling capital for advanced work in cabinet-making, the annual provision of Rs. 4,200 for materials being considered as a grant to cover the wastage of materials caused by the students. The major portion of the machinery is to be shifted to the Mechanical Engineering School, Bangalore.

4. The number of admissions to the carpentry section is to be increased from 20 to 30; and first year classes are also to be opened for mofussil students in the Arts courses of painting, decorative art and modelling.

No. 8891-3—Edn. 45-16-27, dated 5th May 1917.

5. The scholarships tenable in the Institute are also to be revised in their number and value, providing for students coming from mofussil places and from the District Industrial Schools. A sliding scale of scholarships has been recommended so that the scholarships in higher classes are of a higher value than the scholarships in the lower classes. The revised scheme of scholarships involves an additional cost of Rs. 6,084 per annum.

6. Tools, models, book cases, etc., at a cost of Rs. 5,000 have been recommended to be purchased for use in the Institute.

7. The undermentioned additional establishment has also been proposed for improving the equipment of the institution:—

Item	Additional cost in Rupees per annum. Rs.
One Assistant Superintendent on Rs. 200—20—300, in place of the present appointment on Rs. 125	... 1,700 average
One Sub-Assistant Superintendent or Chief-Forman ...	... 1,300 do
One Assistant Accountant	... 300
One Hindustani Teacher	... 120
One Attender	... 120
One Demonstrator	... 600
Grant for experimental purposes	... 200

The Inspector-General says that a graduate Mechanical Engineer on a pay of Rs. 200—20—300 is needed for the place of the Assistant Superintendent; and he requests that he may be authorised, if no suitable officer can be had from the Public Works Department, to advertise the place and call for applications for the same from competent persons.

8. The proposals regarding the increase of establishment and the revision of the courses of study in the Chamarajendra Technical Institute and of the scale of scholarships are all well considered. The schemes for revising the commercial section of the institute, the Commercial School, Bangalore, and the Mechanical Engineering School, Bangalore, have all engaged the attention of Government separately and orders have already issued on the subject.

The recommendations now made in connection with the Chamarajendra Technical Institute are approved and sanctioned. The workshop will only be abolished after the railway workshop is brought into working order and till then separate accounts should be maintained for this concern allowance being made for losses due to the training of students. The additional cost involved during the current year will be met from the lumpsum provision made in the budget of 1916-17 for technical schools.

9. The Inspector-General is requested to submit a revised detailed up-to-date syllabus of studies, etc., in the institute at a very early date, and to state clearly in the half-yearly reports of the Institute, how these improvements now sanctioned have tended to increase the usefulness of the Institution.

The Inspector-General is also requested to submit separate proposals for filling up the place of the Assistant Superintendent on Rs. 200—20—300 after inviting applications from competent and qualified persons.

P. G. D'SOUZA,
Secy. to Govt., Depts. of Edn. & Agri.

To—The Inspector-General of Education in Mysore.
The Comptroller, Mysore Government, through Branch II.
The Secretary, Economic Conference.

Exd.—C. R.

No. 8891-3—Edn. 45-16-27, dated 5th May 1917.

Annexure No. I.

No. 10346—385, dated 9th November 1916, from Rao Bahadur M. Shama Rao, Esq., M.A. Inspector-General of Education in Mysore, to P. G. D'Souza, Esq., B.A., B.L., Secretary to Government of His Highness the Maharaja of Mysore, Departments of Education and Agriculture.

I have the honor to invite attention to Government Order No. 8834-40—Edn 462-09-24, dated 1st May 1913, sanctioning the formation of the Chamarajendra Technica Institute, and to my letters Nos. 22486-7—941 and 24739—1049, dated 8th and 10th Ma 1916, respectively, submitting certain proposals for its improvement. The Institute has no been working, under the modified conditions for the past 3½ years, and in the light of th experience thereby gained, a revision of the original scheme in certain directions has furthe become necessary.

The Managing Committee of the Institute resolved at a meeting held on the 12t January 1916, that such revision should be undertaken mainly in regard to the existin courses in carpentry and cabinet-making and the allied subjects of wood-carving, inlaying an engraving. They also resolved that the Engineering Section of the Workshop might b abolished and that the training in carpentry and the allied subjects referred to above shoul be spread over a period of four years, instead of three years as at present, followed by a advanced course of two years, in which selected students are to be trained in designing and ad vanced cabinet-making with a view to their finding employment afterwards as Foremen o workshops. The workshop as originally sanctioned in paragraph 4 of the Government Orde referred to above is required to be managed on commercial lines. It was equipped at a cos of Rs. 31,000 and an advance of Rs. 13,000 has been placed at the disposal of the Managin Committee for working expenses. The workshop consists of two branches, *viz.*, the Carpentr branch and the Engineering branch. The Managing Committee now propose that only th carpentry branch may be retained for providing advanced training in cabinet-making, whil the Engineering Section of the Workshop may be abolished as it has not been possible t work it on strictly commercial lines in an Institution the main purpose of which is educa tional and not commercial. They also desire that the advance of Rs. 13,000, provided ma be treated as a rolling capital for advanced work in cabinet-making, while the annual provi sion of Rs 4,200 for materials may be considered as a grant to cover up the wastag in materials caused by the students.

The reasons that have led the Committee to propose the abolition of the Engineerin Workshop may be briefly summarised thus :—

(1) The direction of Government for managing the workshop section on commercia lines and for maintaining a separate account for the purpose necessitates th maintaining of two different sets of accounts, one for stores and the other for th work orders, thereby giving rise to endless complications in proportioning th relative costs of supervision, machinery, establishment, etc.

(2) The number of work orders received during the year is not sufficient to run workshop of this kind on a profitable basis, as may be observed from the figure given by the Deputy Comptroller in his audit report and here quoted.—

Direct charges.—

		Rs.
Engine charges	...	1,220
Workshop wages	...	3,060
Materials	...	3,680
Total	...	7,960

Indirect charges.—

		Rs.
By interest at 4 per cent on Block, Rs. 25,000	...	1,600
Do on Machine Rs. 15,000	...	
Do on Capital Rs. 13,000	...	520
By depreciation—block, tools, etc. ...	...	1,350
Supervision and office charges ...	...	3,000
Leave and pension allowance ...	...	1,200
Repairs to machinery, etc. ...	...	300
Total	...	7,970
Grand Total	...	15,930

The indirect charges on the workshop as defined by the Deputy Comptroller an amounting to Rs. 7,970, have to be earned in any case whether the machinery is at work o is idle. It is customary to add in the case of a work order, to the total of raw materials an

No. 8891-3 Edn. 45-16-27, dated 5th May 1917.

wages at least 25 per cent of such total to recover these indirect charges. Thus it practically involves the need to secure and execute work orders to the extent of at least 4 times Rs. 7,970, *i.e.*, Rs. 31,880 a year before the accounts can be balanced, not to speak of the direct charges amounting for this particular year to Rs. 7,960. This large amount of work orders is, it is stated, not easy to secure in the Mysore City at present, especially as the main feature of institution is, as was said above, educational and not strictly commercial, and also without seriously competing with private persons in the canvassing of such orders. It is therefore proposed that the Engineering Section of the Workshop should be abolished, and that for such training as this has been providing, the students may be sent to the Railway Workshops which are coming into existence in Mysore.

I agree with these proposals of the Committee and beg to recommend to Government that they may be sanctioned.

If the modified scheme of working proposed above is sanctioned by Government a new scheme of scholarships will also become necessary. The Committee of the Chamarajendra Technical Institute recommend that 20 per cent of the scholarships be reserved for mofussil students, that the amount of scholarship be raised to Rs. 10 per month in their case and that the condition laid down in Government Order No. 8834-40—Edn. 462-09-24, dated 1st May 1913, (page 18) that the expenditure under scholarships should be limited to Rs. 500 per month be rescinded and the full amount of Rs. 1,000 be allowed to be utilized.

Taking into account, however, the needs of not only the Chamarajendra Technical Institute, but also of the new District Industrial Schools and their co-ordination, a modified scheme on a broader basis as given in Statement A. appears to be necessary for the purpose of providing special scholarships to the mofussil students also as suggested in the correspondence ending with your letter No. 7623— Edn. 19-15-89, dated 27th June 1916. The main lines on which the scheme of scholarships has been drawn up are the following:—

(1) The carpentry and cabinet-making courses and the allied courses of wood-carving, inlaying and engraving are to be spread, as proposed by the Committee, over a period of four years instead of three years as at present.

(2) The number of admissions to the carpentry section is to be increased from 20 to 30 per year, the number of admissions, however, to each of the remaining allied sections of wood-carving, inlaying and engraving continuing to be 5 as at present.

(3) Twenty students selected out of the men that complete satisfactorily the course for four years in these subjects are to be given an advanced training in cabinet-making for an additional two years to enable them to make high class furniture and to become foremen of workshops. Of these twenty, however, eleven places, according to my proposal, are to be open to local men and nine specially reserved for mofussil students. (Two for Bangalore District, one for Mysore District outside Mysore town and one for each of the remaining six districts).

(4) The Smithy, Rattan and Metal work courses for thee years are to continue on their present basis with 10 admissions annually to each section and with scholarships at Rs. 2, Rs. 4 and Rs. 6 for the 1st, 2nd and 3rd years respectively.

(5) The students of the new Industrial Schools opened at Hassan, Chikmagalur, Shimoga and Chitaldrug and of other schools to be opened are all to complete their training in the mofussil schools only, in the courses for which provision is made in them and then join the Chamarajendra Technical Institute for the two years advanced training in cabinet-making, such students being given higher rates of scholarships at Rs. 10 and Rs 12 each per month for their 1st and 2nd years of advanced training.

(6) In the Arts courses of painting, decorative art and modelling, the number of admissions in the 1st, 2nd and 3rd years is to continue as at present at 15 per year, but the courses are to be open to mofussil students from the first year, there being no provision for the teaching of such courses in the mofussil schools. There are to be ten scholarships per year at Rs. 2, 4 and 6 each per mensem for the 1st, 2nd and 3rd years if they are local men or at Rs. 6, 8 and 10 if they are mofussil men. Out of the ten scholarships, two are to be allotted for the Mysore City and one for each of the districts.

(7) Ten students are to be selected for advanced training in the Arts courses for two years, from among those who satisfactorily complete the usual three years' course and are found to possess special talent in their line, each student being given scholarsips at Rs. 10 and Rs. 12 per mensem for the 1st and 2nd years.

(8) All unutilized mofussil scholarships are to be open for distribution at lower rates to the local students if such are forthcoming.

According to the scheme now proposed, the value of the scholarships in the different branches of the Industries and Crafts Section and of the Arts Section totals up to Rs. 1,687 per month or to Rs. 30,244 per annum as indicated in the annexed Statement A. There is a budget provision of Rs. 14,160 for scholarships tenable in the Industries and Crafts Section as

No. 8891-3—Edn. 45-16-27, dated 5th May 1917.

well as in the Arts Section of the Chamarajendra Technical Institute under the head 18 (*c*) Education scholarships and an increase of Rs. 6,084 per annum will be needed when the scheme of scholarships as proposed by me comes into full working order. For the first year, however, as there will be only one advanced Carpentry Class and one advanced Fine Arts Class, and in other ways also there will be savings, the amount required for scholarships will be Rs. 13,956 as per details given in Statement B, so that the sanctioned grant under the head of scholarships will not be exceeded. It is also possible that both in the first year and for some years to come till the mofussil industrial schools are sufficiently developed and are able to contribute students for higher training in the Chamarajendra Technical Institute in sufficient numbers, the maximum amount of Rs. 20,244 will not be reached on account of the lower rates of scholarships proposed to the local students who take the places of the mofussil students when the latter are not forthcoming.

A sum of Rs. 5,000 is also needed for the purchase of tools, models, book cases, etc., for the use of the Chamarajendra Technical Institute.

Again in the proposals submitted to Government with my letter No. 22486-7—941, dated 8th May 1916, I have asked for the appointment of a Demonstrator on Rs. 25 per month for experimental work. As it is now represented that such a man cannot be had for anything less than Rs. 50 per month, I recommend that Government may be pleased to sanction the appointment of a Demonstrator on Rs. 50 per month.

To sum up, the cost of the proposals now made and of those already submitted stands as follows :—

CHAMARAJENDRA TECHNICAL INSTITUTE, MYSORE.

No.	Items	Recurring	Non-recurring	Remarks
		Rs.	Rs.	
1	Assistant Accountant ...	300	.....	Already proposed in my letter No 22486-7-- 941, dated 8th May 1916.
2	One Hidustahi Teacher ...	120	.....	
3	One Attender ...	120	.....	
4	One Demonstrator ...	600	.....	
5	For experimental purposes.	200	.....	
6	Increase under scholarships	6,084		This is required only when the scheme of scholarships comes into full working order.
7	Purchase of models, tools, book cases, etc. ...	.....	5,000	This amount is required in lieu of Rs. 800 asked for in my letter No. 22486-7, dated 8th May 1916.
	Total ...	7,424	5,000	
8	Commercial Section ...	3,804	2,300	(*Vide* my letter No. 24739—1049, dated 20th May 1916.)
	MECHANICAL ENGINEERING SCHOOL, BANGALORE.			
1	Revision of the scales of pay of the establishment of the school ...	4,317⅓	.....	(*Vide* proposals contained in my letter No. 22488-90—942, dated 8th May 1916.)
2	Increase under contingencies	200	.....	In the proposal sent by me to Government with my letter No. 22488-90—942, dated 8th May 1916, a sum of Rs. 5,237½, has been included, including the increase of pay recommended by the Committee to the Superintendent, but as it has since been ordered that his pay is to be according to the time scale obtained in the Public Works Department as per Government Order No. 300-2—Edn. 32-15-167, dated 10th July 1916, the increase is omitted here.
3	Increase under scholarships	4,620	.....	
4	Increase under travelling allowance ...	400	.....	
5	Purchase of one old Motor Car	.....	2,000	
6	Accessories for old Motor Car	.....	1,000	
7	Three Phase Induction Motor 10 H.P., 25 cycles (Japanese) ...	.....	750

No. 8891-3—Edn. 45-16-27, dated 5th May 1917.

Annexure No. II.

No. 14767-582, dated 3rd—5th January 1917, from Rao Bahadur, M. Shama Rao, Esq., M.A., Inspector-General of Education in Mysore, to P. G. D'Souza, Esq., B.A., B.L., Secretary to the Government of His Highness the Maharaja of Mysore, Departments of Education and Agriculture.

In reference to your letter No. 4209—Edn. 66-16, dated the 7th December 1916, I have the honour to submit the following replies in connection with the questions raised therein:—

1. The course of training provided in the Institute at Mysore would not be analogous to that provided at the Mechanical Engineering School, Bangalore, for the two schools give different courses of training and cater for different needs. The Chamarajendra Technical Institute is primarily meant for the training of workmen and artizans, while the Mechanical Engineering School attempts to train a superior class of men for employment as managers and superior foremen. Moreover the students at the Mechanical Engineering School are required to possess higher educational qualifications and are altogether of a superior grade to those at the Chamarajendra Technical Institute. There is, therefore, no common ground between the courses provided in the two institutions and in fact a proposal is now under consideration to abolish the carpentry classes originally started at the Mechanical Engineering School, as whatever pertains to pure cabinet-making should find no place at the Mechanical Engineering School. Only such portions of the carpentry training as will bear upon pattern-moulding will be retained and for the advanced portions of carpentry including cabinet-making the students are to be sent to the Technical Institute at Mysore. The courses will be of the same standard only so far as both try to give instruction up to the secondary grade of Industrial Education.

2. As regards the machinery now in the workshop, some of it will be needed at the Chamarajendra Technical Institute, while the major portion will be transferred to the Mechanical Engineering School. It may be said, however, that the abolition of the Mechanical Engineering Section of the Workshop only means the abolition of the running of the section as a commercial unit and not of the abolition of the whole lot of machinery attached to it. It has been stated, as may be observed, on page 2 of my letter No. 10346-385 of the 9th November 1916 that as the Chamarajendra Technical Institute is mainly educational, the attempt to run the Engineering Section on commercial lines is impracticable and that the advance of Rs. 13,000 provided for running this section may be treated as a rolling capital for advanced work in cabinet-making, while the annual provision of Rs. 4,200 for materials may be considered as a grant to cover up the wastage of materials caused by the students. It will thus be seen that there will be no saving effected by the proposed abolition.

3. Mention is made of the opportunities likely to arise by the development of the Sandalwood Oil Factory and other Industrial concerns in the City of Mysore for improving the Mechanical Engineering Section, and that full advantage should be taken of such opportunities. I understand from Mr. V. Rangaswami Iyengar that the machinery and stills necessary for the factory have already been ordered and are already on the way. Whatever repairs are necessary in connection with industrial concerns in Mysore will naturally be undertaken at the Institute, but the main point is that the attempt to run the Mechanical Engineering Section as a commercial unit has to be abandoned once for all.

4. With regard to the question of the necessity of entertaining any additional staff in connection with the revision of the course now proposed, I beg to invite attention to page 6 of my letter quoted above, where I have asked for the appointment of a demonstrator on Rs. 50 a month. The work of this demonstrator is primarily in connection with the preparation of designs for the advanced courses in cabinet-making and this is the only appointment that is necessary in connection with the revision of the courses proposed.

5. It has been stated that there is a higher rate of scholarships for the Technical Institute at Mysore than in the Mechanical Engineering School at Bangalore. This is only apparent as only the amount of scholarships drawn in the final year of the course seems to have been compared, for, as will be seen on a reference to the statement A. enclosed with the letter quoted above, the rates of scholarships are only Rs. 1, 2, 3, and 5 for the first four years, respectively, while for the advanced courses Rs. 8 and 10 for the first and second year have been provided for local students and Rs. 10 and Rs. 12 for these years for mofussil students, whereas in the Mechanical Engineering School there is a uniform scholarship of Rs. 8 from the time the student enters the school to the time he leaves it. The scheme of scholarships at the Technical Institute has been drawn up on a sliding scale and seems to be very much fairer distribution in proportion to the work done by the students than it is in the case of the Mechanical Engineering School. No wages are paid to any students who are in receipt of scholarships but an attempt is at present being made to evaluvate the labour of advanced students and balance this against the amount of their scholarships, in view of the fact that by the fifth or by the sixth year of their training they are able to make marketable articles.

No. 8891-3—Edn. 45-16-27, dated 5th May 1917.

Copies of the report of the committee and of a note by the President are enclosed, and I request that in the light of this information now supplied, early orders of Government may be kindly obtained in the matter of this revision so as to facilitate the drawing up of the syllabus and details of instruction for the new District Industrial Schools.

No. 17, Enclosure 2, Mysore, 21st December 1916. from the Secretary, Chamarajendra Technical Institute, Mysore, to the Inspector-General of Education in Mysore, Bangalore.

Re Alteration in the Length of Courses in Industrial Section and the Abolition of Workshop Section.

Under directions from the management committee of the Chamarajendra Technical Institute, I have the honour to invite your kind attention to Resolutions Nos. 2 and 14 noted below passed in the managing committee meetings held on 12th January 1916 and 21st August 1915 copies of which were already forwarded to you for orders.

I request the favour of very early orders on the subject.

Copies of the note by Mr. H. G. Alderton and also the one by Mr. V. Rangasamy Iyengar for the abolition of the Workshop are also enclosed for information.

Resolution 2.

The following recommendations were made by the committee:—

(*a*) The course of training which, at present, is one of three years, followed by two years in the workshop be changed to a four years' course in the Training Section.

(*b*) Selected students be given two years advanced training to befit them for the posts of Managers, Foremen, etc.

(*c*) The selection be made on the results of an Examination of the second form standard.

(*d*) The number of annual admissions per year to remain at 65.

(*e*) The scale of scholarship be altered as given below:—

			Amount Rs.	a.	p.
Industries and applied industries.	65 Re. 1 1st year, second 6 months	...	32	8	0
	65 Rs. 2 for second year	...	130	0	0
	65 Rs. 3 for third year	...	195	0	0
	65 Rs. 5 for fourth year	...	325	0	0
			682	8	0
Advanced Training	20 at 8 for fifth year	...	160	0	0
	20 at 10 for sixth year	...	200	0	0
			1,042	8	0

(*f*) The number of admissions to the Advanced course be fixed at 20 per year.

(*g*) The grant of Rs. 1,300 for the workshop be transferred as a rolling capital to the Training Section and the annual provision of Rs. 4,200 for materials be considered as a grant to cover up the wastage in materials likely to be caused by students.

(*h*) The Workshop as a separate section be abolished; but the students in the advanced course be given training in handling the workshop machinery; the foremen of the shop be taken on the permanent establishment.

Resolution 14.

Proposed by Mr. V. Rangaswamy Iyengar, that as a Railway Workshop will soon be established in Mysore, the students of the Fitters and Blacksmithy Sections in the Chamarajendra Technical Institute be sent to that workshop to undergo the years' Apprentice course and that the present Engineering Workshop be converted into a Metal-work Workshop.

Resolved that the proposal be approved; and that the sanction of the Government be obtained for the same.

WORKSHOP.

Causes Derogatory to the Present Workshop Training.

The Government Order states that pupils after the 3 years' course are to receive 2 further year's *training* in the Workshop, but the present course gives rise to considerable complications without accomplishing its purpose. The Workship must run on commercial lines but the training of knowledge gained by the students must also be considered a factor in reckoning the returns for the expenditure incurred by the State. The products of the workshop

therefore are primarily knowledge, secondarily finished work orders; and to be commercially successful the cost of the work orders on the present system must also bear the additional cost of training.

The workshop orders are at present executed by the apprentices, with the additional help, when necessary, of workmen engaged per diem from outside, whereas for the training to be beneficial it should be *vice versa*, *i.e*, the apprentices in minor numbers should be admitted into a large workshop. The possible amount of work orders will not allow a workshop on a sufficiently large scale to be maintained here.

To keep the accounts of the workshop separate, two different accounts of stores and work orders must be maintained which together with proportioning the costs of supervision, machinery, establishment, etc., to each order, not only give cause for endless complications but also hampers the clerical staff with needless work.

The idea of the workshop training is excellent, but a workshop on a sufficiently large scale to efficiently fulfil this purpose cannot be maintained here, and therefore from an educational view the workshop is unsatisfactory and its commercial value to the State very questionable. The proposal to incorporate the present workshop with the coming Railway Workshop is undoubtedly good.

(2) A revised scheme for training, therefore, is proposed as follows:—

That the present workshop system be abolished and the three years' training (Carpentry and Cabinet-making, Rattan and Smithy and Fitters) be extended to four years. (Scholarships Rs. 2 per mensem, 4 and 6). It is found that the physical strength of the boys is not sufficiently developed by the end of the second year to enable them to finish the course in three years; nor is the work considered to have reached a sufficiently high standard by the end of three years' training. The lack of any education amongst the boys joining this school very seriously handicaps their training.

(3) That the present workshop training be converted into an extra two years' training for students who have shown exceptional ability during the previous four years' course, and can pass a prescribed test of proficiency to fit them as foremen and overseers, etc. Similarly intelligent students from other schools in the State could be admitted into this section, and in this manner the numbers would be kept up. This section should prove of considerable value.

A regular course of superior work should be followed; but work-orders in all sections will be executed, the order being placed as a fitting alternative to the work of the regular course, *i.e.*, in that section whose work of instruction coincides in difficulty to the work order. As it is inadvisable that the progress of advanced students should be retarded by spending time on Elementary work such as could be carried out to advantage to students in an earlier stage of training. The students should estimate, indent to stores for materials and keep a record of labour, to be checked finally by the Instructor. This will give the student a training in estimating and teach the commercial value of time or labour and material, and in addition they should receive some slight knowledge of Book-keeping. These students instead of payment by results of labour should receive a scholarship, proposed Rs. 8—10.

(4) The number of scholarships previously allowed for the three years' course will be divided among the four years, giving the same number of students in the classes, *i.e.*, 60 scholarships were allowed in the Carpentry Section for three years basis—20 per year—this for four years' course will mean 15 entries per year.

Note on the proposal to abolish the Engineering Workshop and convert it into a workshop for Metal work.

---

1. In the Chamarajendra Technical Institute we have a Training Section and a Workshop Section.

2. The object of the Workshop Section is to give the students of the Training Section a two years finishing course under condition somewhat similar to what exist later on in their life.

3. The Workshop Section at present consists of an Engineering Workshop and a Carpentry Workshop.

4. The Carpentry Workshop has been doing excellent work, but the Engineering Workshop has not been found so well mainly owing to want of outside support.

5. As the Railway Department will soon be having a big workshop in Mysore it has occurred to me that it would be better if we send the students to that Institution to undergo 4th and 5th year courses. That Institution will no doubt be better equipped and the student will have better chances for improving their skill. We will be also avoiding duplicating similar Institutions in the same place. Incidentally some of them may also be able to find permanent employment.

If this be sanctioned, then I propose that in place of the Engineering Workshop we start a workshop for Metal work and thereby introduce a new industry. I propose to instal an up-to-date plant for the manufacture of all kinds of articles in brass, aluminium and steel. It will be somewhat on the lines indicated by me in a report, which I submitted to Government as a result of my inspection of the Madras Aluminium Factory.

7. The question of utilizing the permanent machinery need not frighten us as the whole can be taken away for the enlarged workshop in Bangalore.

NOTE.

The following proposals of the Managing Committee of the Chamarajendra Technical Institute, Mysore, have to be submitted to the Government and their sanction obtained for the same.

1. *The abolition of the Engineering Workshop and the substitution in its place of a metal-working Workshop.*—The Engineering Workshop has not been doing as well as it was expected and hence it was proposed to abolish it. The reasons that led the Committee to recommend this proposal are contained in my note appended to the proceedings of the meeting dated the 21st August 1915.

The other report alluded to in para 6 of the note is herewith appended for ready reference. If the scheme be sanctioned Mr. Alderton will be requested to submit detailed proposals with estimate of costs both recurring and non-recurring.

2. *Proposed Re-organization of the Carpentry Section.*—A note was submitted by Mr. Alderton on this soon after he took over charge of the Institute. This note was considered by the Managing Committee at a meeting held on the 12th January 1916. Mr. Alderton's note explains the necessity for the re-organization and the advantages that may accrue from it. The Managing Committee after thorough discussion recommended the same for adoption as Mr. Alderton was so sanguine of its success. The scheme no doubt has certain good features and deserves to be given a trial. The financial aspect of the scheme may be ascertained from Mr. Alderton in more detail.

With the adoption of this proposal and the abolition of the Engineering Workshop, the so-called workshop section of the Institute will disappear which will considerably simplify the maintenance of accounts, and the Committee is assured by Mr. Alderton that the results will be far superior. The Committee is therefore anxious that these two important alterations in the sanctioned schemes may be kindly sanctioned by the Government with a view to testing the soundness of the proposal and giving Mr. Alderton a scope to achieve better results than in the past. And if our expectations are realised the Committee will lose no time in asking Mr. Alderton to re-organize the other branches. It is important at the earlier stages that no wholesale changes are introduced and as Mr. Alderton will find enough new matter to operate upon and put to shape the Government will be well advised to defer all further contemplated revisions of the existing course of studies in the Institute.

State Scholarship-holders.

No. 9640-90—Edn. 3-16-179, dated 23rd May 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Order No. 9640-90—Edn. 3-16-179, dated 23rd May 1917.

One of the conditions under which State scholarships are granted for professional training such as Medicine, Engineering, etc., is that the scholarship-holder should execute an agreement binding himself to serve the State for a specified number of years after the completion of his training.

2. In the case of foreign scholarships it has been laid down in Government Order No. 763-813—Edn. 400-13-1, dated 22nd October 1914, that the obligation to serve the State does not extend beyond six months after return to Bangalore in the absence of an offer of employment to the candidate concerned within the said period. Government are of opinion that the same rule may be made applicable to all State scholarship-holders who are under an obligation to serve the State.

3. After passing their final Examinations the scholarship-holders will be required to report themselves to the Heads of the Departments concerned who should arrange to provide them with suitable appointments within six months. If this is found impracticable the candidates should be informed accordingly with the approval of Government and in all such cases the obligation to serve the State will be deemed to have ceased and the students will be at liberty to accept employment elsewhere.

4. If there is any reasonable prospect of the services of the scholarship-holders being utilized soon after six months though not exactly within that period, the Heads of the Departments concerned should make arrangements under the orders of Government to keep them attached to the respective departments, and continue their stipends until they can be absorbed in the department.

No. 9616-7—Edn. 12-16-127, dated 23rd May 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Order No. 9616-7—Edn. 12-16-127, dated 23rd May 1917.

The Government of His Highness the Maharaja of Mysore are pleased to prescribe the following rules to regulate the powers of the University Council in the matter of incurring new expenditure.

(1) No appointment carrying a pay of or rising to Rs. 100 or more may be created without the sanction of Government.

(2) Subject to the above limit temporary appointments may be created by the Council for a term not extending beyond the end of the financial year, provided the total cost of the appointments so created does not exceed a certain allotment in the budget to be specifically provided for each year under the head "Temporary Establishment."

(3) If any such temporary appointment has to be made permanent, provision should be made in the next year's budget under "Permanent Establishment," and the necessity for increasing the permanent establishment charges explained in a memorandum which should receive the previous approval of Government.

(4) All increases in pay of appointments which raise the pay or the maximum rate of pay to Rs. 100 or more should be sanctioned by Government.

(5) Permanent increases in the pay of appointments below the foregoing limit when included in the budget should be explained in a separate memorandum accompanying the budget and will be taken as sanctioned after the budget is approved by Government.

(6) Temporary increases below the limit in clause 4 above may be sanctioned by the Council until the end of the financial year if the extra cost is met from the grant referred to in clause (2).

(7) Under heads other than establishment, the University Council may sanction any expenditure provided it is included in the budget or is met by re-appropriation. In the matter of purchases, the rules laid down in Government Order No. Fl. 2760-809—G. F.—214-10-88, dated 23rd December 1913, should be observed.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Read—

Letter No. 2944—E C, dated the 4th February 1917, from the Secretary, Education Committee, requesting approval of Government to a scheme for having lectures on scientific subjects delivered for the benefit of the masses in the cities of Bangalore and Mysore, in the district and taluk towns and also in rural areas, and requesting that a provision of Rs. 5,000 be made in the budget for the year 1917-18 for the purpose.

2. Letter No. 3721, dated the 17th March 1917, from the Secretary, Education Committee, forwarding in continuation a note by the Chairman, Education Committee, giving further details of the scheme.

3. Note dated the 27th April 1917, by the Chairman, Education Committee, enclosing proceedings of an extraordinary meeting of the Kannada Popular Science Association held on Tuesday the 24th April 1917.

Order No. 9562-74—Edn. 126-16-4, dated 21st May 1917.

Government are of opinion that it is very important to disseminate scientific knowledge amongst the population of the State as widely as possible, and they agree that a system of popular lectures in Kannada by gentlemen trained in Science and engaged in scientific work is one of the best means of attaining that object.

2. At the instance of the Chairman, Education Committee, the Kannada Popular Science Association has undertaken to help in the matter, such work being one of the objects for which the Association was founded. The Association consists of members noted in the margin, and all the members are not only graduates in Science well versed in their respective subjects but are conversant with and interested in the development of the Kannada language.

Mr. M. K. Venkata Rao, M.A.,
" S. V. Setty, B.A., etc.
" Y. K. Ramachandra Rao, B.A.
" C. Srikantiah, B.A.,
" A. Subba Rao, B.A.
" N. Venkatesa Iyengar, B.A.
" B. Venkatanarayanappa, M.A.
" B. G. Srinivasacharya, F.R.C.S.
" K. Bhima Rao, B.A.
" L. Subba Rao, M.A.

3. The Association has resolved as follows:—

(i.) That the Association do undertake to deliver half-a-dozen lectures in Kannada on each of the following subjects in the course of the next official year:—

Physics.
Chemistry.
Botany and Agriculture.
Engineering.
Industrial Science.
Geology and Mineralogy.
Physiology and Zoology (including Anatomy.)
Astronomy and Meteorology.

(ii.) That the Chairman of the Education Committee be requested to obtain the necessary permission for delivering these lectures by the Members of the Association, who are all Government servants.

(iii.) That, for the present, the lectures be delivered only in Bangalore and Mysore.

(iv.) That the Association do accept no remuneration.

(v.) That to enable the Association to get the lectures prepared, the Chairman of the Education Committee be requested to agree to buy at least 600 copies of each of the printed lectures for a lump sum of Rs. 100 each and to advance the money as may be required by the Association.

(vi.) That the Chairman of the Education Committee be requested to obtain permission from the institutions concerned for the use of the apparatus and other appliances that may be required for delivering these lectures.

(vii.) That the Chairman of the Education Committee be requested to obtain sanction for payment of travelling expenses to lecturers and freight on apparatus, etc., as per Service Regulations.

(viii.) That in case the above proposals are accepted, an early communication may be sent to enable the members of the Association to begin the preparation of lectures at once.

4. The Government are pleased to accord general sanction to the scheme and to authorise the Chairman of the Education Committee to incur such expenditure as may be necessary for the purpose of starting work as soon as possible. A sum of Rs. 5,000 is placed at his disposal for the purpose by reappropriation from savings under the Head 18 (H), Education (9) grants-in-aid reported to be available by the Inspector-General of Education in his letter No. 18246-706, dated the 9th February 1917. When the members of the Association may not be able to proceed to out-stations to deliver the lectures, arrangements may be made for having the lectures delivered by other competent men in as many centres as possible. Preparations for the work should begin at once and if possible a number of lectures should be delivered before the end of the current official year.

5. Sanction is also accorded to the members of the Association undertaking the work of delivering lectures under the scheme. The lectures should be so arranged with the permission of the official superiors of the lecturers as not to interfere with their regular work. All officers of Government are requested to render such help as may lie in their power to make the scheme successful and really beneficial to the people.

Letter No. 176, dated 10th January 1917, from the Director of Agriculture in Mysore requesting among others that powers granted to him in Government Order No. R. 11619-20—Agri. 91-05-8, dated 7th March 1906, to purchase books may be enhanced so as to enable him to purchase, or subscribe for such journals as are found useful to his Department.

Order No. 9032-86—A. & E. 85-16-3, dated 8th May 1917.

As technical journals dealing with the work of particular departments are also books of reference classed under head (*b*) in para 2 of Government Order No. Fl. 2809-58—G. F. 126-16-2, dated 8th December 1916, Government are pleased to delegate to all heads of departments the same powers in respect of such journals as have been allowed in regard to the books referred to in the said order.

P. G. D'SOUZA,
Secy. to Govt., Depts. of Edn. & Agri.

To—The Secretaries to Government.
The Director of Agriculture.
The Heads of other Departments.
The Deputy Commissioners of Districts.
The Comptroller to the Government of Mysore, through Branch II.

READ—

Government Order No. 5528-29—A. & I. 159-14-8, dated 25th June 1915, declining to sanction the payment of any portion of the expenses for road journeys of the raiyats attending short courses on Government Experimental Farms.

2. Government Order No. 2314-25—A. & I. 71-15-29, dated 19th September 1916, issuing a set of rules for the admission of raiyats to short courses on the Experimental Farms.

3. Letter No. 5363, dated 19th April 1917, from the Secretary to the Mysore Economic Conference, forwarding for orders a copy of letter No. 3106, dated 14th April 1917, from the Secretary, Agricultural Committee, submitting a copy of the resolution of the Committee recommending the grant of an allowance of one anna per mile for road journeys made by raiyats to attend short courses on the farms referred to above, for a period of three years.

Order No. 9330-41—A. & E. 122-16-2, dated 14th May 1917.

Government are pleased to sanction the recommendation of the Agricultural Committee subject to the conditions (1) that the total expenditure on this account does not exceed Rs. 200 for each course and (2) that this concession is shown to raiyats who are really poor or who are recommended by the Taluk Progress Committees or some responsible person or authority, as likely to use the knowledge acquired in introducing improvements on their own lands.

Rule 1 (*a*) of the rules issued with the order of the 19th September 1916 will be amended as follows:—

"(*a*1) An allowance of one anna per mile for road journeys made by raiyats attending the short courses will also be paid by Government".

P. G. D'SOUZA,

Powers of Mr. V. Rangaswamy Iyengar, Offg. Director of Industries and Commerce, in respect of the P. W. Workshop at Bangalore.

No. 852-78—P. W. 4831-57, DATED 7TH MAY 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

PUBLIC WORKS DEPARTMENT.

READ—

Government Order No. 1607-16—P. W. 8331-40, dated the 21st August 1915, according sanction to certain proposals for the development of the Public Works Workshop at Bangalore and placing it under the direct control of the Superintending Engineer, Southern Circle.

2. Government Order No. 2380-5—P. W. 11699-704, dated 20th November 1916, directing that, until further orders, Mr. V. Rangaswamy Iyengar, Officiating Director of Industries and Commerce, should continue to be in administrative charge of the Public Works Workshop and be subordinate to the Chief Engineer in that capacity.

3. Letter No. 114, dated 10th January 1917, from Mr. V. Rangaswamy Iyengar, Officiating Director of Industries and Commerce, requesting that early orders may be passed on the subject of his enhanced powers in respect of the Workshop.

Order No. 852-78—P. W. 4831-57, dated 7th May 1917.

The powers delegated to Mr. V. Rangaswamy Iyengar in respect of the Workshop, so long as he continues to be in administrative charge of the Public Works Workshop and holds the appointment of Director of Industries and Commerce, are specified in the annexed schedule. All proposals emanating from him will be addressed to the Secretary, Public Works Department, and dealt with by that officer in his capacity as Secretary to Government.

KARPUR SHRINIVASRAO,
Secy. to Govt., P. W. Dept.

To—The Chief Engineer of Mysore.
The Director of Industries and Commerce.
The Heads of Departments.

Exd.—C. R.

No. 852-78 - P. W. 4831-57, DATED 7TH MAY 1917.

ANNEXURE.

Statement showing powers vested in the Officiating Director of Industries and Commerce in respect of the Public Works Workshop so long as he continues in administrative charge thereof.

(*a*) He will have general control over the operations of the Workshop and be responsible for its improvement and development. He will be expected to make suitable suggestions for the purpose from time to time.

(*b*) He will have the following powers in respect of the staff employed in the Workshop:—

(i) Appointments, grant of leave and full disciplinary powers over all members of the sanctioned establishment whose pay does not exceed Rs. 50 subject to the rules of the Public Works Department, all other higher appointments being referred to Government.

(ii) Entertainment of temporary and petty office establishment within budget provision where the duration of the appointment does not exceed six months and the pay Rs. 25 per mensem.

(*c*) No capital expenditure should be incurred without the previous sanction of Government. Revenue expenditure may be incurred within the limit of the budget provision, provided that such expenditure is incurred against a duly sanctioned estimate and all cases involving an expenditure in excess of Rs. 3,000 on any individual work are submitted to Government for sanction. He can arrange for execution of all sanctioned works in the manner most suitable and accept tenders for sanctioned works within a limit of Rs. 3,000.

(*d*) He may undertake private works at his discretion within a limit of Rs. 500 in each case after recovering the funds together with establishment and tools and plant charges at 25 per cent. He may also undertake works for other departments on estimates sanctioned by competent authority and on funds being arranged therefor. He may also depute the establishment of the Workshop, when convenient, to render advice and help to other departments and the public and prepare estimates for repair and improvement of machinery, the travelling allowance of the staff so deputed being borne by the private parties or the departments concerned.

(*e*) He may purchase tools and plant, instruments, drawing and other materials, up to a limit of Rs. 500 and dispose of losses in tools and plant up to a limit of Rs. 200 in each case and unserviceable tools when the book value does not exceed Rs. 300.

(*f*) Orders for articles to be obtained from firms outside India should be sent through the Secretary, Public Works Department. Articles required in the execution of sanctioned estimates manufactured in foreign countries but available from local firms or agents in India may be purchased up to a limit of Rs. 2,500 in each case and those manufactured in India may be purchased up to a limit of Rs. 3,000 in each case.

(*g*) He may issue stores on hire after taking suitable deposits to cover losses and may dispose of unserviceable or surplus stores by sale when the book value does not exceed Rs. 1,000.

Administration Report of the Electrical Department for 1915-16.

No. 511-14—C. P. S. DATED 30TH MAY 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

PUBLIC WORKS DEPARTMENT.

READ—

Letter No. 558, dated the 30th September 1916, from the Chief Electrical Engineer submitting the Administration Report of the Electrical Department for theyear 1915-16

Order No. 511-14—C. P. S., dated 30th May 1917.

The total grant, as finally revised for the capital and revenue expenditure for the year 1915-16, stood at Rs. 17,03,600 and the actual expenditure amounted to Rs. 12,92,974, as detailed hereunder:—

Heads	Revised Grant	Outlay	Lapse	Remarks
	Rs.	Rs.	Rs.	
1. Capital and Revenue Expenditure of the Cauvery Power Scheme	13,03,600	11,37,221	1,66,379	Grant allotted out of revenue receipts.
2. Fourth Installation.	2,00,000	1,06,851	93,149	Grant allotted from State Funds
3. Fifth Installation	2,00,000	48,902	1,51,098	Do
Total ...	17,03,600	12,92,974	4,10,626	

2. The outlay on item 1, *viz.*, Rs. 11,37,221, is made up of Rs. 2,40,468 under capital account and Rs. 8,96,753 under Revenue account.

3. The distribution of the revenue expenditure of Rs. 8,96,753 is shown below:—

	Rs.
i. Working expenses	4,37,631
ii. Depreciation charges	43,384
iii. Depreciation Fund	2,98,305
iv. Amount debitable to suspense account	1,17,433
	8,96,753

4. The lapse on the revised grant represents 24 per cent and it is reported to be mainly due to:—

(1) the late receipt of lightning arresters, the value of which could not be adjusted in the accounts of the year;

(2) the late receipt, owing to war conditions, of the materials ordered for remodelling the Bangalore Transmission Line and for the Fifth Installation of the Cauvery Power Scheme;

(3) the postponement of the construction of quarters for the Line Inspectors and for the staff at Sivasamudram; and

(4) savings under establishment.

5. The revenue from the scheme during the year was estimated at Rs. 22,74,000, but the amount realised was Rs. 23,38,632, against Rs. 21,27,862, billed for.

No. 511-14—C. P. S., DATED 30TH MAY 1917.

6. According to a decision recently reached by the Finance Committee and approved in Council, a sum of Rs. 3,31,000 of the total revenue derived from the Cauvery Power Scheme is credited to the Krishnaraja Sagara Project. To estimate the financial results of the Cauvery Power Scheme during 1915-16, the gross revenue has therefore been taken as Rs. (23,38,632—3,31,000)=20,07,632.

Not taking into account the charges debitable to Depreciation and Suspense heads, the net revenue after deducting the working expenses amounting to Rs. 4,37,631, would be Rs. 15,70,001. The corresponding figures for the previous year stood at Rs. 13,40,351 and Rs. 4,03,998.

7. The increase in revenue is due to the extra rate of £2 per Horse Power per annum charged for the block of power supplied from the first, second and third installations and to the additional power supplied from the Fourth Installation at the rate of £12 per Horse Power, per annum.

8. The financial results of the scheme to the end of the year 1915-16, may be summarised as below:—

			Rs.
Capital outlay to end of 1915-16 (Figures as furnished by the Comptroller)	...	...	1,07,46,390
Gross earnings.			
Total from the power supply for the whole year	...	...	2,35,78,311
Accumulated interest on Depreciation Fund	...	...	6,19,391
			2,41,97,702
Expenditure—			
(i) Working expenses	...	...	45,90,200
(ii) Depreciation Fund	...	...	34,43,056
(iii) Interest on capital outlay	...	...	43,71,843
(iv) Amount credited to Krishnaraja Sagara Project for the year 1914-15	...	...	3,31,000
	Total	...	1,27,36,090
Profit—			
Net profit for 14 years from 1902-03	...	...	1,14,61,612
The average profit per year	...	...	8,18,686·57

Note—The amount at the credit of the Depreciation Fund and the charges debited thereto to the end of the year 1915-16 were Rs. 34,43,056 and Rs. 67,970, respectively.

9. There was a steady increase in the number of power and lighting installations in the Cities of Bangalore and Mysore, as shown in the annexed statement:—

Station	Power installations increase		Interior lighting installations increase		Remarks
	From	To	From	To	
Mysore	18	20	291	372	
Bangalore City ...	29	35	686	933	
Civil and Military Station, Bangalore ...	11	15	898	1,044	
Total ...	58	70	1,875	2,349	

10. The reduction in the rate for power for small industries, sanctioned by Government in November 1914, has resulted in an increase in the number of consumers. The reported increase in the load factor of the small installations in Bangalore, indicates a considerable improvement in the industrial situation.

11. To minimise interruptions to power and lighting service, an over-head ground wire was erected along the entire length of the Kolar Main, and the Mysore Branch, Transmission lines. The remodelling of the Bangalore Branch Transmission line has also been taken in hand.

12. During the past few years, the channel and river conservancy operations were being carried on in the summer months at an outly of nearly half a lakh of rupees per annum, in order to ensure adequate supply in the river for power

generation at Sivasamudram. These operations were discontinued during the year under review, as the requisite flow was maintained with the help of the storage effected in the Krishnaraja Sagara.

13. To meet the growing demand for power supply, an estimate amounting to Rs. 3,63,188 was sanctioned for the fifth installation, designed to generate 3,000 additional K. W. units at Sivasamudram.

14. The plant at all the stations is reported to have been maintained in an efficient condition and the staff as a whole is stated to have co-operated wholeheartedly. The Chief Electrical Engineer has made prominent mention of the following officers as deserving of credit for the satisfactory completion of the work connected with the Fourth Installation.

Mr. S. D. Seshadri Iyengar, Chief Operator at Sivasamudram.
„ J. V. E. Tate, Chief Line Inspector.
„ L. J. Gordon, Officiating Chief Operator at Kolar Gold Fields.
„ B. Krishna Rao, Sub-Assistant Engineer.
Messrs. A. T. Westrop,
V. R. Cousik,
Raja Rao. Patankar,
A. C. Munirathna Mudaliar, and
C. E. Foregard. } Electric and Hydraulic Operators.
Mr. T. Shanmugam Pillay, Assistant Line Inspector.

15. Government are pleased to record their satisfaction at the successful management of the Department during the year under review by Mr. S. G. Forbes, Chief Elecrical Engineer.

Excavation of a well close to the margin of the Bangalore-Mysore Road.

No. 1074—P. W. 5720, DATED 31ST MAY 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

PUBLIC WORKS DEPARTMENT.

Order No. 1074—P. W. 5720, dated 31st May 1917.

It has come to the notice of Government that a well has been excavated close to the margin of the Bangalore-Mysore road in the 4th furlong of the 46th mile. Though the well itself is in private land, the ramp leading to it was cut so as to encroach on the road margin. A large amount of spoil from the excavation was deposited on the road margin.

2. When an enquiry was instituted, it was ascertained that the owner of the well had no permission either from the Revenue or the Public Works Department for making a cut on the road margin and using it as a ramp.

3. Though the matter was very simple, the officers concerned took five months to submit a proper explanation for allowing this encroachment. The belated explanations go to show that not only did the Sub-Division Officers and subordinates who successively held charge of the section of the road fail to prevent the encroachment in question, but, having noticed it, they failed to reclaim the Government land or even to bring the fact to the notice of the higher authorities. The Executive Engineer in charge at the time states that, though he passed over the road several times, his attention was not drawn to it by the subordinates and that heaps of earth and stone deposited on the roadside had concealed the encroachment from his view. But he seems to forget the fact that some of the heaps themselves were on Government land and an encroachment sufficient to warrant his notice.

4. It is clear that none of the officers or subordinates concerned realised their responsibility in the matter. Officers are expected to watch the interests of Government with a vigilant eye and to constantly suggest and effect improvements of the roads in their charge. But this is a case in which the reverse has happened. The indifference displayed is aggravated by the long delay (of five months) that has taken place in obtaining the explanation.

5. Government regret that this primary duty was neglected by the Sub-Division Officers concerned. The Executive Engineer is also to blame, for the reasons stated above, for failing to notice the encroachment.

6. The Chief Engineer is requested to submit, for the information of Government, a note showing how the margins of all roads are defined and what precautions are in force for duly protecting them.

7. The area excavated upon in the present case should be re-claimed and the fact reported within two months.

8. This order should be circulated to all officers and subordinates of the Department with an expression of hope that they will take every precaution to prevent such encroachments in future.

KARPUR SHRINIVASRAO,
Secy. to Govt., P. W. Dept.

To—The Chief Engineer of Mysore.

Grant of Mileage Allowance to Guards and Brakesmen in addition to free uniform Clothing.

No. R. S. 3389-3392—Ry. F. 4 O. L. 16-17, DATED 14TH MAY 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

RAILWAY DEPARTMENT.

READ—

Government Order No. Fl. 806-7—S & A. 74-15-1, dated 16th August 1915, sanctioning the rules regulating the allowance of the staff employed on Railway lines worked by the State.

2. Government Order No. R. S. 2354-2357—Ry. F. 4 O. L. 16-17, dated 2nd February 1917, sanctioning the issue of clothing to the Traffic staff employed on the Bangalore-Chikballapur and Kolar District Railways.

3. Note No. R. S. 503, dated 26th March 1917, from the Secretary for Railways, soliciting sanction to the grant of free uniform clothing to Guards and Brakesmen as also of mileage allowance.

Order No. R. S. 3389-3392—Ry. F. 4 O. L. 16-17, dated 14th May 1917.

In Government Order dated the 16th August 1915 referred to above, it was stipulated that mileage allowance to Guards and Brakesmen would be allowed on condition that they shall provide at their own cost uniform in accordance with such patterns as may be approved by Government. It is now brought to notice that it would be very hard on the staff if the mileage allowance was refused because of the fact that they are annually supplied with a few rupees worth of clothing and that men on other Railways are allowed both mileage allowances and uniform free.

2. In the circumstances, Government are pleased to sanction the grant of mileage allowance to Guards and Brakesmen in addition to free uniform clothing as per scale laid down in Government Order No. R. S. 2354-2357—Ry. F. 4 O. L. 16-17, dated 2nd February 1917.

Read—

Government Order No. Fl. 2232-3—G. F. 15-14-3, dated 26th November 1914, sanctioning the establishment required for the audit of open line accounts.

2. Government Order No. Fl. 700—G. F. 15-14-18, dated 11th August 1915, sanctioning the appointment of Mr. V. C. Murugesa Mudaliar as Superintendent of the Railway Open Line Section of the Comptroller's Office from 7th April 1915.

3. Note No. R. S. 438, dated 22nd February 1917, from the Secretary for Railways, submitting for sanction, proposals to the fixing of the pay of the Superintendent as a progressive one on Rs. 140—10—200, and starting Mr. Murugesa Mudaliar, the present holder thereof, on Rs. 160 from the 7th April 1917.

Order No. R. S. 3464-3466—Ry. F. E. 28-16-17, dated 17th May 1917.

In consideration of the increased mileage now worked by the State and in view of the official's good work, Government are pleased to sanction—

(i) to the pay of the Superintendent Mr. V. C. Murugesa Mudaliar, being made progressive in the sanctioned appointment of Rs. 140—10—200, and

(ii) to start him on Rs. 160 from the 7th April 1917.

READ —

Railway Secretary's Note No. 487, dated the 16th March 1917, submitting for sanction a scale of establishment required for the maintenance of Engineering works on the Bangalore-Chikballapur and olar District Railways.

Order No. R. S. 3461-3463—Ry. F. 17 & 57E.-16-17, dated 17th May 1917.

In consequence of orders having been already issued for the winding up of the Kolar-Chikballapur Railway Construction Division, it has become necessary for the formation of an Open Line Division with effect from the 1st April 1917. Government are accordingly pleased to sanction the scale of establishment as per accompanying statement required for the formation of the Bangalore-Chikballapur Light and Kolar District Railways Open Line Division under the charge of Mr. R. Thippaiya, Assistant Engineer, on his present pay.

2. The question of increasing the pay of Mr. Thippaiya may be brought up with those of his seniors when the staff for the Mysore-Arsikere Railway is settled. He may however be given a charge allowance admissible under the rules.

Construction of Quarters for certain Officers and Staff of the Railway Department at Mysore.

No. R. S. 3436-3438—Ry. F. G. 149-16-17, DATED 16TH MAY 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

RAILWAY DEPARTMENT.

READ—

Railway Secretary's Note No. 347, dated the 6th January 1917, requesting sanction to the construction of quarters for certain officers and staff at Mysore.

Order No. R. S. 3436-3438—Ry. F. G. 149-16-17, dated 16th May 1917.

The Secretary for Railways represents that as Railway offices are to be transferred permanently from Bangalore to Mysore, the officers and staff should be given certain facilities for shifting their head quarters, and requests administrative sanction for constructing quarters for them at Mysore in the new Vontikoppal extension to the western end of the High Level Reservoir now under construction.

2. In the circumstances brought to notice, Government are pleased to accord administrative sanction to the construction of quarters at Mysore for ten officers, 71 clerks and 41 menials of the Railway Department at an estimated cost of three lakhs, rent being charged according to rules.

D. G. DANI,
Ag. Secy. for Rys., Govt. of Mysore.

To—The Secretary to Government, Financial Department.
The Comptroller, Public Works and Railway Branch (through the Financial Department).
The Agent, Mysore State Railways.

Read—

Government Order No. 2042-47—Ry. F. 204-15-16, dated 26th January 1916, sanctioning the revised estimate amounting to Rs. 1,965 for the survey of a tramway line from Thadasa to Hebbe.

2. Railway Secretary's note No. 244, dated 16th—17th November 1916, submitting, for administrative sanction and abstract estimate amounting to rupees two and a half lakhs for the construction of the tramway.

Order No. R. S. 3483-3488—Ry. F. G. 204-16-17, dated 19th May 1917.

As it is represented that the line from Thadasa to Hebbe will feed the Tarikere-Narasimharajapura Tramway and help in the development of forest resources to a considerable extent, Government are pleased to accord their administrative sanction to the accompanying abstract estimate amounting to rupees two and a half lakhs for the construction of the above said line.

Programme of Railway Operations in Mysore for the triennium ending 1919-20.

No. R. S. 3425-3430—Ry. Fl. No. G. 42-16-17, dated 15th May 1917.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

RAILWAY DEPARTMENT.

Read—

Note dated 3rd November 1916, from the Secretary for Railways suggesting among other things that it is desirable that a construction programme for a term of years be adopted and funds made available every year in the Budget therefor.

Order No. R. S. 3425-3430—Ry. Fl. No. G. 42-16-17, dated 15th May 1917.

Government agree with the suggestion that a continuous but moderate policy of Railway development should be pursued in the State till all the lines required are constructed and that for this purpose they are willing to provide in the annual Budget Estimates a sum ranging from 15 to 20 lakhs of rupees according to the necessity of the works in progress till the entire construction programme is gone through.

2. They, however, direct that forecasts should be prepared and approval of Government obtained once every triennium and work carried out strictly in accordance therewith.

3. Government are pleased to approve the programme for the triennium ending 1919-20 appended to this order.

4. They further direct that special efforts should be made to expedite the investigations of all projects till a decision is reached and the sanction of the Government of India obtained.

D. G. DANI,
Ag. Secy. for Railways, Govt. of Mysore.

RAILWAY DEPARTMENT.

READ—

Note No. C. 124—172, dated 5th October 1916, from the Secretary for Railways, regarding Rules regulating the grant of travelling allowance to officers in the Railway Department engaged on both construction and open line works.

Order No. R. S. 3603-3606—Ry. F. O. L. 20-16-17, dated 30th May 1917.

It having been brought to notice that the application of two sets of rules to one and the same officer whose salary is partly debitable to Capital and partly to Revenue involves a departure from the Rules in the Mysore Service Regulations, Government direct that, except in cases regulated by special orders, open line or ordinary rules of travelling allowance should be applied according to the object of the major portion of the journey performed by an officer.
